Chapter 1: Introduction to the Holographic Universe

We are living in 2 kinds of worlds: the Holographic Universe and the Real World. Both, the Holographic Universe and the Real World, are part of the Corporeal World. The Real World consists of everything that we are familiar with in the physical world: the earth, our physical bodies, etc. The Holographic Universe is made up of all that which is not ‘material’ in nature. The Holographic Universe consists of the:

1. Quantum World,
2. Subtle World of Light, and
3. Subtle World Drama.

The Quantum World is filled with quantum energies and has many quantum dimensions. The Subtle World of Light (hereafter referred to as the ‘SWL’) consists of the:

1. **Light** energies of **all quantum energies** (which they have **instead** of having a soul). I have referred to these *light energies* as the Quantum Energies Light (QE Light) in Chapter 8 of this book.

2. **Light** energies of nature (which they have **instead** of having a soul). The QE Light energies provide these for them. In God's messages, in the Brahma Kumaris, it has been said that Nature does not have a 'soul'. It has been said that they only have 'light' instead. So this 'light', which I have referred to as 'QE Light', is not a soul.

3. All human souls who are in the Corporeal World.

4. All animal souls.

5. Pure subtle dimensions/environments which the human souls use during subtle experiences.

The Subtle World Drama (hereafter referred to as the 'SWD') consists of the:

1. 2D Subtle World Drama,

2. 3D Subtle World Drama, and

3. Nature's 2D World Drama.

The 2D Subtle World Drama (hereafter referred to as the '2D SWD') has a brief record of everything that will happen to us, in all our lives on earth. The 2D SWD has a record of what is in the:

1. World Drama which exists within the Supreme Soul (God), and

2. World Dramas which exist within all human souls.

Everything that is happening on earth is also happening in the 3D Subtle World Drama (hereafter referred to as the '3D SWD') in a holographic form. The creation of the Real World takes place through the SWD.

There are many *QE Light and quantum dimensions* in the SWD which are involved with materialising the Real World. The *QE Light and quantum energies* manifest as physical forms, in the Real World. The *QE Light and quantum energies* which are closest to the physical world, will look exactly like the physical world because they are made of particles. The densest energies are the

energies of the Real World *which we live in now*. The Real World is made of real particles. Further away from the Real World are the *QE Light and quantum dimensions* which consist of quantum particles. A step further away from the quantum particles, are the quantum dimensions which consist of **quantum waves that are involved with materialising the Real World**. Each of these dimensions is like a world of its own. Though it is as if the less dense dimensions are further away from the Real World, all of these dimensions occupy the same space as the Real World.

Further away from the *world of waves*, which is involved with the creation process, is the 2D SWD with its imprints on the QE Light energies. The Real World is materialised based on what exists in the imprints of this 2D SWD. Further away, from the 2D SWD, are the dimensions of:

1. The QE Light energies in the SWL which are **not** involved with the creation process.
2. The quantum energies in the Quantum World which are **not** involved with the creation process.

All the various kinds of *QE Light and quantum energies* can be said to be in different quantum dimensions. All the *QE Light and quantum dimensions* exist permanently because the Corporeal World exists permanently.

Within **each** human body there is a soul. According to the knowledge of the Brahma Kumaris, the soul is a point of white living **light**. Since the soul consists of **light**, the soul is part of the SWL. We are the souls and not the physical bodies. When I use the words ‘human souls’ or ‘souls’, I am referring to the souls within the human bodies.

Within each animal too, there is a soul. When I use the words ‘animal souls’ I am referring to the souls within the animals.

The SWL consists of **light** energies **only**. All souls are in a metaphysical dimension within the SWL. More explanations, on the SWL, can be found in the last few chapters of this book. All that which have been briefly explained, in this chapter, are explained further in the subsequent chapters of this book.

Chapter 2: Nature's 2D World Drama and the Cycle of Time

Nature's 2D World Drama (hereafter referred to as the 2D WD or *Nature's 2D WD*) exists in the Holographic Universe, since the imprints of the 2D WD are in the QE Light energies. These imprints exist, eternally, in the QE Light energies. Thus, nature also exists eternally since its existence is based on what is in the 2D WD.

The 2D WD provides for *linear time* since nature exists eternally. The 2D SWD, on the other hand, provides for cyclic time. This *cyclic time* is referred to as the Cycle of Time, in accordance with the knowledge of the Brahma Kumaris.

The Cycle of Time is about how 'Time' moves in a cyclic manner through 6 Ages, in the following order:

1. Golden Age (Satyug).
2. Silver Age (Tetrayug).
3. Mid-Confluence. This is the Confluence between the Silver and Copper Ages. The Mid-Confluence can also be referred to as the Mid-Confluence Age.
4. Copper Age (Dwapuryug).
5. Iron Age (Kaliyug).
6. Confluence Age (Sangamyug). This is the Confluence between the Iron and Golden Ages.

According to the knowledge of the Brahma Kumaris, the Supreme Soul (God) is a Point of White Living Light. The spiritual strength of God is like an ocean whereas the spiritual strength of the human soul is like a drop in comparison.

At the end of each 2D SWD, a new 2D SWD is created when impressions of the *World Dramas that are deep within God and all human souls* are left on the QE

Light energies. The same World Drama is imprinted as the 2D SWD, at the end of each Cycle of Time, so 'Time' repeats in a cyclic manner. The human souls are entangled to this 2D SWD, which provides for the repetition of Time in a cyclic manner.

The *knowledge of the Brahma Kumaris* gives emphasis to cyclic 'Time' because the Brahma Kumaris are involved with preparing the human souls for world transformation. When 'world transformation' takes place, a new Cycle of Time begins. However, according to the knowledge of the Brahma Kumaris, **nature exists eternally** in the Corporeal World. This is, actually, the linear Time of nature.

The 2D WD only has a brief outline which guides animals, plants and everything else in nature. Information on how nature would be like, in the Ages of the cycle, is in the *World Drama within God*. This information is imprinted in the 2D SWD, at the end of each cycle; these imprints provide nature's role, in the next new cycle. The quantum energies materialise the Real World based on what exists in the 2D SWD.

The *spiritual state of animals and plants* is dependent on the spiritual state of all human souls on earth. Even nature's **role** will be based on the spiritual state of Mankind on earth.

It is as if the cyclic 2D SWD moves along on the linear 2D WD. However, the 2D SWD is entangled with Nature's 2D WD. It can be said that the cyclic 2D SWD is in a combined state with Nature's 2D WD.

The linear and cyclic character of Time, for Nature and the human World Drama, has been reflected through the Mayan Long Count calendar, Hindu cycle, etc. Though Nature has a linear time, it can be said to be cyclic too **when Time is based on the cosmological cycle**. The Hindu cycle is a cosmological cycle.

In the ancient Hindu texts, the *QE Light and quantum energies* were also portrayed as Brahma because the *QE Light and quantum energies* are also involved with the 'creation of the Real World'. Thus, even the *QE Light and quantum energies* were portrayed as the 'Brahma' to whom the Hindu cosmological cycle was associated to. In the ancient Hindu texts, the word '**God**' (or its equivalent, including 'Brahma') is often used **as a concept** which includes: 1. The ***QE Light and quantum energies*** (because of its role

for the creation, sustenance and annihilation processes, i.e. its Brahma, Vishnu and Shanker aspects).

2. The **World Drama** which **includes** the 2D SWD, 'Time' (which is provided by the 2D SWD), Nature and its 2D WD, the *World Dramas within God and all human souls*, and everything else relating to the World Drama which has not already been mentioned.

3. The **Holographic Universe** and everything else in the Holographic Universe which has not been specifically mentioned.

4. **God** (the Supreme Soul).

5. The human souls who were playing a role as the **instruments of God**, from the previous Confluence Age until the end of the cycle.

6. All **human souls** (generally).

7. More than one of the above or all of the above.

In the Hindu myths, the *QE Light and quantum energies*' ability to create, sustain and annihilate has been portrayed as Brahma, Vishnu and Shanker. It has been portrayed that all these three gods are connected, or are 'one', so as to reflect how the quantum energies act as 'one' while carrying out what has to be done as per the 2D SWD. The portrayal that **all these three gods have to play their roles for the human world** reflects how the *QE Light and quantum energies* have to use all three functions for what has to exist in the Real World. The three functions are **based on the Laws of Nature which are provided by the 2D WD** so as to allow the quantum energies to create, sustain and annihilate as per the 2D SWD. The existence or manifestation of the Real World, is based on what is in the 2D WD, 2D SWD and the *World Dramas within God and all human souls*.

Chapter 3: World Drama and Soul World

When I use the words ‘World Drama’ I can be referring to **one** or **more than one** or **all** of the following:

1. The World Drama that is taking place on earth.
2. The 2D SWD.
3. The holographic movie (3D SWD which is taking place in the Holographic Universe, as the World Drama takes place on earth).
4. Nature’s 2D WD.
5. The World Dramas that exist within God and all human souls.

The *World Dramas in God and all human souls* become the *World Drama on earth* through the 2D SWD and the 3D SWD. The 2D WD exists to provide the world stage for the *World Dramas that are within God and all human souls*. The world stage is provided through the 2D SWD and the 3D SWD. Since all the World Dramas (*World Dramas in God and all human souls*, 2D SWD, 3D SWD, Nature’s 2D WD and the World Drama on earth) are connected to each other, they can all be collectively referred to as the ‘World Drama’.

The Soul World and the *World Drama on earth* are not part of the Holographic Universe. However, these have to be understood, in order to understand my explanations on the Holographic Universe.

According to the knowledge of the Brahma Kumaris, the Soul World is the metaphysical world which is the home of God and all human souls. Human souls leave their home (Soul World) to come into the Corporeal World and play their roles in the *World Drama on earth*.

Souls are in their pure, virtuous state when they are in the Soul World, however, souls are **not** experiencing and enjoying their pure state, or happiness, while they are in the Soul World; human souls can only enjoy happiness in the Corporeal World, through using the physical body. Souls only use a body when they are participating in the *World Drama on earth*.

The Corporeal World (including the earth) is our world stage where we enjoy happiness. All human souls will have to come into the Corporeal World to play their parts in the *World Drama on earth*. They experience happiness through living their lives on earth.

Human souls are ‘living’ in the *World Drama on earth*. They are not ‘living’ if they exist as ghosts, in the second half cycle. Souls are also not ‘living’ when they are in the Soul World. Human souls are only resting in the Soul World. To ‘live’ one must perform actions as is done in a drama. No actions are performed in the Soul World. Actions can only be performed in the Corporeal World, while one is participating in the *World Drama on earth*. One needs a physical body to perform actions. Souls do not have a physical body in the Soul World.

The *World Drama that is taking place on earth* is a predestined movie; we are all actors in this *World Drama that is taking place on earth*. Just like how we see actors playing their roles as a movie is being played, all human beings are just playing their roles in the World Drama (based on what exists in the 2D SWD and based on what exists in the *World Drama deep within the souls*). Hence, we are like puppets playing our roles in the *World Drama on earth*.

Though we have to play our roles as per the predestined World Drama, we do have ‘free will’ to a certain extent. For example, the human soul has ‘free will’ to choose between using the virtues or the vices. This ability, to use free will, is also part of the World Drama.

Since the World Drama is a predestined movie, some people can perceive what is going to happen in the future, even before it happens. What they had seen can happen, exactly as was seen, because we are living in the predestined World Drama. They saw what exists in the Akashic Records. The Akashic Records consist of the records that exist in the:

1. 2D SWD, and
2. World Dramas within God and all human souls.

We can only see what exists in the *World Drama within God* **when God gives us visions** based on what is there. God only gives visions *as per the World Drama*. The vision which God gives, to a person, will be based on the person’s belief

system. Belief systems were created, from the time of the Mid-Confluence, as per the World Drama. One accepts a specific belief system *as per the World Drama*. Actually, one can see visions based on **any belief** which one has faith in, even if the belief was not based on a belief system. Even such visions are only seen *as per what exists in the World Drama*.

People see visions of the Akashic Records, as the Book of Life, based on the belief systems that have been created. What is in the Akashic Records becomes a reality as the *World Drama on earth*.

‘Time’ does not exist in the Soul World because the World Drama is not taking place there. ‘Time’ only exists on earth where the World Drama takes place. According to the knowledge of the Brahma Kumaris, the **same World Drama keeps repeating** as the Cycle of Time keeps repeating. The World Drama begins at the *beginning of the Golden Age* and comes to an end *at the end of the Confluence Age*.

The Golden and Silver Ages are in the *first half cycle*. There is a perfect world, in the World Drama, during the first half cycle.

During the Mid-Confluence, the World Drama is such that the world transforms from the perfect state to the imperfect state. I am involved with explaining what had happened during the Mid-Confluence because I was meant to do so (as per the World Drama).

The Copper and Iron Ages are in the *second half cycle*. There is an imperfect world, in the World Drama, during the second half cycle.

During the Confluence Age, the World Drama is such that the world is transformed from the imperfect state to the perfect state. The members of the Brahma Kumaris are involved with world transformation, in the Confluence Age. This is also happening *as per the World Drama* because all human souls play their roles on earth *as per the World Drama*.

The *World Drama which is deep within all human souls* is just like the *World Drama that takes place on earth*. However, the *World Drama deep within a soul* only has a movie of the incarnations of that soul. This gets imprinted as part of the 2D SWD, at the end of the cycle, when the *World Drama within God* also gets imprinted as the 2D SWD.

The *World Dramas within God and all human souls* have to repeat in a cyclic manner. Thus, the 2D SWD is an impression of the World Drama that has to keep repeating. As the new Cycle of Time begins, so too the new World Drama begins.

At the end of each cycle, impressions of the *World Drama that is deep within God and all human souls* are left on the QE Light (as the 2D SWD). What has to be done by the quantum energies, for Mankind in the Corporeal World, is based on what is recorded in the 2D SWD. Human souls come into the Corporeal World, from the Soul World, based on what is recorded in the:

1. 2D SWD,
2. World Drama within God, and
3. World Drama within the human souls.

Then, as per the World Drama, at the end of each cycle, God comes into the Corporeal World and takes all souls back to the Soul World. God and all human souls, who are in the Soul World, **are not in the Holographic Universe** when they are in the Soul World.

Human souls, who are in the Corporeal World, are also part of the Holographic Universe because souls consist of metaphysical light energies which are not 'material' in nature. The *World Drama deep within the human soul* is imprinted on the soul's holographic light energies. Based on what exists in this holographic *World Drama within the soul* and based on what exists in the 2D SWD in the Holographic Universe, the soul carries out actions in the World Drama on earth. The 'holographic' is turned into a reality on earth, through the World Drama.

Chapter 4: The Subtle World Drama

The SWD consists of the:

1. 2D SWD,
2. 3D SWD, and
3. Nature's 2D WD.

Normally, when I refer to the *SWD*, I am referring to the 2D SWD and the 3D SWD. The 3D SWD is a subtle movie in the Holographic Universe which we are all involved with, when we are living our lives on earth; everything that is happening in this subtle movie is also happening on earth.

The Holographic Universe materialises what is in the 2D SWD as the World Drama on earth. The World Drama that is taking place on earth and in the 3D SWD are the same. They are happening at the same time. The only difference is that the 3D SWD is holographic while the World Drama on earth is the material form of the same drama. Everything that is happening in the World Drama on earth and in the 3D SWD is exactly as it is in the 2D SWD. As we play our roles, in the holographic 3D SWD and on earth, more is recorded in the 2D SWD as past events.

All souls, who are in the Corporeal World, are entangled with the 2D SWD; it is as if they are all connected. It is also as if each soul is walking along a different path, in the 2D SWD, while taking many births. In the 2D SWD, the paths of the human souls cross the paths of other souls when the souls have to meet, or do something together, on earth. Consequently, their paths give the 2D SWD a web-like appearance. Thus, I also refer to this 2D SWD as the Web-like Subtle World Drama or as the Web-like 2D SWD.

The human souls are in the SWL, yet they play a role together with the quantum energies, in the SWD, because they are entangled with the quantum energies.

This combined role has been reflected in the Hindu myths as Ardhanarishvara. One half of Ardhanarishvara is male (Shanker) and the other half is female (Parvati). The *QE Light and quantum energies* have been portrayed as the female half. The male half represents the human souls, in the Holographic Universe. Ardhanarishvara had also been used to symbolically represent more than just this. The *QE Light and quantum energies* and the human souls play their roles, together, through the Holographic Universe because:

1. the World Drama is recorded in the QE Light energies, and
2. some of the energies of the human souls are entangled into the World Drama that has been recorded in the QE Light energies.

After coming into the Corporeal World, from the Soul World, souls are moving along in the SWD as they play their roles on earth. As the holographic beings, in the holographic 3D SWD, move along the 2D SWD, they will be moving along into the future events. Through this, time is provided for the people on earth. So the people will feel that there is a past, present and future.

Time and space (in the 3D SWD) are experienced by all those who are participating in the World Drama on earth. What is happening, in the holographic 3D SWD, provides the relevant space for the *World Drama that is taking place on earth*.

The three physical dimensions (width, length and height) are provided for through the holographic 3D SWD. Time is provided by the 2D SWD. Space-Time is provided by the quantum energies due to its entangled state with the 2D SWD.

The Holographic Universe is a four-dimensional subtle world. The four dimensions are width, length, height and space-time (or 'Time'). It is better to see the 4th dimension as space-time, instead of as 'Time', because space has to be associated to time while one **lives on earth**. If one sees the Corporeal World at a specific point in time, then the holographic universe is a 3-dimensional projection.

During the *first half cycle*, the holographic 3D SWD is in the border of the SWL. During the Mid-Confluence, the holographic 3D SWD began dropping into the Quantum World. Thus, in the second half cycle, the human souls are in a sunken

state while they live in the Real World as mortals. All this has been reflected, in the myths, through how the people/gods, who were living in heaven, had dropped to live on earth. During the Mid-Confluence, practices were developed to help the people to remain in a holographic 3D SWD that was in the SWL. So long as the stage of the people was good and they did not use the vices, their holographic world remained above the Quantum World. The practices that were developed, during the Mid-Confluence, got incorporated into the various belief systems, through many ways, later on. One of these practices is the one where believers are encouraged to make efforts to live in the heaven that is above the world which we live in now. The word 'Heaven' has been used to represent more than just this. 'Heaven' was used to reflect the:

1. Holographic Universe.
2. 3D SWD which was in the SWL.
3. Subtle dimensions which were used by the Mid-Confluence Aged gods/beings (before they lost the soul-conscious state to become mortals). These pure subtle dimensions are provided by the pure QE Light energies. In the soul-conscious state, the soul is spiritually very powerful and the person will be aware that he is a soul; he would not feel that he is the body because he is an immortal.
4. Confluence Aged subtle regions, at the end of the cycle.
5. Pure subtle dimensions used by human souls during worship, meditation etc., from the time of the Mid-Confluence. The *QE Light and quantum energies* provide these subtle dimensions, temporarily.
6. Metaphysical dimension of the soul, in the Corporeal World. The metaphysical dimension is **not a 'world'** of all the souls in the Corporeal World. Since the soul consists of metaphysical energies, it is in a metaphysical dimension. It is as if each soul is in a metaphysical dimension of its own, therefore it is in a world of its own.
7. Quantum dimensions which the Mid-Confluence Aged gods (royal clan) were using, when they were in the quantum dimensions where

they could age slowly.

8. Quantum dimensions which the Mid-Confluence Aged scientists were using when they were time-travelling into the future, etc.

9. Golden and Silver Ages on earth.

10. All heavenly places on earth which souls enjoy when they have **just come into** the Corporeal World from the Soul World, even though they may not have come into the Golden and Silver Ages.

11. Places which are high above the ground, e.g. the sky, outer space, etc.

12. Soul World.

13. Places on earth, in ancient times, which represented one of the heavens in numbers 1 to 12 as mentioned above.

Chapter 5: Role of Causal Energies in the Holographic Universe

The causal light energies, of God and the human souls, have **creative** abilities. The *causal light energies* can also be referred to as the Causal Self, causal body or as the **Subconscious Self**. In Sanskrit, the causal body is referred to as Karana-Sarira or as Karana Deha. Kaaran or Karana means ‘causal’ or ‘cause’. Sarira and Deha mean ‘body’. Some of the *metaphysical light energies of the soul* act as the Causal Self. The Causal Self **initiates** a **creation process** or **cause** something to happen. It can be said that: 1. The soul itself is the Causal Self though, normally, it is the Subconscious Self which is referred to as the Causal Self.

2. The World Drama is in the Causal Self, deep within the soul.

At the end of each cycle, God’s Causal Light **records** what exists in the World Drama (within God) onto the *quantum energies as an impression*. This impression is for the new 2D SWD, of the new cycle. Then, the *causal light of all human souls* record an outline, of the World Drama that exists deep within the human souls, onto this new 2D SWD (for the next cycle). This outline will be of all their births for the new cycle. Impressions are also left to get the fetuses developed, in the womb, so that the souls can enter it when these souls have to take the incarnations.

At the end of the cycle, when impressions are left onto the 2D SWD, **impressions are not left of everything** that is in the World Drama deep within the human souls. This makes it look **as if** our decisions influence the path we take, in the 2D SWD. In the 2D SWD, it will look like we have free will, i.e. choice to take **one among many paths** through making a decision. These *many paths* are a reflection of the ‘confusion’ which we are in. Then, as we make decisions, more impressions are left in the 2D SWD as we progress along the path which we are walking on.

After having come into the Corporeal World, in the new cycle, the *Causal Self of human souls* leave more impressions on the QE Light energies (in the 2D SWD). Everything that is done by the soul, as a person, will be recorded in the 2D SWD. Impressions, based on the decisions that are going to be taken, are also

made in the 2D SWD when the decisions are **about** to be taken. Thus, through subtle experiences, we can **know what we will be doing** just before we do it. The Causal Self leaves these impressions, in the 2D SWD, while it influences the person **through the brain** to make the decision. The person is influenced by the *activities in the brain* so as to make the decision, as per the World Drama. This is why, through watching the *activities in the brain* during experiments, the scientists know the decision which a person is going to make **even before** the person makes the decision.

We are only using some of the energies of the soul, as the **Conscious Self**, during a lifetime. Therefore, the Conscious Self is not aware of everything that is being done, by the causal energies, in the Subconscious Self. This makes life entertaining. The Conscious Self will not be aware of what is being done by the Subconscious Self because the energies of the soul are **divided up** to perform the various tasks of the soul. It is the soul which is carrying out all these different functions allocated to itself. Thus, even though only some *energies of the soul* are used by the Conscious Self, it is the soul which is **living on earth** through using the corporeal body. Most of the other energies of the soul are also involved with what has to be done by the person, even though the Conscious Self is not aware of what they are doing. The soul is living its lives based on what already exists in the World Drama, deep within the soul; the soul is involved with **living** through its incarnations.

As the human soul comes into the corporeal world, from the Soul World, the *causal energies* (which have the World Drama deep within the soul) get entangled with the 2D SWD. It is as if they become part of the 2D SWD. This connects the World Drama deep within the soul, to the 2D SWD. Through this combined state, the causal energies of the soul project the subtle light form, of the body for the incarnation, into the holographic 3D SWD. The subtle Holographic Being is projected into the 3D SWD, as per the World Drama. As the causal energies project the Holographic Being, even the *QE Light and quantum energies* **provide the QE Light and quantum energies bodies** for this Holographic Being. As the subtle quantum body is created, the material body also exists on earth. In reality, the creation of a new being takes place through the **creation of a child**. This involves:

1. the father of the child,
2. the mother of the child,
3. the human soul, which will enter the fetus, and

4. the *QE Light and quantum energies*.

In this chapter, I am giving emphasis to explaining the **role** of the **causal energies of the soul** for the *creation of the new being*. The body keeps getting changed through the causal energies making the initial move. Even where the fetus is concerned, the *causal energies of the relevant souls* began the creation process through leaving an impression, in the 2D SWD, at the end of the previous cycle. The impression, which was left in the 2D SWD, was based on what is in the World Drama within:

1. the father of the child,
2. the mother of the child, and
3. the soul which will be entering that fetus.

The Causal Light of God enabled the appropriate impressions to be left on the QE Light energies, at the end of the previous cycle. Impressions are left of everything that the fetus needs until the soul enters the fetus. These **influence the development of the fetus**, before the soul enters the fetus. At the relevant time, in the 2D SWD, the quantum energies provide the material form for everything that is needed so that the child can be conceived. Then, the fetus develops based on what exists in the 2D SWD. The development of the fetus can be explained by the sciences because, as per Nature's 2D WD, everything that is in nature can be explained by using the sciences. The Scientific Laws of nature become part and parcel of the 2D SWD because the 2D WD is entangled with the 2D SWD. Thus, everything that is provided by the quantum energies can be explained through using the 'sciences'. However, nothing can exist if the quantum energies do not materialise the physical form. The development of the fetus, during the initial stages, is based on the **holographic form that is provided by the QE Light and quantum energies** as per the 2D SWD. Then, when the soul enters the fetus (when the fetus is around 4 to 5 months old) the causal energies of the soul also participate for what the fetus has to develop into. The Law of Karma also influences the development of the body because we can also **settle for our wrongs** through our bodies. The Law of Karma is provided for by the 2D SWD and the World Dramas within God and human souls. What exists for our bodies, based on the effects of the Law of Karma, will exist in the 2D SWD and in the World Drama deep within the soul. In addition to all these, the mother's physical and subtle bodies **nurture the fetus** from the time of

conception until birth. In this way, the fetuses for all of one's incarnations on earth are created.

While explaining about the creation of the new body, I am also influenced by what has been left behind in the myths. In the myths, the *creation of human beings* was often portrayed as being through the adult form because these myths are reflecting more than the *creation process that takes place through the Holographic Universe*. They are also reflecting the creation of roles (e.g. Brahma, Vishnu, etc.) which were used during:

1. each Mid-Confluence,
2. at the end of each cycle, and
3. during each Confluence Age.

Subtle bodies may also be used, in subtle dimensions, while these roles are used on earth. The *theory of how the Holographic Body is created* was applied to how these *subtle bodies and roles* were created because: 1. The ancient history (which involved creating and using 'roles' based on subtle experiences) was being explained.

2. An explanation was being given on how adult-like subtle bodies **were created**, through the aura etc., **and used** in the Holographic Universe. The aura is explained in Chapter 13.

3. The theory, *of how the Holographic Body is created*, was explained to the people. This theory was meant to be brought to the end of the cycle, where it will be **used during the further explanations** that are given by those *whose past births are playing a role in the afterlife* (as the explanations are being given through me now).

This theory is also reflecting how:

1. Those who take their **next birth in the first half cycle** will acquire their *ability to have perfect divine holographic bodies* during each Confluence Age.
2. The new bodies for the second half cycle are created, during each Mid-Confluence.

3. Those who are *walk into the Golden Aged world* will have their Golden Aged bodies created, through the Confluence Age, at the end of each cycle. Those who *walk into the Golden Aged world* will live in the Golden Aged world. The world, which they live in, will transform into the Golden Aged world through the Confluence Age.

In the World Drama, deep within the soul, there is an impression of the subtle forms of **all the births** which the soul will be using during a cycle. Though it is just an impression, each of those subtle forms has the ability to become a living holographic subtle form (when the causal energies project it into the 3D SWD, as other causal energies enter it so as to play the role of the Conscious Self). It will seem **as if** a holographic World Drama is also occurring in the *World Drama within the soul*, as the soul is moving along its path in the *World Drama within the soul*.

Each of the subtle forms (of each birth in the *World Drama within the soul*) will be projected as a Holographic Being, into the 3D SWD, when it is time to live the relevant life. The *QE Light and quantum energies* will provide the **QE Light and quantum bodies** for the Holographic Body of this Holographic Being. The quantum bodies, provided by the quantum energies, will also exist in the material form. Therefore, the Holographic Being will also have a physical body. The causal energies, which have been projected to create the Holographic Body for this Holographic Being, are actually in the physical body of the Holographic Being. The QE Light and quantum bodies that are created by the *QE Light and quantum energies* are based on the: 1. impressions that exist in the 2D SWD, and 2. Holographic Body that has been projected by the causal energies of the soul.

After the physical form begins to exist, as per the World Drama, the causal energies of the soul (which had been used to initiate the creation process for the Holographic Being) are pulled back into the soul. However, the Causal Self keeps projecting the causal light of the soul into the body, so as to bring about changes which have to take place, as per the World Drama. The causal light is projected into the physical body because the holographic body overlaps the physical body, exactly. Generally, the Holographic Being will just consist of the subtle bodies which are provided by

the quantum energies. The Causal Self only begins the creation process and then makes sure that the body keeps changing, as per the World Drama, in a temporary manner.

During the second half cycle, even the vices get projected into the Holographic Body (if the vices are in an emerged state). The vices are in an emerged state when they are used by the person. While in an emerged state, the vices act in an adverse manner on the Holographic Body. This badly affects the corporeal body, as a result the human being suffers from diseases. The vices are not in an emerged state, if the person does not use them. Despite this, people can still *suffer through the body* due to the effects of the Law of Karma.

The Holographic Bodies are used during human incarnations. It will be as if the soul (as the Causal Self) is the god who incarnates into a body, during the re-incarnation process. This has also been reflected in the Hindu myths **through gods incarnating** as various avatars on earth. In each avatar, the soul plays his part in the World Drama on earth **as the Conscious Self**.

In the World Drama deep within the human souls, each life (which the soul takes in a cycle) is in a different section. These ‘lives’ are arranged one after the other **as if it is a movie about the incarnations** that are taken by the soul. In each of these ‘lives’, there is a different subtle body which the soul uses while taking an incarnation. Each subtle body is given life when the causal energies of the soul enter it to play the role of the Conscious Self. In the ancient Egyptian spiritual teachings, the **subtle body which is given life** has been referred to as the ‘Ka’. The Ka is the **Conscious Self** using:

1. the Holographic Body, and
2. the subtle body which is in the World Drama deep within the soul.

The minute the subtle Ka body (in the World Drama deep within the soul) is given life, it will become the Holographic Being in the Holographic Universe. The Ka is not just the Conscious Self. The Ka is the Holographic Being which includes the Conscious Self. It is the soul which plays the role as the Conscious Self. So the Ka refers to the ‘soul as the Holographic Being’.

As the soul plays its role in the World Drama deep within the soul, the soul is also playing its role in the 2D SWD. Thus, the Ka is

playing its role in the 2D SWD, 3D SWD (as the Holographic Being) and in the World Drama deep within the soul.

When it is time for the Ka to take birth, some of the causal energies of the soul enter the subtle Ka body in the World Drama deep within the soul. At the same time, the soul's causal energies will transform the impression of the subtle Ka body (in the *World Drama within the soul*) into a living subtle Ka body since the causal energies have magical abilities. Through this, the Ka begins to live during its incarnation. What it does is exactly like what is happening in the World Drama deep within the soul. The **Ka's subtle body of light** gets projected into the 3D SWD, for the creation of the Holographic Body. So the quantum energies provide it with quantum bodies. When the quantum energies provide it with bodies, the soul will have a material body on earth that looks like the Ka.

The causal energies of the soul are divided up to perform various tasks. Only some of the causal energies are used to give life to the Ka. There are a lot of causal energies, in the Subconscious Self, which are not involved with playing the role of the Conscious Self. Normally, the causal energies which become the Conscious Self are not referred to as causal energies. It is **only the causal energies in the Subconscious Self** which are referred to as the causal energies or as the Causal Self. Even though some of the **causal energies** play the role of the Conscious Self, in the second half cycle, the Conscious Self is the mortal self and not a Causal Self.

The causal energies in the Subconscious Self, are also divided up to perform various tasks. Some of the causal energies have the impression of the World Drama which is deep within the soul. Some of the soul's causal energies are entangled with this World Drama, deep within the soul. Other causal energies are closer to this World Drama, than the Conscious Self, because they are in the Subconscious Self.

At the end of the life, the causal energies should **leave the Ka** when the soul stops using the Ka of that life. This would bring about 'the end' to the use of the subtle Ka body, in the World Drama deep within the soul. It will be as if the Ka has been laid to rest in its section of the World Drama. In the World Drama deep within the soul, there will be nothing of what happens to the corpse (after the soul leaves his corporeal body). When the soul has stopped using its subtle Ka body of one life, the Ka would be laid to rest at that point in the World Drama;

and the soul uses the subtle Ka body of the next life which lies on his path, in the World Drama. The soul uses the new subtle Ka body to live a new life, on earth. In this way, the soul keeps incarnating to play his role on earth. In the World Drama deep within the soul, it will seem as if the soul continues to walk along one straight path; leaving an old *subtle Ka body* to use a new one.

Since the soul's causal energies are entangled with the 2D SWD, the World Drama that is deep within the soul is also **part of** the 2D SWD (in the Holographic Universe). Thus, as each soul walks along its path in the World Drama deep within the soul, it will be as if the soul is walking along his path in the Web-like 2D SWD (in the Holographic Universe). The paths taken, by all human souls, are on this Web-like 2D SWD. All their paths crisscross each other, to give the 2D SWD a web-like nature.

Chapter 6: Subtle Life Dramas

The Subtle Life Dramas (hereafter referred to as ‘SLDs’ or ‘SLD’) are in the 3D SWD. The holographic forms of everything exist in the SLDs. All the human souls, who are in the Corporeal World, are living in these SLDs as they are living their lives on earth. Each SLD involves:

1. a person (if that person is alone in a place), or 2. many people (if many people have gathered at a place).

There are numerous SLDs in the 3D SWD since everyone, on earth, are **not in the same place** at the same time. Therefore, sometimes, a SLD can involve only one soul/person. Many souls participate in a SLD when their paths cross in the 2D SWD.

Everything that is in the 2D SWD is **entangled with** what is being created in the SLDs. Each of the SLDs is a 3D hologram that has been projected based on what exists in the 2D SWD. Each soul is playing a role in a Hologram (SLD), in the 3D SWD. A hologram is an image that is created by using light.

The SLDs are projected as numerous ‘dramas’ on earth, as per the 2D SWD. Each drama is in a **place** which is a **stage on earth**; everything that is happening in a **place** is a Life Drama on earth. All our Life Dramas are **part of the World Drama** that is taking place, on earth. Similarly, all the numerous SLDs are part of the 3D SWD, in the Holographic Universe. The SLDs are everywhere in the 3D SWD; **exactly like how** the Life Dramas are all over the place on earth. Whatever is happening in the SLDs are also happening on earth, as Life Dramas on earth, however, we will be using material bodies while we play our roles on earth.

The human souls are using their holographic bodies while participating in the SLDs. The holographic bodies look exactly like the human bodies which we use. As we grow up, on earth, our holographic body is also growing up in the SLD.

Some of the quantum energies act like glue that sticks all the

SLDs together to become the 3D SWD. So we are not isolated from the others, even in the material world (Real World), as we live on earth. Just as the SLDs are glued together by quantum energies, even mass (in the Real World) is glued together by relevant quantum energies. As it is above, so is it below. However, the holographic world overlaps the Real World. It is not above the Real World; it is in another parallel dimension since the Real World and the Quantum World are in different dimensions (though both are part of the Corporeal World).

The SLDs, SWD, 2D SWD, 3D SWD, Nature's 2D World, World Drama which is taking place on earth, *World Dramas within God and all human souls* are all part of the concept called 'World Drama'. They can all be referred to as the World Drama. They are different aspects of the World Drama. I am using different names to refer to them so that the reader is aware of which 'World Drama' I am referring to.

Chapter 7: Manusmriti 1.5 - A description of the Dark Quantum Energies in the Dark Quantum World

In Chapter 1, Clause 5 of the ancient Hindu text called Manusmriti (Laws of Manu) [1], it has been portrayed that the quantum energies are in the dark state when they are not involved with creation. This clause states:

“This (universe) existed in the shape of Darkness, unperceived, destitute of distinctive marks, unattainable by reasoning, unknowable, wholly immersed, as it were, in deep sleep.”

The words in the above quote reflect the **state of the quantum energies** before they are involved with materializing something as per the 2D SWD.

The word “unperceived” reflects that the quantum energies cannot be perceived in a similar manner to how we perceive the material forms, through the use of the 5 senses etc. The words “destitute of distinctive marks” is a reference to the original state of the **quantum energies when they do not have any information (hereafter referred to as the ‘No-info QE’)**.

The Real World is a world which can be understood through making measurements, observations etc. Everything, in the Real World, has a quantum form. The Real World is created through the quantum energies encoding information. Quantum Physicists say that the quantum energies, of everything in the Real World, have information. So their material forms look like what they do. It is the information in the quantum energies, which enables something to have a material form. The quantum energies **encode, decode and recode information** so as to materialize everything that exists in the Real World. However, in the original state, the quantum energies do not have any information. This has been portrayed through the words “destitute of distinctive marks”.

The words “unattainable by reasoning” portray that the quantum energies cannot be ‘attained’ through reasoning. The words “unattainable by reasoning” and “unknowable” also reflect that it is not possible to understand the quantum

energies; like how we can understand the Real World through the sciences, mathematics and the 5 senses. The words “wholly immersed, as it were, in deep sleep” refer to the state of the quantum energies **when it is not involved with creating something** for the Real World.

The words “shape of Darkness” reflect the dark state of the quantum energies, in the Depths of the Quantum World. The words “This (universe) existed in the shape of Darkness” portray the dark state of the quantum energies (No-info QE), before the energies got involved with providing something in the Real World during the creation process. **In subtle experiences and in the Near Death Experiences**, one can experience the dark nature of the No-info QE and its quantum dimensions:

1. when the energies of the soul move through a black tunnel, and/or
2. when the consciousness of the soul is in a dark quantum dimension.

A discussion on the dark nature of the quantum environment, during these *subtle experiences and Near Death Experiences*, can be found in Chapter 15 of this book.

Chapter 8: Quantum Energies Light (QE Light) and Photons

The quantum energies have ‘light’ energies instead of having a soul. I refer to these light energies as the Quantum Energies Light (hereafter referred to as ‘QE Light’). There are many kinds of quantum energies. The various forms of QE Light are also some of these.

The *light in the Real World* consists of photons. QE Light is not the photons, however, QE Light is closely connected to the photons because the photons are part of the other face of QE Light. Since light consists of photons, it is also part of the other face (a non-living aspect) of QE Light.

Light has the properties of being waves and particles. The *particle of light* is called ‘photon’. There are two types of photons: virtual photons and real photons. Virtual photons are different from the real photons.

Some prefer to see the virtual photons as **short-lived**

particles which are **not real particles**, while others prefer to see the virtual photons as **short-lived disturbances** in the quantum field. The quantum field is ‘space with waves in it’.

There are various kinds of virtual photons; each performing a different task. Some virtual photons are closer to the Quantum World than to the Real World. Some virtual photons are being emitted, from the Quantum World, for creating something in the 3D SWD. Other virtual photons are closer to the Real World.

They are more like real photons than virtual photons. Some are almost real photons. Some virtual photons are in the atoms of mass.

These are performing a different kind of task for mass.

Virtual photons consist of quantum

energies; the virtual photons, which are closely connected to the Quantum World, fluctuate in and out of existence from the quantum vacuum. There are quantum energies in vacuum. Thus, ‘vacuum’ is referred to as the quantum vacuum.

Some of the virtual

photons, which have been emitted from the Quantum World, go back into the Quantum World. These virtual photons are in a state where they are **ready to be used for creating something** in the Real World, but they have not been released for creating something, as yet; they are just **in the state** where they are ready to be used. Thus, they are in a wave-particle interchangeable state. From the wave form, particles can be created, but some of these do not become actual particles.

Thus, they drop back into the quantum wave field. When it is time for them to provide something in the Real World, they do not go back into the quantum vacuum. They transform to become real photons, and so, become part of the Real World.

The real photon and its waves are

measurable, so the real photon is in the Real World. The virtual photon and its quantum field are not measurable, hence the virtual photon is not ‘real’. Therefore, the virtual photons are not in the Real World; they are in the Quantum World.

Real photons are in

sunlight and in all other visible light. In physics and the quantum theories, the word ‘real’ has been used in more than one way. Where visible light is concerned, **real** photons are those which we can observe.

Real photons have a long lifespan. They are not quantum energies. They exist in our world as energies and light. Light consists of a stream of real photons, travelling in waves. When there are more photons, the light is brighter and there is more heat. When there are less photons, the light is dim.

The universe is filled with photons. Photons come into our environment from the sun, the stars, etc. These photons (as radio waves, infrared, sunlight,

ultraviolet, X-rays, microwave, gamma rays, etc.) are all referred to as electromagnetic radiation. Electromagnetic radiation is a stream of photons. It is 'energy' which travels as electromagnetic waves. A photon is a **quantum** of electromagnetic energy. A 'quantum' is the smallest quantity of energy which is considered as a unit. The different kinds of electromagnetic radiation do different things, for example, sunlight makes everything visible.

Sunlight and all other visible light are white in color, however, this white light can be separated to become the *seven coloured lights* which have waves of different frequencies.

Gamma rays, X-rays,

ultraviolet, infrared, microwave and radio waves are also electromagnetic radiation which consist of real photons. Their photons have waves of different frequencies. Real photons have different wavelengths based on the different amounts of energies which they have. The photons which have shorter wavelengths have greater energy. The photon of the radio wave differs from the photon of the gamma ray because the *photon in the radio wave* has a low energy level whereas the *photon in the gamma ray* has a high energy level. The electromagnetic radiation is more dangerous, when the photon has a high energy level.

Everything in the universe has

electromagnetic energies which are vibrating at different frequencies. This is the other face of the QE Light. Both, the QE

Light and the photons (light), are vital forces in the Holographic Universe.

The virtual photons are part of the

Holographic Universe. The real photons can be considered as being part of both (the Holographic World and the Real World); or the real photons can be seen as being part of the Real World only.

Although virtual photons and real photons are different, they are

connected and this is why virtual photons can become real photons.

In some myths, the female is portrayed as being created from the male. This is, sometimes, a reflection of how ‘real photons are created from virtual photons’; the real photons have been portrayed as the female and the virtual photons have been portrayed as the male.

In the Hindu myths,

Ardhanarishvara is a combined form of Parvati and Shanker/Shiva.

Parvati also represents the real aspect of the corporeal world.

Thus, Parvati also represents the real photons. The real photons are the non-living aspect of the *light energies*. This is one reason why Parvati is also called Uma. In Sanskrit, Uma means ‘light’. The photons exist in the Real World where the earth is the world stage. The photons are also quantum energies which provide the Real World where the earth exists. These are also reasons why Parvati was associated to the earth. Shanker represents the virtual photons and the QE Light energies. The QE Light energies, virtual photons and real photons can all be categorized as ‘one’. Thus, Ardhanarishvara represents how the QE Light and the photons are ‘one’.

Ardhanarishvara also represents the combined form of God (Shiva) with the Confluence Aged souls (Parvati) for world transformation. This world transformation takes place through the Holographic Universe, at the end of each Cycle of Time.

The QE Light is the **spiritual aspect** of *light energies*. The QE Light also provides subtle bodies etc. The virtual photons are the non-living aspect of *light energies* which exist **in the Quantum World**. These are also reasons why Shiva has been associated to the spiritual, the subtle and the quantum energies. Shiva has also been portrayed in this way because He represents God (the Supreme Soul) who plays His role in a subtle spiritual manner in the Confluence Age, at the end of each Cycle of Time; the *QE Light and quantum energies* serve Him.

Everything in our world has either a virtual photon form or a QE Light form. The material forms exist based on these virtual photon forms or QE Light forms. This is also a reason why

‘creation’ has often been portrayed as beginning with the ‘male’.

Nature, in the Holographic Universe, has a light form consisting of QE Light and/or photons. The QE Light does not exist in the Real World. Only photons exist in the Real World.

Mass does not have a QE

Light form. Mass is made up of particles. These particles have virtual photons. These virtual photons are part of the *light form* of Mass.

There are different levels of virtual photons. Mass has virtual photons which are closely linked to the material world. These do not have a QE Light form. Human bodies, animal bodies, plants and all other living things have a QE Light form. Even the quantum energies which are involved with *creating what needs to exist in the Real World* have a QE Light form. Thus, the quantum energies, which are just being released from the Quantum World, have a QE Light form. These exist everywhere in the space above us. I am saying all these based on my experiences.

From around 1996, I began seeing the spiritual form of plants and quantum energies (which were involved with ‘creation’). However, I could not experience any spiritual form in all that which is non-living ‘mass’. Though the *light energy*, in plants and quantum energies, had looked ‘**spiritual**’ the *light energy* (in plants and quantum energies) had also looked **non-living** in some of my experiences. This is because there is a living and a non-living aspect to the QE Light forms of plants, animals, human beings and *quantum energies which are involved with ‘creation’*.

Different kinds of quantum energies play a role for creating what exists in our world. The QE Light plays the most significant role for the creation process because the 2D SWD

is imprinted on the QE Light.

In the QE Light, there is also Nature’s eternal 2D WD. Nature’s 2D WD exists eternally in the Holographic Universe because the QE Light exists eternally. The QE

Light enables the plants etc. to have functions which allow them to live, as per the 2D WD. The **organic nature** of plants, living things etc. is provided for by the **QE Light** system of *quantum energies*. The **inorganic nature** of matter is provided through the

*system of quantum energies involving the **virtual photon** light form.*

There are more than one kind of quantum particle body, quantum wave body and QE Light body. For

convenience, I am going to categorise all the quantum particle bodies as one, all the quantum wave forms/bodies as one and all the QE Light bodies as one.

The Holographic Body, in the 3D SWD,

consists of the causal energies of the human soul, the QE Light Body, the Quantum Wave Form and the Quantum Particle Body. The QE

Light is also projected to provide a subtle body of light, for the creation of the Holographic Being, in the 3D SWD. The QE Light Body looks exactly like the corporeal body. The QE Light Body is closely entangled with the Quantum Particle Body and Quantum Wave Form. One will not be able to separate the QE Light Body from the other quantum forms. They act together as ‘One’ because all quantum energies act as ‘One’.

In the visions which I had seen, it had seemed as if the *energies of the QE Light* are a little similar to the energies of the soul. However, there are differences. For example, souls can experience the vices, in the second half cycle, whereas the QE Light energies do not seem capable of experiencing the vices. Nature can act in a violent manner in the Real World, but this is not an expression of their anger, it is just a reflection that humans are capable of using the vices. Nature is dependent on the spiritual state of human souls. Thus, when humans are capable of experiencing anger, nature is capable of behaving in a violent manner in the Real World.

Souls consist of living spiritual metaphysical light. Spiritual energies are ‘living’ energies, like our consciousness. However, the spiritual-like QE

Light energies, of plants and quantum energies, are not like the energies of the soul because QE Light **also**

has a non-living aspect to it. The energies of souls have no non-living aspect to them. Therefore, the energies of QE Light are different from the metaphysical energies of souls. QE Light is not metaphysical because of its non-living aspect.

QE Light is **part and parcel of the Corporeal World** whereas souls are **‘in’** the Corporeal World. Souls exist within humans and animals whereas QE Light is not within any body. QE Light helps to materialise the bodies. They are part and parcel of the physical bodies.

QE Light does not care for us. We care for it, though we are not aware of this. This is also a reason why human souls, in the Corporeal World, are connected to *nature and everything else in the Corporeal World* through the aura, various parts of the brain and the body (via the wave-particle aspect).

There has to be this ‘oneness’ in the universe because:

1. Nature is dependent on us.
2. We have to interact in this Corporeal World.
3. The quantum energies are involved with materialising the Real World for us; and they have to play a role **with us** for what has to exist in the Corporeal World.

The QE Light energies are not from a ‘point’ though all quantum energies behave like they are from a point source. According to the knowledge of the Brahma Kumaris, the soul is a **point** of white living light. It is impossible to see a point. Therefore, normally, people just see ‘light’ (when they see the soul in visions) or one might see the soul as an *enlarged point of light* in visions. However, it is possible to have a spiritual understanding that the soul is a point.

The QE Light which has no information (hereafter referred to as ‘No-info QE Light’) is in the SWL. In its original state, QE Light has no information

(*No-info QE Light*). When some of the QE Light get involved with the *creation process* for materialising something in the Corporeal World, they become *QE Light which has Information* (QE Light with Info). The QE Light subtle forms are created through QE Light with Info.

All other kinds of quantum energies exist in the Quantum World. All the *No-info QE* are in the Depths of the Quantum World. The Depths of the Quantum World is dark because the virtual photons and the QE Light are not in the Depths of the

Quantum World. QE Light exists everywhere in the SWL because they are the *spiritual light* of the quantum energies.

The 2D SWD is entangled into the 2D WD. So the No-info QE will transform to become *QE with Info* (quantum energies with information) based on what exists in the 2D SWD. The QE with Info provide the Real World, as quantum particles pop into existence.

The QE Light is used to create the numerous holograms (SLDs) in the 3D SWD. The No-info QE Light transforms to provide information in the 2D SWD and in the holographic 3D

SWD.

When something ‘living’ needs to be

materialised in the Corporeal World, some of the No-info QE Light (from the SWL) and some of the No-info QE (from the Quantum World) come into the 3D SWD as they encode information which materialises the corporeal form. They encode information based on what exists in the 2D SWD. Information exists in the material form based on the information that exists in the quantum form.

There is ‘oneness’ in the universe because all the quantum energies are entangled with each other. So whatever is in the QE Light, within the 2D SWD, will be reflected through what exists in the Real World. It is as if all the various kinds of quantum energies work together as ‘one’ (like the source itself) so as to materialise what exists in the 2D SWD. The QE Light is needed to begin the creation process.

When a human soul comes from the Soul World into the Corporeal World, some of the causal energies of the soul get entangled into the impression of the 2D

SWD which is in the QE Light. Hence the *World Drama which is deep within the soul* becomes part of the 2D SWD, in the QE Light. The quantum energies cannot

come into the soul. It is only the soul's energies which can get entangled into the impressions of the 2D SWD, in the Holographic Universe. The energies of the soul will not be able to blend with the quantum waves or photons or with any of the other quantum particles. The soul's energies can only blend in with the QE Light. However, since all the quantum energies are entangled with each other and act as 'one' force, it is as if the soul's energies are entangled with all the quantum energies.

Generally, the Holographic Being will just consist of the QE Light body, the quantum wave form and the subtle quantum particle body. The **causal energies of the soul** are only involved with **creating** and then **bringing about changes** in the material body, in a temporary or detached manner, as per the World Drama. However, in the second half cycle, it is as if the causal energies of the soul become part of the Holographic Body (in a permanent manner) because of the:

1. soul's attachment to the body, and
2. weak state of the energies of the soul.

So when some energies are sent to create something, or bring about changes, in the material body **they are usually not pulled back into the soul**. They stay there, attached to the physical body, as they continue bringing about changes in the physical body. The causal energies of the soul, which remain dispersed in the body, merge with the quantum bodies. The photons and all other quantum energies are not as closely connected, with the energies of the human souls, as the QE Light. The causal energies of the human soul can only blend in with the QE Light.

Thus, it is as if the causal energies of the soul have gone into a combined state with the QE Light body, in the Holographic Body.

The quantum bodies cannot be separated from the physical body because of the wave-particle duality, consequently, one cannot separate the QE Light body from the physical body because all quantum energies act as 'one'.

Therefore, the combined state (of the soul's causal energies and the QE Light body) influences one to feel that one is the physical body. It can also influence one to have a subtle experience that one was the quantum energies that are dispersed everywhere in the universe because there are no divisions within the quantum energies. This experience is only an illusion (Maya). The truth is that one is the soul which is in the body, during a lifetime, i.e.

the embodied soul (jivatma). The embodied soul is **connected to the whole world** through his aura, body and various parts of the brain. This also influences one to feel that

one is 'one' with the world which we are all living in. For the sake of world benefit, this feeling is alright. However, one is the soul. If one can maintain one's identity as a soul, while involved with world benefit, it would be better because there would be less confusion. Confusion is detrimental to those who want to experience the truth.

When the darkness or black quantum energies (no-info QE) gets involved with creation, there will also have to be 'light' (QE Light and virtual photons) involved with that creation process. This has also been reflected in the myths.

Creation takes place at the border between the Quantum World and the SWL. Some of the QE Light comes from the SWL into this border, for the creation process. Some of these QE

Light become virtual photons, while others become QE Light forms.

At this border between the Quantum World and SWL, the real photons are also closely connected to the virtual photons.

The other kinds of quantum energies do not go into the SWL, from the Quantum World. Only the QE Light comes into the Border of the Quantum World and this brings 'light' into this area.

The no-info QE comes from the Depths of the Quantum World to become the non-light quantum energies. Since they are not 'light', they are dark when they are in the no-information state. However, in the border between the Quantum World and SWL, some of them are closely entangled with the 'light'. So it is as if they become lighted up in the Border of the Quantum World.

The QE Light and other quantum energies, in the border, are like an *ocean of quantum energies*. This 'ocean of quantum energies' has also been represented, in the Hindu myths, as the 'primordial ocean'. Modern day quantum physicists refer to it as the 'Unified Field'.

It is very difficult to draw lines as borders for the Quantum World, Real World and SWL because they overlap. Even though the Quantum World, Real World and SWL are involved with the same space, they are in different dimensions. For example, we live in the dimension of the Real World, however, if we travel at the speed of light or if we are exposed to relevant electromagnetic waves, we move into one of the quantum dimensions, though we are still using the same space.

Space, or vacuum, is filled with quantum energies. Quantum physicists refer to these quantum energies as ‘vacuum energy’. Vacuum energy is said to be the underlying background energy which exists in the space of the whole universe.

Quantum physicists are of the view that virtual particles may also exist in vacuum energy. They are of the view that these virtual particles are particle pairs which come into existence and then annihilate within a very short time span. So it is not possible to observe them. They are of the view that this may be happening everywhere in the Universe.

Quantum energies, in the border between the Quantum World and SWL, have particle/anti-particle forms which come into existence and then annihilate each other. This happens because they are ready for creating something for the Real World, based on what exists in the 2D SWD.

In my experiences, between 1996 and 2001, I saw particles popping into existence (as bubbles) even though I did not see them annihilate each other. They were coming from a spot where there were a few bubbles bubbling out, but only one bubble came into the quantum dimension which I was in. All the other bubbles, which were around this bubble, disappeared and did not come into the quantum dimension which I was in. Maybe, they were being annihilated. This may also be the reason why I saw them disappearing. Maybe, I could not see them annihilate each other because I was not in the quantum dimension where that was taking place. There were bubbles emerging, in this same manner, from

many different spots in the space between me and the sky. I had many of these experiences, from 1996 to 2001. I must have been in a quantum dimension where ‘creation’ was taking place. At that time, I did not understand that I was in a quantum dimension. So I could not understand what was happening, in those experiences. I only understood them recently, when I was reading about how a particle emerges from a *pair that came into existence*, while other pairs annihilate each other. It could be that I was in the quantum dimension where the particles were being released into. The quantum dimension which I was in **looked like our**

world, except that I could experience the spiritual aspect of the quantum energies in that dimension. They were happy to see me. It is possible that each of those bubbles was a **‘wave packet’ of a particle** that was coming into existence and then merging into the Unified Field. The space, of the quantum dimensions which are involved with materialising the Real World, consists of the Unified Field because there are so many different kinds of fields within it. Though I have formed the view that each bubble must have been a *‘wave packet’ of a*

particle, I did not see any waves in the bubble. Maybe the waves were in another quantum dimension. Or perhaps, the waves were not noticeable for some other reason. The bubbles were transparent, like soap bubbles. After the bubbles had emerged, they merged into space and I could no longer see the bubbles, however, I knew that they were still there in the space above me because I could still feel their spiritual-like presence in that space above me.

In some of my experiences, I had seen sparks appearing suddenly in many places in the sky region. I had not seen the bubbles or the spiritual aspect of the quantum energies, in the experiences where I saw the sparks. So I may have been in a different quantum dimension when I was seeing the sparks. I may have been in a quantum dimension where the non-living QE Light energies play a significant role because the energies of the human soul are entangled with the living and the non-living aspects of the QE Light. It may be possible that these sparks were the ‘annihilation of the particle pairs’, even though I did not see *particle pairs annihilating each other*. I know that the experiences, where I saw sparks and bubbles, were in quantum dimensions because I had these experiences while I was moving into various kinds of quantum dimensions.

The quantum energies are everywhere in the universe. The universe can be divided into the visible and invisible universe. The visible universe involves all that space which is used in the Real World. This **visible universe is part of the**

stage which we are provided with, to live our lives. So it is as if everything, in this visible universe, **revolves around us** though the sun, moon, stars etc. are not actually revolving around us. The invisible universe involves all that which we do not see as part of our world stage. The invisible universe is the Holographic Universe. The QE Light which has the imprints of the 2D

SWD provides a holographic edge just above the visible universe, though it is also **as if** the 2D SWD is everywhere in the Holographic Universe because the 2D SWD is imprinted on QE Light energies which act as ‘one’ with all the QE

Light and quantum energies in the universe.

I prefer to use the words ‘**Quantum God**’

while referring to the ***quantum energies***’

creative abilities. The QE Light plays a significant role in the concept of the Quantum God. The black quantum energies play a significant role with the QE Light, as the Quantum God, since they play a role together as a ‘creative force’

for the existence of the Real World.

The impression of the 2D

SWD was, originally, from the World Drama that exists within God.

During the Mid-Confluence, the Quantum God materialises the ordinary world as per the 2D SWD. It is God who creates the *new world* which begins to exist at the beginning of each Cycle of Time. The Quantum God serves God by materialising the new ‘creation’ for the new cycle.

For these reasons, the Quantum God was often reflected as part of the ‘God’ concept, in the ancient Hindu texts.

Chapter 9: The Real World and the Holographic World

The Holographic World is the 3D SWD which is in the Holographic Universe. Looking at it from another angle, it can be said that the Holographic Universe itself is our

Holographic World.

All human souls (on earth) have a real form in the Real World and a holographic form in the 3D SWD of the Holographic Universe. So all human beings are living in the Real World and in the Holographic World, though people may not be aware that they are also living in a Holographic World.

The energies of the soul are not ‘real’,

they are metaphysical; they are invisible light energies.

Therefore, the soul can be said to be part of the Holographic World and not part of the Real World.

The Holographic World is a

Hologram. This Hologram (3D SWD) which we are all living in, is made up of light and quantum energies. It is as if we are **part** of this Hologram

which is made up of light and quantum energies. Furthermore, it is as if we are **living in** this Hologram. We do not, however, experience ourselves as *living in this Hologram*; we experience ourselves as *living in the Real World* because of our ‘mortal state’.

Though the Holographic World and Real World can be categorised based on whether the World Drama is taking place in the 3D SWD or on earth, sometimes what is in the Real World can

be said to be part of the Holographic Universe. In accordance with the sciences, it can be concluded that some of the things in the Real World are not 'material' in nature, for example,

electromagnetic radiation is not 'material', yet it is in the 'Real World'. It can be deduced that anything which is not part of the Real World, as per the sciences, are part of the Holographic

World.

One could also classify everything that is

not 'material' into the category of the Holographic Universe since the Holographic Universe is not a material world. From this point of view, electromagnetic radiation can be classified as being part of the Holographic World. Light, or photons, is electromagnetic radiation. Quantum Physicists say that photons have no mass. This would also mean that it is not 'material'. So light can be said to part of the Holographic World.

Energies are not 'material' in nature, even though quantum energies can have a particle aspect and a real form.

The real form is in the Real World and the quantum energies are part of the Holographic World. All other energies, even if they exist in the Real World, can also be said to be part of the

Holographic World which we live in because energies are not

'material' in nature.

Chapter 10: Seeing the World

When seeing the world, the Conscious Self is of the view that he is seeing through the eyes, however, the Conscious Self is only seeing what has been brought into the brain; the Conscious Self is not really seeing what is outside the physical body in a direct manner, he is seeing it in an indirect manner. I am going to give a brief explanation on how we see using our eyes because one needs to understand a little

about **how we see the world** so as to have a better understanding of

the *holographic nature of the world* which we perceive.

Seeing the world begins with the photons coming into the eyes, as 'light'. The real photons, as sunlight or white light, hit upon everything. White light has all the 7 colours, thus, when white light hits the objects, the colour of the objects is reflected and all other colours are absorbed. The reflected light enters into the eyes, through the pupil; the pupil being the *hole in the center of the eye* through which light passes.

The light which enters the eyes projects an inverted image of what we are seeing onto the retina. The visual images which are created on the retina, by the photons, are what we see. As changes take place in what one is observing, changes also take place in the pattern of light that is projected onto the retina. In this way, the retina is used to begin the *process of seeing what is*

happening in the world.

The retina has photoreceptors (cells which detect light), at the back of the eyes. The photoreceptors are specialized brain cells (neurons) which are excited by light. The photoreceptors absorb energies from the photons, in the inverted image, and convert them into electrical signals. The optic nerve is used to bring the information about the images from the eye to the brain, through the electrical signals. The electrical signals carry the data, about what was on the retina, to the brain. In the brain, these data are interpreted to become information which is conveyed to the soul.

Everything that is

happening in the *eyes and brain of the physical body* is also happening in the eyes and brains of the quantum bodies. This is so

because:

1. the *real form* and the *quantum forms* are linked through the wave-particle duality

aspect, and

2. all the quantum energies act as ‘one’ while providing the Real World (including the physical body).

Therefore, everything that is in the

physical brain is also there in the brains of the quantum forms (including in the QE Light brain). The soul is able to see what has been brought into the brain because what is in the physical brain is also there in the QE Light brain.

The energies of the soul

can get entangled with the energies of the QE light. Thus,

the *mind of the soul* is in an entangled state with the QE Light energies in the brain. As a result, what is in the QE Light brain is also there in the mind of the soul. So the soul is able to see the world which we live in.

The QE Light energies, in

the QE Light brain, project the information in the electrical signals (which have been received and decoded) as a holographic image. This holographic image, which has been projected by the QE

Light energies, looks like what has been seen by the eyes. I refer to this section of the QE Light brain, which creates and has this holographic image, as the QE Light Mind (or as the Quantum Mind) because **what is in it is also there in the mind of the soul.**

The energies of the soul

are used for various functions. Some of the energies of the soul are also used as the mind, intellect and Memory Bank of the soul.

Everything is brought into the mind of the soul so that the soul can see, and act upon, them. The memories

are stored in the Memory Bank of the soul. The intellect brings memories from the Memory Bank and places them in the *mind of the soul* so that the soul can use the

memories. The intellect also leaves everything, which is in

the *mind of the soul*, in the Memory Bank (after the soul has seen and/or used what is in the mind).

The QE Light brain has two sections. In one section, there are the *brain activities* as they exist in the physical brain. The other section is the QE Light Mind which has the *interpretation of the brain activities in a holographic form*.

All quantum energies function like a

computer. They run similar to how computer programs run. Therefore, the data (which is brought to the QE Light brain) is projected as holographic images, automatically. The QE Light uses different coloured lights to create the holographic scenes in the QE Light Mind. Since these holographic scenes will also be in the mind of the soul, the soul is seeing a holographic form of what is

happening in the Real World.

What has been seen by the

eyes is **instantly** projected as a holographic scene in the QE Light Mind. The electrical signals, which bring the information to the brain, act so quickly that we see the worldly events immediately. The soul is not aware of all that which was happening, in the eye and brain, before the holographic scenes are presented to it. Thus, the soul feels that he is seeing through the eyes.

There is a non-living and a living aspect to the QE Light brain. The section where the brain activities exist (in the QE Light brain) is the non-living aspect. The QE Light Mind is like the living aspect. However, this living aspect is different from the living energies of the souls because the QE Light energies also have a non-living aspect which the souls do not have. Further, the QE Light energies do not act like how humans do. They act in a

computerized manner.

Just as there is a living

and a non-living aspect to the QE Light brain, there is also a living and non-living aspect to the QE Light body. The soul is entangled in the living and the non-living aspects of the QE Light brain and QE Light body. Thus, it is **as if** the energies of the soul are merged into these QE Light energies.

Since the energies of the soul are merged into the living aspect of the QE Light energies, the soul feels that he is seeing through the physical eyes. This is so because it is as if the QE Light eyes are ‘one’ with the physical eyes due to the wave-particle duality aspect. So, since the eyes of the QE

Light body is also involved with seeing the worldly events, the soul feels that he is seeing the worldly events. The soul uses the QE Light body and the brain in such a way that the Conscious Self thinks that he is seeing through the eyes.

The Holographic Universe is like a

Holographic Computer. It is programmed to make the soul feel that he is living in the Real World. The energies of the soul, quantum energies, World Drama and everything else in the Holographic Universe function in such a way that the Conscious Self feels that he is seeing through the eyes. Thus, in subtle experiences, it can seem as if we, the souls, are looking through the eyes. And in real life, it can seem as if we are seeing everything through our eyes.

The soul is seeing everything in two

worlds: the Holographic World and the Real World. It can be said that the soul is seeing everything in the Holographic Universe because whatever is seen by the soul is based on the electrical

signals that are brought into the brain for the soul to perceive, but the soul is not aware that it is seeing the world through what has been brought by the electrical signals. The soul is in the physical body and it is supposed to be using the eyes to see. So the soul feels that it is using the eyes to see instead of feeling that it is seeing the world through the electrical signals that are brought to the brain. Since the electrical signals convey what was seen in the Real World, the soul is seeing what is in the Real World.

In some of my experiences, from 1996, I saw myself as the energies of the soul, which was seeing what has been brought into the brain (as the electrical signals were bringing data into the brain). The energies of the soul are also entangled with the QE Light energies which have a duplicate of the electrical signals in the brain. So in some of these experiences, it was **as if** even the energies of the soul were circulating around the brain, as the electrical signals circulated around the brain. Then, I saw myself as the soul who was looking through the eyes. This experience may have been **trying to explain** what was happening in the earlier experiences, since I could not understand the earlier experiences. Or it may have been trying to say that the soul is also looking through the eyes, since the QE Light eyes are used to see the world.

Seeing the world involves using the QE

Light brain. The QE Light brain is not part of the Real World. It is only in the Holographic Universe. Thus, what is seen is

definitely brought into the Holographic Universe before the soul sees it. So it can be said that we see the world through the Holographic World.

The real photons can be

classified as being part of the Holographic Universe, since it is not 'material' in nature. Thus, it can be inferred that we are seeing what exists in the Holographic Universe, since what we see is what the photons (electromagnetic vibrations) bring into our eyes. If light is seen as being part of the Holographic Universe, then even the *electrical signals which are sent to the brain* can be considered as being part of the Holographic World because of the electromagnetic (non-material) nature of the electrical signals. Therefore, it can be said that the

holographic forms play a huge role in allowing us to see the world.

The images which are being seen, the *light and all the electrical signals in the brain* also have quantum forms. These quantum forms are definitely part of the Holographic Universe because the quantum energies play a significant role in the Holographic Universe. The soul is also seeing these quantum forms because the metaphysical soul is part and parcel of the Holographic Universe. The soul is also **living** in the Holographic Universe.

A hologram is a 3-dimensional image which is made through using light. Light plays a huge role in the

creation of the hologram. Similarly, light and QE Light play a crucial role for the creation of the Holographic World in the 3D

SWD. Though we are not aware of it, we are also seeing this

Holographic World, in addition to the Holographic World which we finally see, as our world, in our mind.

However, Real Photons also have a particle aspect to it. Thus, it can be said that ‘light’ is not part of the holographic world. In Quantum Mechanics, the real photons are considered to be in the Real World. So seeing the world begins with what is in the Real World.

Chapter 11: Holographic Film of the Hologram (3D SWD)

If a holographic film is cut into two

pieces, the holographic image (which is contained in it) is not cut into two. When one of these half sections is illuminated by laser light, the whole holographic image will still be seen. We will not be seeing only half the holographic image. This means every part of the holographic film has the information about the whole

holographic image and every part of the holographic film has the ability to act as the whole holographic film. Even the quantum energies function in a similar manner. All the quantum energies function, based on the information which is in the 2D SWD. All quantum energies are capable of having the information which some of the quantum energies have and all quantum energies act as ‘one’

to provide the Hologram (3D SWD) which we are living in.

The creation of the *Hologram which we are living in* begins with some quantum energies playing a role like that of a holographic film. Entangled and enmeshed to

the *imprint of the 2D SWD on the QE*

Light is a film or layer of quantum waves which also has the information (of the 2D SWD) that is in the QE

Light. This ‘layer of quantum waves’ **and** the *imprint of the 2D SWD on the QE Light* (together) are like a holographic film from which the Hologram is projected. Quantum energies flow through this ‘layer of quantum waves’ while bringing information, as per the 2D SWD, into the 3D SWD for the creation process. QE

Light energies also flow through the *imprint of the 2D SWD on the QE Light* so as to bring information, as per the 2D SWD, into the 3D

SWD for the creation process. The quantum waves are 'one' with the QE Light in the 2D SWD; it is as if the 2D SWD is the holographic film which includes the 'quantum waves'.

There is interference among the various kinds of *QE Light and quantum waves* which act as the holographic film.

This is similar to how the holographic film, of an image, has the hologram as a *light wave interference pattern*. The QE

Light and quantum energies in the 2D

SWD **having information** of the 3D SWD is **similar to** how the holographic film, of an image, has *information of the hologram* stored in the interference pattern. The 3D SWD (Hologram) which is projected from the 2D SWD is like the holographic image that is projected from the holographic film.

Even the *World Drama deep within the soul* is like a holographic film. It is as if this

holographic film combines with the 2D SWD (which is also a

holographic film) to become a complete holographic film, since the energies of the soul are entangled with the 2D SWD. The energies of the soul, which act as the light to project the Ka from the *World Drama deep within the*

soul, are causal energies. Therefore, they have magical abilities to act like a 'laser light which projects the hologram'.

Chapter 12: Manusmriti 1.7 - Creation of Holographic Beings

In the Manusmriti, Chapter 1, Clause 7, it has been stated:

“He who can be perceived by the internal organ (alone), who is subtle, indiscernible, and eternal, who contains all created beings and is inconceivable, shone forth of his own (will).”

Even though it is as if the Quantum God is being referred to in the above quote, the roles of God and the human souls are also included because the Quantum God plays a role with God and the human souls for the creation process. Therefore, the word “He” in the above quote refers to:

1. God and the World Drama within God.
2. The human souls and the World Dramas within the human souls.
3. The Quantum God which has the 2D WD, the impressions of the 2D SWD and the subtle forms in the SWD.

The words “shone forth” refers to:

1. The subtle and holographic bodies being “shone forth” as per the World Drama. The energies of the human souls and the Quantum God are projected for the creation of these.
2. God coming into the Corporeal World, at the end of the cycle, and His energies being used, **as per the World Drama**, for the **creation of the divine world and the divine people** of the first half cycle. The *QE Light and quantum energies* serve Him by creating the relevant angelic bodies etc. as per the World Drama.

During the second half cycle, God gives visions as per the World Drama that is within God. The QE Light provides the subtle bodies for these visions **based on**

what God is giving in the visions. Therefore, these subtle bodies are created based on what exists in the World Drama that is within God. The *energies of the soul* use these subtle bodies, which have been created, to act as **subtle beings**; the soul experiences itself as the subtle being, as per the World Drama. Therefore, it can be said that God gives visions which have subtle beings “shone forth” in the Holographic Universe. The Quantum God provides the environment in the Holographic Universe. So the subtle beings, who have been created, are in the Quantum God.

At the beginning of the Confluence Age, God creates the Angelic Bodies as per the World Drama that is within God. These are created, beyond the Corporeal World, to bring in the new divine Holographic Universe of the first half cycle. The divine QE Light serve God in this creation process, as per the World Drama. The deity souls use these Angelic Bodies when they receive the BK knowledge. God’s energies, the divine QE Light energies and the divine causal energies of Confluence Aged souls are all “shone forth” for this creation process. The creation of these angelic beings is not the same as the creation process in the second half cycle. This will be understood further through reading the later chapters in this book.

As the human soul comes into the Corporeal World, from the Soul World, some of the causal energies of the soul (which have the World Drama) are entangled with the 2D SWD. It will be as if these causal energies combine the *World Drama within the soul* into the 2D SWD. From there, the causal energies of the soul “shone forth” the subtle light form of the Ka (from the World Drama deep within the soul) to become the subtle Holographic Being in the SLD. At the same time, the *QE Light and quantum energies* also “shone forth” the Holographic Body for this Holographic Being. Thus, the physical body is also used on earth (as per the 2D SWD).

The *QE Light and quantum energies* create the quantum wave form, the quantum particle body and the QE Light body. These exist in the Holographic Universe which consists of the energies of the Quantum God. Therefore, they are within the Quantum God. As the Quantum God “shone forth” the QE Light body, the other *QE Light and quantum energies* will also create the Holographic Body for the Holographic Being. In this way, the *Holographic Being with its Holographic*

Body is created as everything else also gets created in the universe. Everything, in Nature, gets created based on the combined state of 'Nature's 2D WD and 2D SWD'.

The words “internal organ”, in the above quote, is a reference to:

1. God's Causal Energies.
2. The causal energies of the human souls.
3. The *QE Light and quantum energies* which are involved with creating what exists in the SWD.
4. The Quantum God's ability to exist as the subtle wave form and the material form. The Quantum God uses this ability based on what is perceived (from the impression of the 2D SWD in the *QE Light and quantum energies*).

The words “He who can be perceived by the internal organ (alone)” also reflects:

1. How God's Causal Energies can perceive the World Drama that is within God.
2. How the causal energies, of the human soul, can perceive the World Drama that is deep within the soul.
3. How the *QE Light and quantum energies* can perceive the information in the 2D SWD which has been left as an impression in the energies of the Quantum God.

The words “who contains all created beings and is inconceivable” reflects:

1. How the World Drama has a form of all the beings who exist on earth. The World Drama includes the SWD in the Holographic Universe, the World Drama within God, and the World Dramas within all human souls. God, the human souls, the Quantum God and what is in the SWD are “inconceivable” because we are not able to have a

properly imagined idea as to what they are like. We will not be able to fully grasp what exists in the SWD and in the *World Dramas that are within God and human souls*.

2. How the *QE Light and quantum energies* have light forms and a wave forms in the SWD (for all the beings who exist on earth). These subtle forms are in the Holographic Universe. We are not able to imagine what the subtle wave form looks like because quantum waves have no specific form. It is everywhere.

God's energies, the energies of the human souls, *QE Light and quantum energies* are all "subtile, indiscernible, and eternal" as portrayed in the above quote. The word "who contains all created beings and is inconceivable, shone forth of his own (will)" reflects:

1. How the causal energies of the soul "shone forth" the Ka into the SLD, as the Holographic Being. The World Drama, which is in the Subconscious Self, has all the subtle Ka bodies of all the births which it will be taking during a cycle. All these will be "shone forth", as Holographic Beings, when it is time to use the relevant births.

2. How the *QE Light and quantum energies*, automatically, "shone forth" the Holographic Body into where the Holographic Being (which has been created by the causal energies of the soul) exists. The *QE Light and quantum energies* do this as per what exists in the 2D SWD. As the Holographic Body is "shone forth", even the physical form is used on earth.

3. How God, as a Point of Light, comes into the Corporeal World and gets involved with the new Golden Aged creation (at the end of each cycle) through **shining forth** his light as per the World Drama.

4. How the 2D SWD, of the new Holographic Universe, is brought into existence (for the new cycle) through God's energies **shining forth to leave** impressions *from the World Drama within God* **and to assist** impressions to be left from the World Dramas of all human souls, before God takes all souls back to the Soul World. This new 2D

SWD will have the impressions of the subtle Ka bodies, which will be used to create the Holographic Bodies, for the people of the new cycle.

The words “shone forth” reflect that the creation process is involved. The words “of his own (will)” reflect that God, the *energies of the souls* and the Quantum God **automatically** get involved with the creation process, when it is time to do so. There is no higher authority instructing them to get involved. When the Holographic Being is “shone forth” into the SLD, the area (in the 2D SWD) from which it is “shone forth” becomes lighted up.

The World Drama that is within God (the Supreme Soul) is left in the energies of the Quantum God to become the 2D SWD. Thus, it is as if God begins the creation of the Holographic Bodies. Since these impressions are in the *QE Light and quantum energies*, the 2D SWD is in the Quantum God. What is in the 2D SWD will be “shone forth” into the 3D SWD. Thus, the Quantum God has the forms of all beings:

1. in the 2D SWD, and
2. in the 3D SWD.

Since God, the Quantum God, the human souls and the SWD are involved with ‘creation’, often all these have been portrayed as the concept called ‘God’ in the Hindu scriptures. The SWD provides for time, since the 3D SWD flows along the 2D SWD. Therefore, even ‘Time’ has been associated with the concept called ‘God’ in the Hindu scriptures. The Hindu scriptures were using ‘God’ like a concept because the Mid-Confluence Aged gods/people were involved with the sciences. The scientists of present times are not supposed to bring ‘God’ into the picture while trying to explain Quantum Mechanics. However, the Mid-Confluence Aged scientists were not restricted in this way. Thus, God was brought into their explanations and ‘God’ has been portrayed in the Hindu scriptures as a ‘concept’ because explanations were also being given about the quantum theories. One has to identify **what is being referred to** when the word God/Bhagavan or something similar has been used. One cannot blindly think that God (the Supreme Soul) is being referred to. The Quantum God is not God (the Supreme Soul); the Quantum God serves God.

Chapter 13: Aura, Chakras and Vortices

Some of the *No-info QE Light energies* transform to become *QE Light with Info* so as to provide the *QE Light bodies* from which the aura vibrates out. Each person has a few *QE Light bodies* from which the aura, initially, vibrates out from. Each of these *QE Light bodies* provide one auric body/field in the aura. As a *QE Light body* is created, so too its auric field is created at the same time. All these *QE Light bodies* are part of the Holographic Body.

I prefer to refer to

the *auric bodies* as the *auric fields*. Seven auric fields are created, as the physical body of the soul gets created. When a soul enters the fetus, the ***QE Light body of the 7th auric field*** and the *7th auric field* get created first. Thereafter, the other *QE Light bodies* and their auric fields get created. I am only briefly discussing the auric fields in this book. A more detailed discussion on the functions of each auric field, will be undertaken in another future book. For convenience, in this chapter, I am going to collectively refer to all the auric fields as the ‘aura’

and I am going to refer to all the *QE*

Light bodies, from which all the auric fields vibrate out from, as the ‘*QE Light bodies*’.

The aura is part of the Holographic Universe because it consists of electromagnetic energies which are vibrating out from the *QE Light bodies*. The *QE Light bodies* overlap the physical body. So it will seem as if the aura vibrates out of the physical body. The *QE Light*

bodies are not easily visible; only the aura is easily visible because it consists of electromagnetic energies. As a result people only see the aura, which is outside the body, and not the *QE Light*

bodies from which the aura is vibrating out. Both, the *QE Light bodies* and their aura, connect the soul to everything in the Holographic Universe.

Just as the *electromagnetic energies of the virtual*

photons vibrate out from the *QE Light energies*, the *electromagnetic energies of the aura* vibrate out from the *QE Light bodies*. This is similar to how the *energies of*

the soul vibrate, into the quantum dimensions, from the metaphysical dimension of the soul. However, the *energies of the soul* are not transforming into non-living energies, as they vibrate into another dimension. Thus, scientific instruments are not able to detect the *energies of the soul* that are vibrating out. Since the aura is

electromagnetic energies, scientific instruments are able to detect it. Since the aura consists of energies that are vibrating out from the QE Light, the aura is able to reflect the physical, emotional, mental and spiritual state of the soul. The **non-QE** Light energies will not be able to reflect the emotional, mental and spiritual state of the soul.

The world, including the human body, keeps changing at every point in time, though we are not aware of it. This is the *continuous creation process*. The *continuous creation process* is also for the sustenance of everything which have already been created.

The QE Light energies change into various forms when they are involved with the *continuous creation process*. The *QE*

Light and quantum energies use the aura, chakras and subtle systems, in the *QE*

Light and quantum bodies, for the ‘creation and sustenance’ of the physical body.

Everything in the Real

World is provided through vortices. A vortex is an energy center. A chakra is a vortex; the vortices, which provide the physical body, are referred to as the ‘chakras’. The chakras are located in the Holographic Body. Energies, from many different sources, flow in and out of the body through these chakras. For example, each chakra absorbs pure *QE Light and quantum energies*, which are meant for the *continuous creation process*, from the Border of the Quantum World. These pure *QE Light and quantum energies*, which are involved with the *continuous creation process*, are present everywhere in the space around us **in the quantum dimension**. The chakras are absorbing quantum energies (especially QE Light energies) which are like ‘air’ in the quantum dimension.

There are vortices everywhere in the world.

These vortices open and close, as per the World Drama. Thus, in the second half cycle, only some places have powerful vortices which remain open all the time. Many vortices, normally, remain close unless:

1. They are involved with providing something in the Real World.
2. They are involved with the *continuous creation process*.

The chakras and vortices join two fields in the Quantum Ocean (Unified Field): the First Field and the Second Field. The *QE Light and quantum energies* from the **First Field** flow,

through the chakras and vortices, to go into the **Second Field** in order to materialise the Real World. The *QE Light and quantum energies* in the First Field are pure. Some of these pure energies flow, through the

vortices/chakras, to go into the Second Field which is on the other side of the vortices/chakras. The *QE Light and quantum energies* in the Second Field **materialise** the real forms, including our physical bodies. If the chakras/vortices remain open, the *QE Light and quantum energies* in the Second Field remain pure. However, when the **chakras/vortices close** the *QE Light and quantum energies*, in the Second Field, become impure through the influence of the **energies from the impure** souls and environment.

Even the non-QE Light

energies play a role with the QE Light energies, in the *First and Second Fields*.

This is a reason why I am using the words ‘QE Light and quantum energies’. The words ‘QE Light and quantum energies’ include all the various kinds of *QE Light and quantum energies*.

In India, the ancient

people had **only given importance to the crucial 7 chakras** that played a

significant role for the *creation and sustenance* of the vital functions, in the body. There are, actually, many chakras all over the body. The pure *QE Light and quantum energies* flow through these chakras, to create the wave forms of the body. The most crucial wave form is the QE Light form.

Since there is a wave form, there is also a quantum particle form in the Second Field. Since there is a quantum particle form, there is also a real form.

The chakras are comparable to the *spinning black holes* which exist in outer space. This is a reason why they are referred to as ‘chakras’. ‘Chakra’ is a Sanskrit word which means ‘spinning wheel’ or ‘spinning discus’ or ‘vortex of energies’. A chakra is a vortex of *QE*

Light and quantum energies. The *QE Light and quantum energies* flow into the Holographic Body through these chakras.

The black holes are black in colour; the black colour, of the black holes, is a reflection of the *quantum energies deep within the Quantum World* which are not involved with the ‘creation’ of what exists in the Real World. The chakras, on the other hand, are **not black** in colour because the chakras are energy outlets which are involved with the ‘creation’ of the physical body. The QE

Light plays a significant role for the creation of the chakras.

Just as white light can be separated into 7 colours, even the QE

Light provides for the 7 colours. Thus, the chakras have colours.

Just as black holes absorb energies; the chakras absorb all sorts of energies. For example, they absorb energies from the First Field and bring them into the *QE Light and quantum bodies* (all of which are part and parcel of the

Holographic Body). The QE Light also comes into the *QE Light bodies* through the chakras. Then, from the *QE Light bodies*, the energies of the aura vibrate out.

The chakras, **of the body**, open and close as per the World Drama. These chakras exist in the border area where the creation process is taking place. Thus, the chakras are in the Holographic Universe and not in the Real World. On one side of the chakra, which is within the body, there are also particles. Though the *QE Light and quantum energies* have the ability to exist as particles or as waves, on the other side of the chakra, which is outside the body (in the First Field), there are only waves. This has been reflected, in the Hindu myths, through Vishnu floating on the Primordial Ocean.

The QE Light projects the Holographic Body **through the numerous chakras** which also begin to exist as part of the Holographic Body. The QE Light initiates the creation of these chakras, too. Since there are also quantum particle bodies and quantum wave bodies, in the Holographic Body, even the various kinds of quantum energies are involved with the creation of the chakras (after the QE Light have initiated the creation of the chakras). The Holographic Body which the QE Light shone forth, during the creation process, also has chakras within it

because **the chakras are used for the sustenance of all the QE Light and quantum bodies** in that Holographic Body. *QE Light and quantum energies* are

absorbed, through the chakras, to sustain the Holographic Body. The chakras connect what is inside the Holographic Body to what is outside, in the Holographic Universe.

The aura is like a chakra. It allows energies, from outside the physical body, to flow into the body.

Thus, the energies from the environment, and from others, are able to come into the person through the aura. The aura also allows a person's energies, from the soul and body, to vibrate out of the person.

There are numerous vortices all over the head and body. The energies of the soul vibrate out through these, to play a significant role in the Holographic Universe. Thus, even if a person was looking at us from behind us etc., we become aware of it. These energies of the soul, which have vibrated out from the soul, are in the environment/dimensions which are provided by the aura. The QE Light energies provide an environment, within the aura, for the energies of the soul to reside in (in the Holographic Universe) so that the soul can live its life in the Corporeal World.

The *mind of the soul* is used to create thoughts, feelings, etc. The energies of these thoughts, feelings etc. vibrate into the aura through the person's chakras. So the thoughts, feelings etc. of the person are in the *mind of the soul* and in the person's aura.

Everything that is in

the *mind of the soul* is also there in the QE Light Mind of the Holographic Body.

The QE Light energies take what is in the QE Light Mind and send them through the chakras, in the head, so that they go into the *subtle passage in the spinal cord*. From there, they go through the relevant chakras and get reflected in the aura. The *vibrations from the QE Light energies* reflect the person's thoughts, feelings etc.

through various colours in the aura. The soul's energies are invisible. However, the vibrations from the QE Light are easily visible as coloured lights, while they are reflecting the thoughts etc. of the person in the aura. This makes it easy for others to know what one is thinking of, etc. Further, the vibrations from the QE Light, in the aura, are **closer** to everything in the Corporeal World than

the *energies of the*

soul. This too helps others to easily have knowledge of and recognize the soul's thoughts, feelings

etc.

If the soul did not have the *brain, physical body, QE Light Mind and Holographic Body*, the soul cannot feel, think etc. The soul's thoughts, memories etc. are stored within the soul itself, though the soul creates, sees and uses them through the brain, QE Light Mind and aura.

The QE Light energies, from the chakras and in the aura, enable the soul to live its life as per the World Drama. These energies have to be used, in the Holographic Body, so that:

1. The soul can feel emotions as the Holographic Being and as the person.
2. The soul's emotions are expressed to the world, through the Holographic Body and physical body.

Since auras can connect to each other, souls can subtly communicate with each other through their aura. The soul uses the aura to interact and communicate in the Holographic Universe. When a person creates a thought to subtly communicate to another, the thought also exists in the QE Light Mind. The person's thought, from the *mind of the soul* and from the QE Light Mind, permeates the aura through the chakras. From there, it goes into the aura of others. From their aura, the thought proceeds through their chakras so as to go into their QE Light Mind. Whatever is in the QE Light Mind is also there in the *mind of the soul*. So the soul becomes aware of the subtle communication. The QE Light energies cannot penetrate into the soul. However, the energies of another soul can go into the soul if the person allows the thoughts etc. of others to enter. This is not advisable if the **vices** of another are going to enter the soul because of the destructive nature of the vices. Love from another has a good influence.

The QE Light energies also provide the subtle environment for the thoughts of the soul, to flow around in, as they subtly communicate with others. Souls are, actually, subtly

communicating and interacting with each other in the Holographic Universe, though, in the Real World, people are not aware of it.

Subtly, human souls know of what others are thinking etc. because everyone is living in the Holographic Universe. However, since people are in the mortal state, the Conscious Self is not aware of what others are thinking etc. If one was the Causal Self, one would know of what others are thinking. As the Causal Self, one is living in the Holographic Universe.

The aura expands to allow the *energies of the soul* to travel far away from the soul. Thus, one can also perceive what is far away, through the Holographic

Universe.

In this book, I am not giving a detailed explanation on the functions of the chakras.

Chapter 14: Density of Worlds

The Corporeal World consists of the Real World and the Holographic Universe. The Real World and the

Holographic Universe are two different dimensions of different densities. There are many quantum dimensions of different

densities, within the Holographic Universe. Each dimension, in the Corporeal World, is like a ‘world’ of its own.

Since the energies of the

Holographic Universe are **lighter or less dense** than the energies in the Real World, it is **as if** the Holographic Universe is above the Real World. However, some parts of the Holographic Universe overlap the Real World, while some parts of the Holographic Universe are outside the Real World. For example, the *QE Light and quantum*

energies which are **not** involved with the creation process are outside the Real World.

The world/space which we

are using, to live our lives on earth, is in the Real World. In the Real World, the *surface of the earth right up to the space in the sky* is the world stage for the World Drama on earth. To create what has to exist in this area of the Real World, *QE Light and quantum energies* emerge through vortices.

These vortices begin from just beneath the *surface of the earth* and spin right up into outer space because these vortices are providing what exists from the *surface of the*

earth right up to what exists in the sky.

Since the **densest** energies **exit** from near the tip of these vortices, the densest energies are used to create what exists just above the *surface of the earth* (in the area where we live on earth). Since the **least dense** energies **exit** from higher up the vortices, the least dense energies are used to create what exists in outer

space. This is why the *effects of the quantum energies* are felt in outer space.

Outer space is like another dimension, though we can go there if we are properly equipped to do so. This is just an example of a vortex which provides this specific function. There are numerous vortices providing for different things. Even the human body is created through vortices which are referred to as chakras. These

vortices/chakras also provide the auric fields, in the aura. Just as there is a difference in the *environment immediately above the earth* and in the *environment in outer space*, there are also differences in the auric fields within the aura.

Each auric field is like a

world of its own because each auric field is a quantum dimension which is created through energies of a different density. Actually, the energies in the aura are in a state that is between the

‘quantum’ and the ‘Real’. It consist of energies which are less dense than the energies in the Real World. The energies in the aura are in a pre-matter state. This pre-matter state is one of the states which *QE Light and quantum*

energies are in, before they materialise something in the Real World. Despite this, it can be said that the auric fields are quantum dimensions because they are not in the ‘Real’ state.

Normally, there are 7 auric fields within the aura of a person. However, some of the auric fields are not used all the time. For example, in the second half cycle, the higher auric fields are no longer used as the person is growing up. An adult, normally, only uses the 4 auric fields which are closest to the body, if the adult is living a life where he feels that he is the body, i.e. he is living a non-spiritual life.

If a person was living a spiritual/religious life, the person uses the higher four auric fields (out of the 7 auric fields). These higher auric fields are further away from the body. If the person has developed spiritually, to a very great extent, the person can use auric fields which exist beyond these 7 auric fields. Each auric field is less dense than the one below it. Thus, the energies in the aura, which are nearer to the body, are denser, while the higher up energies of the aura, which are further away from the body, are less dense. Each higher auric field is less dense because the QE Light energies, which provide the auric fields, are **exiting the**

chakras **at different**

levels.

Based on my experiences, I

am going to divide the chakra into seven divisions. The energies which create the first auric field (Ethereic Body/Field) is from the first division, near the tip of the chakra. The second auric field is created by the energies which **exit** from the second division of the chakra. Thus, it is less dense than the first auric field. Each higher auric field is created through a higher

division in the chakra. The seventh auric field is created by QE Light energies that exit from the *7th division of the chakra*, which is the furthest from the physical body. So the 7th auric field is the least dense. Chakras are created beyond the head, so as to provide the auric fields which are beyond the 7th auric field. Since the density of each auric field is different, each auric field is like a

world/dimension of its own, though all the auric fields are **connected to each other** so as to assist the soul to live his life (in the Real World and in the Holographic Universe).

Within the Holographic

Universe, there are numerous *QE Light and quantum dimensions*. Some of these *QE Light and quantum dimensions* materialise the Real World. For convenience, I am going to refer to '**all the QE Light and quantum dimensions which materialise the Real**

World' as the Real World Quantum

Dimension.

Just as different auric

fields are provided by the different divisions in the chakras, so too, different Real World Quantum Dimensions **of different densities** are provided **along the vortices which provide the Real World**. Thus, there are many Real World Quantum Dimensions, along the vortices, which can provide the Real World. However, only one of the Real World Quantum Dimensions provides the Real World, at a specific point in time. Therefore, there are many Real World Quantum Dimensions which are not involved in creating the Real World, at a specific point in time. However, they can play a part in creating the Real World, at another point in time. The density of the Real World changes, based on which Real World Quantum Dimension is providing the Real World.

From the First Field the

pure *QE Light energies* go into the Second Field, through numerous vortices. The energies are **spinning out** of these vortices. The energies, which emerge

from the First Field, are very dense near the tip of the vortex.

The energies **become less dense** as they spin out of the vortex. Thus, the energies further away from the tip of the vortices are less dense.

If the Real World is situated near the tip of the vortex, it will be a denser Real World. If the Real World is situated further away from the tip of the vortex, near the edge of the vortex, it will be a less dense Real World. The less dense energies create a less dense world.

The First Field and Second Field are

everywhere in the Real World. However, the First Field, Second Field and the Real World are all different dimensions. From the First Field, energies emerge through vortices to flow into the Second Field. The Real World can be situated anywhere along these vortices, in the Second Field.

In the first half cycle, the Real World

will be situated near the edge of the vortex because less dense energies are used to create the Real World. Since the human souls are in the divine state, the QE Light will be very powerful. So when they spin out of the vortices, they will spin out to a very high level. This pushes the edge of the vortex to a higher level.

As the edge of the vortex moves to a higher level, the SWL, SWD and the Real World move to a higher level. Thus, they exist as higher dimensions, above the Quantum World.

At the end of the Silver Age, when the

energies of the soul transformed into the ordinary state, the QE

Light energies also lost their powerful state. Thus, they were only capable of spinning out of vortices to a lesser height. Therefore, the SWL, SWD and Real World dropped down into the Border of the Quantum World. From the Mid-Confluence until the end of Kaliyug, the Real World has been dropping nearer to the tip of the vortex because:

- 1. People have been indulging in the vices to a greater extent, over**

time.

2. The

spiritual strength of the human souls have been slowly decreasing, with time.

The Mid-Confluence Aged

people had seen, and lived in, a lot of worlds as their spiritual strength was dropping. The *QE Light and quantum energies*, which provide the

environment for the soul, become heavier:

1. as the spiritual strength of the soul decreases, and

2. as

the *vices and sins* accumulate within the soul.

So the Real World keeps

dropping into a less dense Real World Quantum Dimension. As a result, the people live in a new Real World which is provided by *QE Light and quantum energies* of a different density.

The *QE Light and quantum energies*, which provide the Kaliyug Real World, exit the vortices from very near the tip of the vortices. Thus, the densest energies are used to create the Kaliyug Real World. The densest Real World Quantum Dimension provides the Real World, at the end of

Kaliyug.

The QE Light energies are less dense than the quantum energies. Thus, the QE Light energies are above the quantum energies. Therefore, the SWL dimension is above the Quantum World dimension, in the first half cycle.

The SWD is like a dimension of its own.

Within this dimension, there are more dimensions. The SWD is in the border between two dimensions: SWL and Quantum World. Energies from both (SWL and Quantum World) are involved along this border for the creation process. The area where the creation process takes place exists everywhere in the SWD and

Real World. Actually, the area where the creation process takes place is in the SWD. However, everything that is in the SWD materialises the Real World and its World Drama. Since the SWD involves the borders of the SWL and Quantum World, the dimension of the SWD is between the SWL and Quantum World. However, it is not like this because the density, of the QE Light energies, changes based on the spiritual state of the human souls. The density of the QE Light changes because they provide the environment for the energies of the soul. So they are influenced by the energies of the soul.

In the first half cycle, the human souls

were in a pure divine perfect state, so the QE Light energies were, likewise, in a pure divine perfect state. In this state, they were very fine and light (less dense). Since the souls and the QE Light energies were in a pure perfect divine state, the SWL was higher up, above the Quantum World. The divine Real World was also less dense because:

- 1. Lighter (less dense) energies were used to create the Real World.**
- 2. The**

energies in the Real World were also in their pure perfect divine state.

Since less dense energies were involved

with the creation process, the SWD was higher up. It was within the border of the SWL. Since the SWL and 3D SWD were higher up, the Real World was also higher up. Furthermore, since lighter energies materialised the divine world, the energies (that were exiting the vortices) were exiting at a higher level and at a greater height.

Thus, the divine Real World was higher up. The divine world was in a higher dimension, even though it was occupying the same space as our current Real World.

As the SWD moves up or down the vortices,

the Real World Quantum Dimension which provide for the Real World is different. Thus, a different Real World Quantum Dimension

materialised the Real World in the first half cycle and a different Real World Quantum Dimension materialises the present Kaliyug world.

During the Mid-Confluence,

the energies of the human souls transformed into the less powerful, ordinary state. Thus, the *QE Light and quantum energies* also transformed into the less powerful, ordinary state. This brought about a huge reduction in the height of the vortices. So the SWL, SWD and Real World moved down into the *Border of the Quantum*

World. They also sank because the QE Light energies became denser. Denser energies are heavier. Since the QE

Light provided the environment for the *energies of the soul*, they transformed to become denser when the *energies of the soul* transformed into the ordinary state. If the vices are used, the QE Light (which provides the environment for the vices) become impure. Impure QE

Light energies are very dense. Thus, since Mankind was yielding to the vices to a greater extent, from the beginning of the second half cycle, the SWD and Real World kept descending deeper into the Quantum World and Corporeal World.

At the beginning of the

second half cycle, the QE Light also sank because it has a

‘consciousness’. Quantum energies don’t have a consciousness.

The *quantum energies without the QE*

Light are like the *physical bodies without the souls*.

Just as how human consciousness fell into the Quantum World, even so, the QE Light sank into the Quantum World.

Since the world in

the *first half cycle* is less dense, the people also had bodies which were less dense. Since we live in a very dense world now:

1. The

bodies are also created through very dense *QE Light and quantum energies*.

2. The

aura will consist of very dense energies. Even though the energies are very dense, there are differences in the density of all the auric fields.

The quantum dimensions,

which materialise the Real World, exist permanently because the Real World exists permanently. More than one quantum world looks like our Real World because the quantum dimensions materialise the Real World in stages. People can use some of these quantum

dimensions as the world which they live in. However, one cannot just utilise them as one likes because people's consciousness are in the Real World. One way of going into the quantum dimensions is through travelling at the *speed of*

light. One can also experience various quantum dimensions during subtle experiences. One's auric field can expand throughout the Real World Quantum Dimension. Therefore, one can have experiences in the various quantum dimensions which are materialising the Real World. In the myths and ancient texts, the quantum dimensions, quantum worlds and the different Real World Quantum Dimensions have been portrayed as other worlds, heaven, subtle dimensions, other planets, other planetary systems,

etc.

Between 1996 and 2001, when I was going back home after listening to the BK murli (God's

messages in the Brahma Kumaris) I had numerous experiences of going into the quantum dimensions. In my experiences, sometimes, I went into the quantum dimensions which provide the present Real World.

At other times, I entered a different Real World Quantum Dimension, or into its quantum dimensions, which existed at a different level along the vortices. Since it was very early in the morning, there was no

traffic jam, so I could drive without stopping, when I began to drive on the highway (Federal Highway between Kuala Lumpur and Petaling Jaya, in Malaysia). As soon as I was about to go onto the highway, I would begin to go into the quantum dimensions. When I was in the quantum dimensions, it would seem as if I was flying very fast in my car. I made sure that I drove **within** the allowed speed limits, so I was actually not driving fast, though it seemed like I was flying or gliding by so quickly. Moreover, even though I was still driving on the road, it seemed as if I was hovering a little above the road.

Sometimes, as I was about to go into a

quantum dimension, it would look like it was getting dark; like as if it was going to rain. Then, the atmosphere would look gloriously beautiful with clear blue skies. Though this world looks just like ours, it felt different (less dense or lighter). It would seem as if I was flying very fast in my car, when I am in the lighter dimension, though I was still driving the car as normal. Sometimes, I did not go through the phase where it was dark, I went straight into a lighter dimension and it felt as if my car flew very fast.

As I moved through each dimension, I noticed that there was a difference in the environment around me. Some of the dimensions were lighter (less dense) than the other dimensions. My perception was that I was going up as I moved from dimension to dimension.

This may have been a reflection of the density of the dimensions.

When I had to stop the car, because of a

traffic jam, I would drop down from the quantum dimensions and come back into the present Real World. I would see the cars beside me when I was, finally, in the present Real World. During these

experiences, I knew that I was still driving along the highway.

However, sometimes, I was not sure as to where the other cars were.

Maybe the road was empty, though it should not have been empty since many people would have been driving to work at that time.

Further, how can a traffic jam suddenly exist?

As I was coming back into

the Real World, the atmosphere around me kept changing.

Then, **just before** coming into the Real World, there would be a yellowish light in the atmosphere, though the world looked just like our Real World. Once, a person in the car beside mine had opened his car window, very quickly, and was looking all around my car. I had just come back into the Real World and I could still see some yellow light in the environment. I was wondering if he could also see it, since he looked as if he was seeing something strange and

inexplicable. When he saw me looking at him, he looked at me for just a moment, then, he went back to looking at the atmosphere around my car.

When I came out of these experiences, I

would still be driving back home along the highway. Often, when I reach home and look at the time, I would think that I had reached home too quickly.

In some of my experiences,

I could see more than one dimension/world at the same time. In these experiences, I was in a higher dimension/world and there would be another dimension/world which was below me. I was higher up, in these experiences, than in all my other experiences. In these two world experiences, it felt as if I was detached from the dimension that was below me; whereas in my other experiences, I did not have this feeling of being separated from the dimension which was below me. In fact, in my other experiences, I did not perceive two dimensions coexisting simultaneously. I had merely gone into another dimension which was above the dimension of the Real World.

I had only seen the dimension which I had been in, though,

sometimes, it was as if the road was further down and as if I was in the air just above the road. In my two world experiences,

sometimes, the lower dimension would move lower or higher. At other times, my dimension would be

moving higher or lower, but the *dimension below me* remained at the same position or it would also be moving higher or lower. During these experiences, it did not feel like I was flying fast in my car. I was driving my car in the higher dimension, while others were driving their cars in the dimension below me. I may have experienced the different Real World Quantum Dimensions, in these experiences.

The different quantum dimensions and Real World Quantum Dimensions are provided by the energies that are moving out of the spinning vortices. Most of the time, I did not feel like I was going through the vortices. Though, sometimes, it did seem as if the subtle environment around me had looked slightly v-shaped. I did not know about vortices at that time, so I had not understood why it had appeared like that.

During one experience, the

world which we live in was disappearing and the atmosphere was getting filled with more and more yellow light. It was beginning to get so strange, therefore I lost my blissful stage and got

frightened. As a result, I encountered a very fast drop. It felt as if I was dropping down a narrow steep tunnel or hole. However, I was able to see what was outside the tunnel and it seemed as if I was moving down in an open lift **with the environment constantly changing** (though the body remained in the same space). Instead of seeing the *floors of a building* going by, I was seeing different dimensions going by. The steep tunnel may have been a vortex. God may have been giving me the experience, since my spiritual stage was good; **or** I may have

been **lifted into a higher dimension since the Confluence Aged spiritual stage was for world**

transformation. Since I lost my pure

stage, I must have lost the ability to remain in that higher

dimension. So I had to drop back into the present Real World. From then onwards, I made sure that I did not lose my blissful stage when something strange happened during such experiences.

There are some experiences

which I have not understood until now. So I am not sure as to how to classify them. **Maybe**, from these experiences, it can be said that we are living in more than one dimension, at the same time, doing the same thing.

However, it is a matter of which dimension our consciousness is in.

Perhaps the density of the dimension, which our consciousness is in, affects our body and it maybe that there are slight differences in the time, between the dimensions. So our body might age faster or slower, depending on which dimension our consciousness is in. In these experiences, I would be driving my car in a higher dimension, so, though I am driving along the road, I am not really

‘on’ the road. I am a little higher than the road and am able to see the road below me. When I have to take a turn, I slow the car down. Then, a lot of weird things can happen. For example, suddenly, my car is on a slightly different place along the road, a little behind from the location where I originally was. At the same time, I would have suddenly moved into a dimension at a different level. Then,

suddenly, I would be further in front, along the road, and in a dimension at a different level. Then, I would be

‘on’ the road and I would be even further in front **on** the road. The drops and lifts into the other

dimensions are like ‘sudden jerks’. I used to consider these as test papers and make sure that ‘fright’ does not take over from my high blissful stage. When I had these experiences, I would not be looking at what was happening to me, I would be concentrating on my spiritual stage and on driving the car safely.

Chapter 15: Subtle Experiences and Near Death Experiences in Dark Environment

In subtle experiences and Near Death Experiences, the black nature of the *No-info QE and its quantum dimension* can be experienced when the soul or *energies of the soul*: 1. fly through a black tunnel, and/or

2. is in a dark quantum dimension.

People have these experiences because they are ‘**trapped**’ in the Quantum World. One is in the mortal state when one is caught within the Quantum World. When one experiences going through a black tunnel, one’s **consciousness** is **leaving** the Real World, physical body and quantum body (which has information of one’s physical body). One’s consciousness is **going through** a space where there is No-info QE. When one experiences being in the black subtle dimension, one’s **consciousness** has **left** the *Real World, physical body and quantum body (which has information of one’s physical body)* and **is among the No-info QE which are dark**.

The soul is in the metaphysical dimension which is part of the SWL. During the first half cycle, the SWL was **above** the Quantum World. As per the World Drama, it has to be like this because the human souls, in the first half cycle, are in the powerful **divine state**. As a result, the people are constantly, and naturally, in the soul-conscious state. Therefore, the people are immortals. However, during the Mid-Confluence, the souls **lost their divine state** and transformed into the weaker **ordinary state**. So the souls sank deeper down into the Corporeal World. Therefore, in the second half cycle, the souls are in the Quantum World. The state of everything else in the Corporeal World is dependent on the spiritual state of Mankind. Thus, since the human souls dropped into the Quantum World, the SWL also dropped into the Quantum World. Therefore, people *in the second half cycle* feel that they are their corporeal bodies. This is the ‘mortal’ state. In this state, the souls are **caught** in the Quantum World of the Holographic Universe, while the souls are living their lives in the Real World. So during the experiences, where one is going through the black tunnel and/or where one is in the subtle black dimension, the energies of the soul leave the body and go into the black Quantum World where the No-info QE exists.

There are many different things, or forms, on earth. Each different form will have *quantum energies with different information*, in the border of the Quantum World where the creation process is taking place, because everything looks different on earth. So the border of the Quantum World, where the creation process is taking place, consists of numerous different patches of '*QE with Info* and *QE Light with Info*' **among the No-info QE**. One's consciousness is **in the space** where there is No-info QE, when they experience being **in** the subtle black dimension. Their consciousness has **left the space which has the information about their body** and it has gone into the quantum dimension where there is No-info QE.

The *No-info QE* are quantum energies that are in their original state. Some of these encode information to become QE with Info, when they have to provide a physical form on earth. The physical body, which the soul uses in the Real World, exists based on the information in the quantum body. The soul is engulfed in this quantum body. The *QE with Info* plays a role with the *QE Light with Info*, during the creation and sustenance of the physical body. So the quantum body is **not black**. It is **lighted up or greyish** because of the presence of the QE Light. These **lighted up patches** are among the dark No-info QE, in the Quantum World. When the *energies of the soul* are in the black quantum dimension, they are in a dimension which is not involved with providing the physical body. This means the *energies of the soul* have moved out of the quantum energies which are involved with providing the physical body.

The energies of the souls are **going through** the space where there is No-info QE, when people experience going through the black tunnel. They are not leaving, or have not left, the vortex so as to reside in the No-info QE. They are just going through the *division in the vortex* which provides the exit or gateway to the No-info QE dimension. The No-info QE enters into the SWD for the creation process, and leaves the SWD, through this division in the vortex. This *division in the vortex* is actually a vortex on its own. Since smaller vortices can be part of a bigger vortex, one can pass by this vortex while going into other kinds of subtle dimensions. These experiences are a reflection of how one's consciousness is being **released from the quantum energies** which make up the quantum body.

There are various kinds of quantum energies which are involved with providing the Real World and physical bodies. During subtle experiences, one does **not** normally experience all these quantum energies as being in **different** quantum dimensions because:

1. There are no divisions among the *QE Light and quantum energies*. They act as ‘one’.
2. Our consciousness, normally, goes into dimensions which look like ‘worlds’. So we don’t see the divisions among the energies.

However, since there are different kinds of quantum energies (each in a dimension of its own) one can experience going through the black tunnel and/or experience being in the black subtle dimension.

If one was only having a subtle experience and not a Near Death Experience, then, it is only one’s consciousness that flies out of the physical body. This means: only some of the *energies of the soul* fly out of the physical body. The soul does not leave the physical body. Later, when one feels that one is re-entering the body, the soul’s energies are, in fact, moving back into the physical body. In the Near Death Experiences, one of the following can happen:

1. Only the **energies of the soul** might be leaving the body or may have left the body. It is also possible that the soul may not have left the body, as yet, though it may be about to leave. Since the soul is about to leave, the energies of the soul may have left before the soul left the body.
2. The soul may have left the body but is still in the aura. Since the physical body still has the auric fields and the soul has not left the aura, the soul can enter the body and continue using it.

It is only when one dies that the soul leaves the physical body so as to enter the fetus of the next birth. The soul does not leave the physical body, during subtle experiences. The Near Death Experiences are a little different because of the circumstances. Near Death Experiences can only be experienced in the second half cycle. No-one experiences Near Death Experiences in the first half cycle because of the perfect state of everything in the Corporeal World.

Each physical body is provided by quantum energies which have different information. Thus, when the soul leaves one physical body and enters into a fetus, the soul moves out of the quantum energies of one body and flies into the quantum energies of the fetus. The soul flies, in and out of bodies, through the Crown Chakra (7th chakra) at the top of the head. So the soul is entering and leaving the body through a vortex/tunnel. However, this vortex is **not** black because the **QE Light with Info and the QE with Info** provide the Crown Chakra. This chakra gets connected to the dark vortex which allows the soul, or energies of the soul, to enter into the dark quantum dimension where the No-Info QE exists. This **dark vortex** is like a black tunnel because it is the entrance to the dark quantum dimension where the No-Info QE exists. The soul, or energies of the soul, is going through this *dark vortex* when the person experiences going through a black tunnel.

Each of the major 7 chakras, within the body, has other smaller vortices within it. The Crown Chakra has numerous small vortices. These smaller vortices are the gateway for different kinds of energies and dimensions. Depending on the circumstances of the experience, the *dark vortex* can be:

1. one of these smaller vortices,
2. a dark vortex that is connected to one of these smaller vortices, or
3. a dark vortex that is connected to the central part of the chakra.

The 'black tunnel' also reflects **what is happening in the quantum energies** which provide an environment for the *energies of the soul*. It reflects how the *energies of the soul* are **moving out of the body through a vortex**. A vortex can feel like a tunnel.

The *QE Light and quantum energies* have to provide an environment/dimension for the energies of the soul, while the soul is in the Corporeal World. Thus, when the soul or the *energies of the soul* leave the body, the *dark quantum energies of the dark vortex* can provide a tunnel pathway for the soul or for the *energies of the soul*. The No-info QE provides the environment after the soul, or energies of the soul, has left the body. Thus, one experiences being in the *subtle black dimension* during these experiences.

Normally, the QE Light energies provide an environment for the metaphysical energies of the soul. However, even quantum energies can provide an environment. Thus, sometimes, people can experience being in a black subtle dimension. Since the **non-QE Light energies** will **not** be able to reflect the

emotional, mental and spiritual state of the soul, the consciousness of the soul is not reflected in the *black subtle dimension* similar to how it is reflected in the aura.

In subtle experiences and Near Death Experiences, if the *energies of the soul* are **in or able to see** the *black subtle dimension*, the soul might perceive other souls and God (as points of light) because God is giving the soul an experience or vision. God gives experiences or visions based on one's belief-system and based on the World Drama that is within God.

During the Near Death Experiences, the soul leaves the body, even though it is not time for that to happen. When the soul goes out of the body before time, God can get involved with the situation by giving visions so as to guide the soul. This happens as per the World Drama.

In the second half cycle, if the *energies of the soul* do not go into the black subtle dimension, they can go into one of the other dimensions, for example, they can go into the QE Light energies in the SWL. The *energies of the soul* will go into one of these dimensions through flowing out of the chakra, in the Holographic Body, and then flowing into the relevant dimension. The soul travels into the relevant dimension through using the aura because the aura expands to allow the experience. If the *energies of the QE Light* provide a subtle environment for the energies of the soul, the soul does not experience the dark quantum dimension. In these experiences, the soul can experience golden light, white light, etc. These lights are provided by the QE Light energies, within the aura.

In the Near Death Experiences, the energies of the soul or the soul can remain in the higher auric fields which are linked to the 2D SWD. Thus, the soul might be able to see its past, present and future. Since the energies of the soul or the soul remains in the aura, and has not left to enter a fetus, one can see one's own body etc.

The Depths of the Quantum World is an *ocean of quantum energies*. This ocean provides: 1. Quantum energies (that can transform into the QE with *Info*, during the creation process, in the SWD).

2. Powerful ‘energy’ that can be used in the Real World, e.g. atomic energy.

Energies from the *ocean of quantum energies*, from the Depths of the Quantum World, flow into the Border of the Quantum World. The No-info QE in the Border of the Quantum World:

1. Provide an environment for the SWD which exists in the Border of the Quantum World.

2. Flow into the Black Energy Field.

From the Black Energy Field, quantum energies go into the:

1. **2D SWD.** Entangled with the *imprint of the 2D SWD on the QE Light* is a layer of quantum waves which also has the information of the 2D SWD. **Quantum energies from the Black Energy Field** flow into this *layer of quantum waves which has the information of the 2D SWD* so as to bring the information, of the 2D SWD, into the 3D SWD for the creation process and *continuous creation process*.

2. **First Field.** From the First Field, they go into the Second Field for the creation process and *continuous creation process*.

The First Field and Second Field are involved with providing the 3D SWD. Fresh energies, from the First Field, continuously flow into the Second Field during the sustenance of what exists in the 3D SWD, i.e. for the *continuous creation process*. Energies from the Second Field continuously flow back into the First Field, as fresh energies keep flowing into the Second Field from the First Field. The quantum energies involved with the creation process, in the Second Field, are QE with Info.

The Black Energy Field, Border of the Quantum World and Depths of the Quantum World consists of No-info QE. The *black subtle dimension*, which people subtly experience, can be in one of the following:

1. Border of the Quantum World.

2. Black Energy Field.

Since the Border of the Quantum World is the **shore of the ocean of quantum energies**, the energies there would be more powerful. So the *black subtle dimension*, which people use during experiences, normally is in the Black Energy Field. The Black Energy Field has an energy level which is **tolerable**.

Chapter 16: Cosmic Consciousness and Other Dimensions

The **QE Light energies in the SWL** is the Cosmic Consciousness. From the SWL, it influences all the various forms of *QE Light and quantum energies* which exist everywhere in the Corporeal World. This Cosmic Consciousness acts as 'one' with all the other *QE Light and quantum energies*. Therefore, all the universally existing *QE Light and quantum energies* can also be seen as the Cosmic Consciousness. Everything in the Corporeal World is provided by, or consists of, the *QE Light and quantum energies*. Thus, it can be said that the Cosmic Consciousness is in everything within the Corporeal World and that the Cosmic Consciousness fills the whole Holographic Universe. However, when I refer to the 'Cosmic Consciousness', I am referring to the **QE Light energies in the SWL** which are not in the SWD where the Real World is materialised.

The Depths of the SWL is an *ocean of QE Light energies*. This ocean provides:

1. QE Light energies (which can transform into the *QE Light with Info*, during the creation process, in the SWD).
2. Powerful 'energy' which can energise the spiritual state of everything which is close to it.

The Cosmic Consciousness is this ***ocean of pure No-info QE Light energies*** which is in the depths of the SWL. The *Border of the SWL* is also filled with pure No-info QE Light energies from the Cosmic Consciousness but the *Border of the SWL* is the shore of the ocean. The powerful No-info QE Light energies, from the ocean, flow into the Border of the SWL **like how water flows onto the shore of the ocean**. The No-info QE Light energies, in the Border of the SWL:

1. flow into the Cosmic Field, or
2. provide an environment for the *energies of the soul* which are in auric fields within the Border of the SWL.

The **No-info QE Light energies in the Cosmic Field** are above the *QE Light energies which has the imprints of the 2D SWD* and they are in a state where they are ready to: 1. flow into the 2D SWD and First Field, or

2. provide an environment for the *energies of the soul* which are in auric fields within the Cosmic Field.

QE Light energies from the Cosmic Field bring information, which are in the '*imprint of the 2D SWD on the QE Light*', into the SWD for the creation process and *the continuous creation process*. Since the energies in the Cosmic Field are ready to play a role in the SWD, it can be said that they are part of the SWD. However, it is more appropriate to connect the Cosmic Field to the SWL because the dimension consists of pure No-info QE Light energies from the Cosmic Consciousness.

From the First Field, the No-info QE Light energies become *QE Light with Info* as they go into the Second Field:

1. for the creation process, and
2. for the *continuous creation process*.

In the second half cycle, the QE Light energies in the Cosmic Field, Nature's 2D WD, 2D SWD and First Field are influenced to remain in the pure state because:

1. They are close to the Cosmic Consciousness.
2. The energies in the First Field are detached from the energies in the Second Field because of the chakras between the First Field and the Second Field.

In the second half cycle, the Cosmic Consciousness is not as powerful as it was during the first half cycle. However, it is still in a pure and powerful state because the Cosmic Consciousness is an *ocean of pure QE Light energies*. An ***ocean of pure energies*** has the ability to keep its energies in a pure and powerful state. An *ocean of energies* acts like a generator of energies. However, it is not the same as God because it is only the energies of God which can transform *human souls and the world* into the perfect divine state. The Cosmic Consciousness cannot do this. When God transforms the world into the divine state, at the end of the cycle, the Cosmic Consciousness also transforms into the divine state. In the first half cycle, the **powerful divine energies of the human souls** help to keep all the energies (including the Cosmic Consciousness) in the divine state. The Cosmic Consciousness can only remain in the divine state **if the deity souls are in the divine state**. Thus, at the end of the Silver Age, when the

deity souls transform into the ordinary state, all the QE Light and quantum energies (including the Cosmic Consciousness) transform into the ordinary state.

‘Deity souls’ are the powerful divine souls who take births in the first half cycle. The people, in the first half cycle, are immortals because they are constantly and naturally soul-conscious. The soul-conscious state is the spiritually powerful state where the people are aware that they are souls. The people, in the first half cycle, are constantly and naturally soul-conscious because they are in the perfect divine state. At the end of the Silver Age, the deity souls lose their powerful divine state. So they walk out of the divine world. Then, they take births as ‘mortals’, in the second half cycle. Mortals are not soul-conscious. They are body-conscious. So they feel that they are the body and not the soul. Then, during the Confluence Age, the deity souls transform to become divine again.

In the second half cycle, the pure energies of the Cosmic Consciousness influence other energies, including the energies of the soul, to remain in a pure state. However, many human beings do not get this assistance to remain pure because **vortices close** when people begin to become overcome by the vices. Vortices have to be open, for the pure QE Light energies to flow into the Second Field. The pure energies, in the Second Field, will easily influence the energies which are nearby. The purity of human souls help to:

1. keep the world pure, and
2. keep the vortices open.

However, the Mid-Confluence Aged scientists found another way to open the vortices and to keep the vortices open. More on this can be found in my next book.

Since the SWL consists of all ‘light’ energies, the *light energies of the souls* and the Cosmic Consciousness are part of the SWL. During the second half cycle, the **souls and the Cosmic Consciousness get separated from each other** when the souls begin to indulge in the vices because:

1. the Cosmic Consciousness consists of very pure energies, and 2. the souls cannot have a pure environment when they are using the impure energies of the vices.

Thus, not all souls are within the Cosmic Consciousness in the SWL. For convenience, from now onwards, when I refer to the **SWL of the second half cycle** I am referring to the dimension where the Cosmic Consciousness exists and **not** to the area where the soul is in because it is the pure QE Light energies which provide the environment in the SWL. In the **second half cycle**, the dimensions within the Corporeal World are in the following order (from the highest to the lowest, **within the Quantum World**):

1. Cosmic Consciousness (at the very top, in the Depths of the SWL, within the upper part in the Border of the Quantum World).
2. Border of the SWL (in the SWL, within the upper part in the Border of the Quantum World).
3. Cosmic Field (in the border between the SWL and Quantum World, around the edge of the SWL, within the upper part in the Border of the Quantum World)
4. 2D SWD (within the upper part in the Border of the Quantum World).
5. 3D SWD (within the upper part in the Border of the Quantum World). The 3D SWD includes the First Field and Second Field. The First Field is below the 2D SWD. The Second Field is below the First Field.
6. Real World (within the upper part in the Border of the Quantum World).
7. Black Energy Field (within the upper part in the Border of the Quantum World).
8. Lower part in the Border of the Quantum World (the shore of the *ocean of Quantum Energies*).

9. Depths of the Quantum World (*ocean of Quantum Energies* at the very bottom of the Quantum World).

In the second half cycle, the Cosmic Consciousness is in the Quantum World because the QE Light energies in the SWL were **influenced by the energies of the deity souls** at the end of the Silver Age. At the end of the Silver Age, when the deity souls lost their divine state and sank into the Quantum World, even the SWL lost its divine state and sank into the Quantum World. Though the Cosmic Consciousness is within the Quantum World, the Cosmic Consciousness is **not merged with the quantum energies** in the Quantum World. They are in a **different dimension** within the Quantum World. Only the *QE Light energies, which are involved with the creation process in the 3D SWD*, are merged with the quantum energies that are also involved with the creation process in the 3D SWD.

Denser materials are heavier. Therefore, they sink to the bottom. The Real World can be said to be below the SWD because the Real World consists of denser energies and heavier materials. Even in experiences, one would see the Real World below the Holographic Universe. However, in reality, a huge part of the Real World and the SWD overlap. Only the *QE Light part of the 2D SWD* will be above the overlapped area, like a holographic border beyond the edge of the visible universe.

Though the Black Energy Field, Border of the Quantum World and Depths of the Quantum World are beneath the Real World, they have less dense energies than the Real World. From this angle, these quantum dimensions are not beneath the Real World. However, the SWD is at the border between the Quantum World and the SWL. Therefore, the Quantum World is **‘under’** the Real World since the Real World overlaps the SWD. From this angle it can be said that *when people have an experience of being in the black subtle dimension*, during the second half cycle, they are in the ‘underworld’, i.e. they are in a **‘world’ which is under** the Real World and 3D SWD. In the second half cycle, the SWD is **within** the Border of the Quantum World and so:

1. People use holographic bodies which are in the Quantum World.
2. One’s consciousness is in the area of the Quantum World.
3. The souls are within the Quantum World.

Therefore, the dark quantum energies can provide the environment for the soul and its energies. Quantum energies do not help the soul, or its energies, to remain in the pure state. So one can experience unhappiness, while in the black subtle dimension, and the quantum energies will not influence one to come out of that state. Furthermore, the energies in the Quantum World do not influence to keep the world in a pure state, when energies are exposed to it. On the other hand, the *energies of the Cosmic Consciousness* help the soul to remain in the pure state. Further, one can only have the *energies of the Cosmic Consciousness* as an environment, if one is using the higher auric fields. One has to be in the pure state to use the higher auric fields. So one does not experience unhappiness while within the *energies of the Cosmic Consciousness*. The pure energies of the Cosmic Consciousness also influence to keep the world in a purer state, if energies are exposed to them. When compared in this way, it would seem like as if:

1. One is in the underworld when one is in the black subtle dimension.
2. One is in heaven when one is in the Cosmic Consciousness.

Being in the black subtle dimension is a reflection that we are in the mortal state. We can only be in the mortal state, when the SWD has sunk into the Quantum World because mortals only exist in the underworld (second half cycle). The second half cycle is the underworld because we can experience the impure state and unhappiness in the second half cycle. Thus, being in this dark environment is a reflection that we are on the shores of the underworld.

According to BK knowledge, souls who have been **in the Corporeal World since the first half cycle** would be in their most impure state now. They would be experiencing 'hell' on earth for all wrong doings in their past lives. Souls who have just come down from the Soul World would be enjoying a heavenly life.

It is the black No-info QE which provides the subtle environment, or background in the Holographic Universe, for the souls who have been in the Corporeal World for a long time. These souls would not be in the Cosmic Consciousness in the SWL. Souls who have just come down from the Soul World would be in the Cosmic Consciousness, within the SWL. Since the SWL is within the Quantum World, souls can easily drop out of the Cosmic Consciousness, to go into the Quantum World, when they begin to be consumed by the vices. Then, the black environment of the Quantum World provides the subtle environment, or background in the Holographic Universe, for these souls. From this angle, the Depths of the Quantum World, Border of the Quantum

World and the Black Energy Field can be associated to the Underworld. The 'Underworld' is Hell because the souls will be overwhelmed by the vices and settling for all their wrong doings. Since the souls are in the **black environment** in this 'Underworld', it is the 'Night' of the souls.

In accordance with the BK knowledge, the second half cycle is the 'Night of Brahma' because the second half cycle is an impure world. Impure energies are 'dark'. BK knowledge states that the second half cycle, especially the Kaliyug world, is Hell (or the Underworld) because people suffer, experience unhappiness etc.

The ocean of quantum energies, in the Depths of the Quantum World, provide very powerful energies which can be misused to bring about destructive events. These powerful energies exist everywhere in the Quantum World. Therefore, since the souls are not in a good environment, it is as if the souls are on the shores of 'hell'.

The QE Light energies are involved with providing what exists in the Real World. Thus, '**light**' is involved with providing the Real World. There is no 'light', but only darkness, in the quantum dimensions beneath the Real World. Even from this angle, it can be said that *when people have an experience of being in the black subtle dimension*, they are in the 'underworld'.

In the **first half cycle**, the dimensions within the Corporeal World are in the following order (from the highest to the lowest):

1. Cosmic Consciousness in the Depths of the SWL (ocean of QE Light at the very top in the SWL, above the Quantum World).
2. Upper part in the Border of the SWL which is the *shore of the Cosmic Consciousness* (in the SWL, above the Quantum World).
3. Cosmic Field (within the lower part in the Border of the SWL, above the Quantum World)
4. 2D SWD (within the lower part in the Border of the SWL, above the Quantum World).

5. 3D SWD (within the lower part in the Border of the SWL, above the Quantum World). The 3D SWD includes the First Field and the Second Field. The First Field is below the 2D SWD. The Second Field is below the First Field.

6. Real World (within the lower part in the Border of the SWL, above the Quantum World).

7. Black Energy Field (below the SWL, between the SWL and the Quantum World, a dimension of the quantum energies around the edge of the Quantum World).

8. Border of the Quantum World (the shore of the *ocean of Quantum Energies*, within the Quantum World).

9. Depths of the Quantum World (the *ocean of Quantum Energies* at the very bottom of the Quantum World).

In the first half cycle, the Cosmic Consciousness was in the least dense state because the deity souls were in the perfect divine state. Thus, the SWL was above the Quantum World. The SWD was in the Border of the SWL. The quantum energies were sent into the lower part of this border, for the creation process to take place. The quantum energies cannot go beyond the SWD. They cannot go into the Cosmic Field, Depths of the SWL and other areas in the Border of the SWL. In the first half cycle, patches of **QE Light with Info and QE with Info** exist among the *No-Info QE Light* because: 1. The SWD is in the Border of the SWL.

2. The SWD and the SWL are above the Quantum World.

In the first half cycle, souls are always in the lighted up environment of the SWL. The divine No-info QE Light from the divine Cosmic Consciousness provide the environment in the SWL for all souls. Since the SWD is also in the SWL, the divine QE Light also provide the subtle environment, or background in the Holographic Universe, for the consciousness or energies of the deity souls in the SWD. Deity souls never experience a dark

environment in the Holographic Universe because it is the ‘Day’ of the deity souls.

To the best of the BK knowledge, the first half cycle is the ‘Day of Brahma’ because the world that exists there is the **pure divine world** which was created through the Confluence Age. During the Confluence Age, the founder of the Brahma Kumaris and the BKs play a role as ‘Brahma’ for the re-creation of the Golden Aged world. Then, they enjoy the fruit of their efforts during the ‘Day of Brahma’. At the end of the Confluence Age, the Cosmic Consciousness will serve the deity souls by providing a divine world **after the Cosmic Consciousness has been transformed into the divine state.**

Though I have put the quantum dimensions below the Real World, the quantum dimensions exist around the QE Light dimensions because:

1. Both have energies going into the SWD for the creation process and continuous creation process.
2. All dimensions occupy the same space.

Chapter 17: Subtle Experiences in the Second Half Cycle

In the second half cycle, one's aura is used significantly for subtle experiences. When subtle bodies are used outside the physical body, during subtle experiences, they are used in the *QE Light energies* that are within the aura of the person. The *QE Light energies* also supply the energies for the creation of the subtle body, when a person has to use one during a subtle experience. Subtle bodies are provided based on the Holographic Body of the person. These subtle bodies can reflect the state of the soul because they are in the aura:

1. Where the energies of the soul vibrate out.
2. Where the state of the soul is reflected through the QE Light energies.

The environment, which these subtle bodies use, is like a subtle dimension within the aura. When a person has a subtle experience, some of the **QE Light energies (which emerge from the chakras) transform into the subtle light energies** which provide the subtle dimensions and subtle bodies in the experience. Sometimes, even the quantum energies are involved with providing something for the experience.

A person can use one of a few auric fields, during the subtle experiences. Some kinds of experiences can be easily had in specific auric fields. For example, during the experiences in the 7th auric field, one will easily know the past and future because the 7th auric field is connected to the 2D SWD. Each auric field provides a different kind of environment for the experiences because the density of each auric field is different. Some environments/dimensions are lighter than the others because of their purer state. It can be said that the environment which is provided by the QE Light energies, for a subtle experience, is a subtle dimension because:

1. The experience is in an auric field; and each auric field is like a world of its own because each auric field has a different density.
2. Different energies, of different densities, are used for each different kind of experience within the aura. If the energies are different or if its density varies, the energies are in a different dimension.

The Cosmic Consciousness begins the process for creating the subtle dimensions and subtle bodies, for the subtle experiences. Since the Cosmic Consciousness has initiated this, *QE Light and quantum energies* emerge from the chakras and flow into the aura of the person to provide what is needed for the subtle experience. The *QE Light and quantum energies* provide the dimensions for the experiences. However, these dimensions are not the permanently existing *QE Light and quantum dimensions* which provide the Real World and physical forms. The permanently existing quantum dimensions use the same space as the Real World which we live in, though the density of the energies in the dimensions are different.

Even the auric fields are **QE Light dimensions** since the *QE Light energies* provide the energies for the auric fields. The auric fields are also used during the creation and sustenance of the physical body. For example, the *QE Light energies* initiate the creation process for the physical body **through the 7th auric field** because the 7th auric field is connected to the 2D SWD.

Subtle dimensions are experienced in auric fields, and auric fields are quantum dimensions. Therefore, people are actually having experiences in quantum dimensions. However, the auric fields are not permanent dimensions because they disintegrate after a person dies. Furthermore, only some auric fields might be used at a specific point in time. Only the first auric field is used constantly until the person dies. Those that are not used, do not exist when they are not being used. Thus, auric fields are not permanent dimensions.

The subtle dimensions and subtle bodies, which are used during subtle experiences within the auric fields, also do **not exist permanently**. They only exist **temporarily**, when a person has a subtle experience.

Many different kinds of *subtle dimensions and subtle bodies* are provided based on the different belief systems etc. The *subtle dimensions and subtle bodies* are provided based on:

1. what exists in the 2D SWD.
2. human thoughts, desires, believes, etc.
3. what God has to do for human souls on earth.

When subtle dimensions and subtle bodies are created **based on the thoughts and desires of human souls**, it can be said that the human souls created these subtle dimensions and subtle bodies because these get created based on their thoughts etc. The *QE Light and quantum energies* just serve the human souls by creating the subtle dimensions and subtle bodies. The aura of the soul extends out into the Holographic Universe, to enable the soul to have these experience. However, all these subtle experiences are experienced within the Corporeal World because the vortices, at the end of the Corporeal World, do not allow anything to go out of the Corporeal World. These vortices only allow souls to come into the Corporeal World when they leave the Soul World.

The BK view is that, during the second half cycle, God helps and guides people through giving them visions etc. in an **indirect** way (through inspiration). When God helps the non-Confluence Aged souls, there is **no direct link** between the souls and God because it is **not** time for Judgment Day or the purification process. Therefore, souls get spiritually weaker until the end of the cycle. During the second half cycle, God helps and guides the people through:

1. the QE Light energies of the Cosmic Consciousness, and
2. the elements in the space between the Soul World and Corporeal World.

I refer to the *space between the Soul World and Corporeal World* as the ‘Mid-Region’. This Mid-Region is filled with an element which I refer to as the ‘Mid-Element’.

During the second half cycle, the Mid-Elements act as the *means of communication* for bringing God’s guidance etc. to the QE Light (Cosmic Consciousness) of the Corporeal World. God’s energies do not come directly to the Corporeal World. The Mid-Elements provide the waves through which God’s messages, guidance etc. are brought to the Cosmic Consciousness. In the

Corporeal World, the Cosmic Consciousness provides the visions etc. which God gives to the human souls. It is God who gives the visions, guidance etc. because the Mid-Elements and the Cosmic Consciousness are merely serving God.

When the messages, visions etc. reach the Corporeal World, the Cosmic Consciousness initiates what needs to be given to humans **through the energies which flow out of the Cosmic Consciousness for carrying out the mission.** These QE Light energies transform to make sure that the relevant vision etc. are provided in the auric field. Other *QE Light and quantum energies* also flow along and do what is necessary for providing the vision etc. If subtle dimensions and subtle bodies are provided, they are used near the end of the Real World or **above** the Real World. However, they will be within the Corporeal World.

In accordance with the knowledge of the Brahma Kumaris, the souls who come into the Corporeal World **during the second half cycle** are the devotee souls. *Founders of the various religious movements and their followers* also come into the Corporeal World, during the second half cycle. God guides the devotees, *founders of the religious movements and their followers* through visions etc. The QE Light serves by providing the relevant subtle dimensions, subtle bodies etc. These subtle dimensions and subtle bodies are used **within the Corporeal World**; though they will be used near the end of the Real World or **above** the Real World.

According to the knowledge of the Brahma Kumaris, the souls who come into the Corporeal World **during the first half cycle** are the deity souls. These deity souls lose their divine state and become ordinary human beings, at the end of the Silver Age. God guides them through visions etc., during the Mid-Confluence, while they create a new world for the second half cycle. The QE Light energies serve by providing the relevant subtle dimensions, subtle bodies etc. These subtle dimensions and subtle bodies are used within the Corporeal World; though they will be used near the end of the Real World or **above** the Real World.

In the first half cycle, the souls, SWL and SWD are above the Quantum World. They drop into the Quantum World, during the Mid-Confluence. Thus, during the Mid-Confluence, the subtle dimensions and subtle bodies could be above the Quantum World or within the Quantum World (depending on where the Real World was situated, when a person was having an experience). After the souls, SWL and SWD had sunk into the Quantum

World, experiences were in the Quantum World.

In the second half cycle, when souls drop out of the SWL, the quantum energies of the Quantum World can provide an environment for their experiences. However, the souls can bring themselves back into the SWL, through worship, meditation or through living a virtuous life. Though the Cosmic Consciousness is also in a submerged state within the black Quantum World, one can lift oneself or one's consciousness out of the black environment to go back into the 'lighted up' environment.

In the second half cycle, people use the first 3 auric fields, from the physical body, while living a life where they feel that they are the body, i.e. while living a non-spiritual life. For convenience, I refer to these first 3 auric fields as the Physical Auric Fields. The *5th auric field*, *6th auric field* and *7th auric field* are used to live a spiritual life. For convenience, I refer to the *5th auric field*, *6th auric field* and *7th auric field* (collectively) as the Spiritual Auric Fields. The 4th chakra (which is around the heart) and the 4th auric field are used to connect the body to the spiritual life. So the person continues to use the body while living a spiritual life. The 4th chakra and 4th auric field are used for both: the non-spiritual life and the spiritual life.

When the person is involved with meditation etc., the energies of the soul will flow through the 4th chakra and go into the Spiritual Auric Fields. Then, the 4th auric field will also link the soul to the Spiritual Auric Fields. Previously, the 4th auric field was linking the soul to the Physical Auric Fields.

When the soul begins to use the Spiritual Auric Fields, the soul is in the First Field because the Spiritual Auric Fields is in the First Field. It is as if the Spiritual Auric Fields is the Holographic Body of the soul, within the First Field. Since the Holographic Body is in the First Field, the soul is in the First Field.

The Spiritual Auric Fields also acts like a chakra to allow energies to flow into the Spiritual Auric Fields. Thus, when the soul uses the Spiritual Auric Fields, the *QE Light and quantum energies from the First Field* flow into the Spiritual Auric Fields **through the Spiritual Auric Fields itself** because the Spiritual Auric Fields is **in** the First Field. These pure energies:

1. also provide an environment in the Spiritual Auric Fields for the energies of the soul.
2. can also provide an environment/dimension during a subtle experience.

These pure energies from the First Field are more powerful, than those in the Second Field, because:

1. The First Field is close to the Cosmic Consciousness. Thus, these pure *QE Light and quantum energies* are influenced by the Cosmic Consciousness.
2. The chakras do not allow anything from the Second Field to enter the First Field. Thus, the chakras keep the vices, which are in the Second Field, away from the First Field. Therefore, the vices can only badly influence the state of the *QE Light and quantum energies* in the Second Field. The chakras also do not allow the impure energies in the Second Field to influence the energies which are in the First Field.

The QE Light energies, which emerge from the chakras **within the body**, create and sustain the Spiritual Auric Fields. These QE Light energies emerge from the First Field. Having emerged through the chakras, they go into the QE Light bodies and Spiritual Auric Fields. The QE Light energies, which emerge from the 5th chakra, *create and sustain* the 5th auric field and its QE Light body. The QE Light energies, which emerge from the 6th chakra, *create and sustain* the 6th auric field and its QE Light body. The QE Light energies, which emerge from the 7th chakra, *create and sustain* the 7th auric field and its QE Light body. The QE Light energies also provide the environment in the auric field which they have created. Fresh QE Light energies continue to flow into these auric fields, to sustain their existence. These fresh QE Light energies also provide an environment in the auric fields. The QE Light energies, that normally provide an environment in an auric field, can also provide an environment/dimension during a subtle experience within the auric field. In addition to these QE Light energies, other energies can also come into the Spiritual Auric Fields and provide an environment during subtle experiences.

When the Spiritual Auric Fields is used, the 7th chakra (which is at the top of the head) will be open for spiritual living. There will also be an open chakra at the

top of the Spiritual Auric Fields. Through these, the soul is connected to the *energies of the Cosmic Consciousness* which are in the **Cosmic Field**. These energies can also provide an environment for the *energies of the soul* during a subtle experience in the Spiritual Auric Fields. Thus, during an experience, the *energies of the soul* can be within these energies from the Cosmic Field. It will seem **as if** the energies of the soul have begun the process of merging into the Cosmic Consciousness.

If the *energies of the soul* go through the 7th chakra, then, through the chakra that exists at the top of the Spiritual Auric Fields, the *energies of the soul* will begin to use auric fields which are beyond the 7th auric field. I refer to these auric fields, which are beyond the 7th auric field, as the 'Higher Auric Fields'. The Higher Auric Fields is in the Cosmic Field.

When the Higher Auric Fields is used, the 7th chakra will be open for spiritual living. There will also be an open chakra at the top of the Higher Auric Fields. Through these open chakras, the soul is connected to the *energies of the Cosmic Consciousness* which are in the Border of the SWL. The Border of the SWL is in the SWL. Thus, it will be as if one's consciousness is merging into the Cosmic Consciousness. If the energies from the Border of the SWL flow through the *chakra at the top of the Higher Auric Fields* and provide the environment/dimension for an experience, the *energies of the soul* will then be in a merged state with the energies from the SWL. The energies of the soul, which are in the Higher Auric Fields, represent the consciousness of the soul. Thus, one's consciousness is merged into the energies from the SWL, during the experience. It can be said that the *consciousness of the soul* is lifted into the SWL, during the experience, since the *consciousness of the soul* is within the energies from the SWL. However, the energies of the soul and the soul are not **in** the Border of the SWL.

The *energies of the Cosmic Consciousness*, from the Depths of the SWL, can also flow through the open chakras (7th chakra and *chakra at the top of the Higher Auric Fields*) to provide an environment/dimension, for the *energies of the soul*, during a subtle experience in the Higher Auric Fields. During these experiences, the *energies of the soul* are within the powerful energies of the Cosmic Consciousness (in a merged state with the energies of the Cosmic Consciousness). Therefore, it is **as if** the *consciousness of the soul* is in the SWL, even though the *energies of the soul* and the soul are not in the SWL.

When the soul begins to use the Higher Auric Fields, the soul is in

the Cosmic Field because the Higher Auric Fields is in the Cosmic Field. It is as if the Higher Auric Fields is the Holographic Body of the soul. Since the Holographic Body is in the Cosmic Field, the soul is in the Cosmic Field.

The Higher Auric Fields acts like a chakra. Thus, when the soul uses the Higher Auric Fields, the **QE Light energies from the Cosmic Field** flow into the Higher Auric Fields **through the Higher Auric Fields itself** because the Higher Auric Fields is **in** the Cosmic Field. These pure energies:

1. also provide an environment for the energies of the soul in Higher Auric Fields.
2. can also provide an environment/dimension during a subtle experience.

The pure energies, from the Cosmic Field, will be more powerful than those from the First Field because they are closer to the Cosmic Consciousness.

The creation of the higher auric fields, which are beyond the 7th auric field, is through chakras which are created within the existing auric fields. Since the higher existing auric fields are like the Holographic Body of a person, chakras begin to exist in this higher Holographic Body when even higher auric fields need to be created. For example, chakras are created in the Spiritual Auric Fields, so as to create the Higher Auric Fields. The energies which spin out of these chakras are finer and less dense, since the chakras are in a higher dimension. Thus, very fine auric fields can be created above the 7th auric field. The higher the auric field, the less dense its energies are. Energies are also absorbed from the surrounding, in which the auric fields are. Thus, if the auric field is in a higher dimension, less dense energies flow into the auric fields from the surrounding.

Beyond the Cosmic Field is the SWL where the Cosmic Consciousness is in. If a person begins to use auric fields which are beyond the Higher Auric Fields, the person will be using auric fields which are within the Border of the SWL. For convenience, I am going to refer to the *auric fields which are beyond the Higher Auric Fields* as the 'SWL Auric Fields'.

When the SWL Auric Fields is used, the 7th chakra will be open for spiritual living. There will also be an open chakra at the top of the SWL Auric Fields. Through these open chakras, the soul is connected to the *ocean of QE light* (Cosmic Consciousness) which is within the Depths of the SWL. The powerful energies, from the *ocean of QE light*, can also flow into the SWL Auric Fields to provide an environment/dimension, during a subtle experience in the SWL Auric Fields. During such an experience, the *energies of the soul* will be within the powerful energies of the Cosmic Consciousness.

The SWL Auric Fields acts like a chakra. Thus, when the soul uses the SWL Auric Fields, the *QE Light energies* from the Border of the SWL **flow into the SWL Auric Fields**, through the surface of the SWL Auric Fields, because the SWL Auric Fields is **in** the Border of the SWL. These energies which flow into the SWL Auric Fields:

1. also provide an environment in the SWL Auric Fields.
2. can also provide an environment/dimension during subtle experiences in the SWL Auric Fields.

The pure QE Light energies, in the Border of the SWL, will be more powerful than those in the Cosmic Field because they are closer to the Cosmic Consciousness. Energies from the *ocean of QE Light energies*, from the Depths of the SWL, go into the Border of the SWL. Since the Border of the SWL is the **shore of the ocean of QE Light energies**, the energies there would be very powerful.

During the first half cycle, the *QE Light energies in the Border of the SWL* provide an environment/background for the SWD which is in the Border of the SWL. So the souls/people, in the first half cycle, constantly enjoy the environment in the Border of the SWL. However, in the second half cycle, souls/people can only enjoy the **environment in the Border of the SWL** if they are using the SWL Auric Fields. Even though they are in the Border of the SWL, they will not enjoy **what the people of the first half cycle enjoy** because in the second half cycle:

1. The energies in the SWL are not in the divine state.
2. The SWL is within the Quantum World.

The SWL Auric Fields is like the Holographic Body of the soul, when the soul begins to use the SWL Auric Fields. Since the Holographic Body is in the

Border of the SWL, the soul is in the Border of the SWL. Since the Border of the SWL is within the SWL, the soul and its Holographic Body are in the SWL. The soul is in the SWL, even though the physical body is being provided by *chakras and auric fields* which are not located in the SWL. If the consciousness of the soul goes into the SWL Auric Fields, the soul gets lifted into the SWL because the SWL Auric Fields is within the SWL. Though the soul is lifted into a higher dimension, the soul is still **in the physical body** which is not within the SWL. This is because the person uses two dimensions at the same time: the Holographic Universe and the Real World.

One uses a less dense environment in the Holographic Universe, while one also uses the Real World. In experiences, it will seem as if the less dense environment is further away from the physical body, however, it is not. Though, in experiences, it will seem like one dimension is higher than the other, all the dimensions actually occupy the same space. It might be very difficult to understand this unless one has experiences. Only in the Real World are there **fixed** 'heights' and 'distances'. There are no 'heights' and 'distances' in the Holographic Universe, though it looks like there are. One cannot try to understand the Holographic Universe, in the same way as one understands what is in the Real World.

During the second half cycle, if human souls have detached themselves from the physical world through meditation, worship etc., they can be in a subtle dimension which is:

1. Near the end of the Real World. In these experiences, the subtle dimension is in the 4th auric field, 5th auric field, 6th auric field or 7th auric field.

2. **Above** the Real World. In these experiences, the subtle dimension is in one of the auric fields which are beyond the 7th auric field.

The 7th auric field is connected to the Higher Auric Fields. The Spiritual Auric Field, which includes the 7th auric field, is connected to the body through the 4th chakra (Heart Chakra). Thus, the 7th auric field connects a person in the Real World to the dimensions which are above the Real World. So a person can have experiences which are beyond the Real World. Though the subtle dimensions within the Higher Auric Fields and SWL Auric Fields are above the Real World, they are still part of the Corporeal World.

When one uses the higher auric fields through meditation etc., one's auric field extends beyond the 7th auric field. Thus, one's aura will be tall.

There are 12 auric fields which can be used within the Corporeal World. The Higher Auric Fields consists of the 8th, 9th and 10th auric fields. The SWL Auric Fields consists of the 11th and 12th auric fields. The 10th auric field connects the Higher Auric Fields to the SWL Auric Fields. The chakra which is at the top of the Higher Auric Fields provides the 10th auric field. This chakra connects the 10th auric field to the SWL Auric Fields. The chakra at the end of the 12th auric field opens out into the ocean of Cosmic Consciousness. No auric fields can exist within the ocean of Cosmic Consciousness. Therefore, the SWL Auric Field only has two auric fields.

If the person was **not** meditating, the person would be using the Physical Auric Fields and the energies of the soul would be vibrating out into the lower four auric fields. The Physical Auric Fields is in the Second Field. So if one was not on the spiritual path, the energies of the soul would be flowing into the Second Field. Therefore, one's consciousness would be in the Second Field. The energies from the First Field:

1. provide the energies in the Second Field, and
2. create the 7 auric fields.

However, the energies from the Second Field (outside the Physical Auric Fields) also flow into the Physical Auric Fields because the Physical Auric Fields is in the Second Field. So the impure energies, in the Second Field, can get absorbed into the Physical Auric Fields. Furthermore, if the chakras don't function well in the body, the energies in the auric fields can become impure. Even when the vices of the person flow into the auric field, the energies in the auric field can become impure. Thus, the energies in the Physical Auric Fields may not be pure energies.

The Cosmic Consciousness is a higher dimension and the Second Field is a lower dimension. Thus, when the *energies of the soul* flow into the auric fields in the Second Field, the *energies of the soul* are not in the dimension of the Cosmic Consciousness. Therefore, when a person is not on the spiritual/religious path,

the person can experience being in a *subtle black dimension* within the Quantum World.

The environment which the *energies of the soul* have, when they vibrate out, will depend on which auric field they are vibrating out into. If the person is involved with meditation, the person uses the higher auric fields and the *energies of the soul* will vibrate out into the higher auric fields. In the higher auric fields, the pure QE Light energies provide a pure heavenly subtle dimension/environment and subtle bodies during experiences.

All the higher auric fields can only be used if the soul is in the pure state, by not becoming inundated with the vices. The consciousness of the souls will drop back into the black environment of the Quantum World, when they are overcome by the vices, because the SWD is in a sunken state within the Quantum World. As long as the consciousness of the soul is not in the higher auric fields, the person can experience a black environment.

Vices can also give visions or experiences based on one's desires. If the vices give a vision or subtle experience, the impure *QE light and quantum energies* provide the subtle environment and subtle bodies for the vision or experience. The lower auric fields are used for the experience because impure energies can only exist in the Second Field. The lower auric fields expand out to provide the experience. Since the QE Light can give an experience by using all 7 colours, the vices can use the QE Light energies to give a vision or experience which looks 'golden'. The 'golden' vision or experience is just an illusion because impure energies are not golden and the experience is only in the Quantum World (not in the Cosmic Consciousness where the energies are golden due to of their pure state). If the person was indulging in the vices, it will be the impure *QE Light and quantum energies* which provide an environment for the *energies of the vices* in the aura. Since these impure energies can only exist in the Second Field, an experience can only be in the black Quantum World even if the vision looks 'golden'. When the vices give a vision or experience, it is normally an illusion.

Though the higher chakras in the body provide the Spiritual Auric Fields, the higher chakras are also involved with providing the physical body. Thus, *QE Light and quantum energies* are flowing into the body, from these higher chakras, even though the person is not using the Spiritual Auric Fields. The QE

Light energies, which flow in through the 7th chakra, have information of what is in the 2D SWD because:

1. The 7th chakra is close to the 2D SWD.
2. The QE Light is coming, through the 7th chakra, from an area which is closer to the 2D SWD.
3. The QE Light, which flow through the 7th chakra, have the capability to provide information about what is in the 2D SWD, if a person was using the 7th auric field.
4. All *QE Light and quantum energies* act as one.
5. The *QE Light energies which flow through the 7th chakra* provide information (on what exists in the 2D SWD) to the Causal Self, so that the Causal Self can guide the Conscious Self to act as per the 2D SWD. I will be discussing this further in another book, when I discuss how the Causal Self uses the brain to guide the Conscious Self to act as per the World Drama (though the person is not aware that this is happening).

The vices can also use the information, which the QE Light brings (about what exists in the 2D SWD), to give an experience or vision to the person. This experience or vision is experienced in the aura. Though the environment may look grey, and not black, the experience is in the Quantum World.

In the second half cycle, people are not aware of what exists in the 2D SWD. If one wants to know the past and future, one can make spiritual efforts to open the 7th chakra (so as to use the 7th auric field and the auric fields which are beyond the 7th auric field). This helps one to get closer to the 2D SWD. Thus, one can easily know of what exists in the 2D SWD. Since one is a Causal self when one uses the higher auric fields, one will also find it easy to know of what exists in the World Drama that is deep within the soul.

If one uses one's 7th auric field, information (about what exists in the 2D SWD) flows in through the 7th chakra and 7th auric field. This information is placed in the QE Light Mind. Thus, the information is in the *mind of the soul*. So the soul

will know what is going to happen. The information can also be obtained through a subtle experience in the auric fields. The aura of the person can expand to allow the soul to see what exists in the 2D SWD. The QE Light will present what exists there in a form which can be understood by the soul. In the second half cycle, the QE Light gives such visions when God initiates it; though the QE Light can also provide the vision based on the desires of the soul (since the QE Light serves God and the human souls).

In the first half cycle, the souls are within the QE Light energies in the SWL. Since the QE Light energies are in a divine state and are close to the souls, they serve the souls well. Thus, the QE Light gives information to the soul of what is in the *2D SWD which is imprinted in the QE Light*. The information is placed in the QE Light Mind of the people. What is in the QE Light Mind, also exists in the mind of the souls. Thus, it is perceived by the soul without the QE Light energies entering the *mind of the soul*. People play their roles on earth, while guided by this information. Since the Conscious Self is a Causal Self, the people will also know of what exists in the World Drama, deep within the soul, as they play their roles on earth. These people will be living a life like yogis, without making spiritual efforts. To the best of the BK knowledge, the people in the first half cycle will not be involved with any worship because they are constantly experiencing happiness. They will be enjoying life. Nature will serve them well. So life will be wonderful. This heavenly life was lost, at the end of the Silver Age. So people began to worship God for help and guidance. Therefore, God begins to guide and help the people on earth through the *QE Light energies of the Cosmic Consciousness*.

The QE Light provides the visions which God gives to the human beings or it brings God's messages to the souls. It does these through the chakras, QE Light Mind and aura. The QE Light enters through the Crown Chakra (on the top of the head) and/or through the Ajna Chakra (in the forehead) so as to give God's messages etc., to the soul, by placing it in the QE light Mind. Everything that is in the QE Light Mind is in the *mind of the soul*. The QE Light provide the visions in the auric fields, so that the soul can see these visions. The soul sees these visions because everything that is in the aura is perceived like a movie, by the soul.

Since a person sees visions in his own auric field, others do not see it unless their auras get merged. The auras of people can connect if the people are involved with the same thoughts, activities, religious or spiritual practices and beliefs, feelings (especially if

there is ‘love’), etc. The subtle dimension which they use, in their merged auric field, is a temporary one. Thus, when people stop using the worship practices etc., the subtle dimension will not exist because it is not there in anyone’s aura.

Everyone who have the same religious beliefs, belong to the same belief system. Due to the same beliefs, their auras are merged or united. Each aura reflects the consciousness of the person. Thus, when the aura of many get united based on a belief system, a Collective Consciousness is formed. The *consciousness of all those involved in the belief system* are reflected in the merged auras. The united auras are also more powerful. So messages, desires etc. of the believers are easily sent to God; and God gives visions etc. to the believers.

The experiences etc. through a Collective Consciousness can be within the Real World (in the Second Field), near the end of the Real World (in the First Field) or beyond the Real World (in the Cosmic Field or Border of SWL). However, the experiences will be within the Corporeal World. A person who has a more powerful spiritual stage can have experiences which are beyond the Real World; while others can have experiences which are lower down (depending on which auric fields they are using). Though one is not spiritually developed, one’s weaker aura can become a more powerful one **when one’s aura merges** with the powerful auric fields of others who are in the Collective Consciousness. The weaker aura gets empowered by the more powerful one. Thus, people who are **not spiritually developed** can have their consciousness pulled into the higher auric fields which are beyond the Real World.

When a person begins to use the worship practices of a belief system, the person’s aura can connect to the aura of others, in the belief system, who are involved with the worship practices at that moment. Thus, the person can be assisted to use higher auric fields. As a result, the person will find it easy to send his message etc. across to God via the Cosmic Consciousness.

Since the Spiritual Auric Fields is connected to the Physical Auric Fields through the 4th chakra, the **energies of the soul in the Spiritual Auric Fields** can be aware of what exists in the Second Field. The higher auric fields (Spiritual Auric Fields and SWL Auric Fields) are connected to the body through the Spiritual Auric Fields and 4th chakra. Thus, the energies of the soul in the higher auric fields (Spiritual Auric Fields and SWL Auric Fields) can be aware

of what exists in the Second Field. Therefore, a person who is spiritually well developed, will find it easy to understand the desires of others which are reflected in their auric fields within the Second Field.

The energies of the soul and the QE Light energies are entangled with each other. So the QE Light energies are also vibrating out into the aura, along with the energies of the soul, as the desires of a person flow into his aura. The QE Light also reflects the person's desires in the aura. Thus, people who are spiritually well developed, will find it easy to understand the desires of the person. When the spiritually developed people bless the person to have his desires fulfilled, their more powerful aura empowers the weaker aura of the person. Thus, the person will have his desire sent to God through the pure QE Light energies in the merged auras.

The energies of the Cosmic Consciousness are used to provide the QE Light forms during the **creation of the Holographic Body and physical body** of all living things. Thus, the Cosmic Consciousness has a 'light form' in human bodies, animal bodies, plants and all other living things. Even the quantum energies which are being released into the SWD for *creating what needs to exist in the Real World*, have QE Light forms which are 'light forms' of the Cosmic Consciousness. All these various '*light forms*' of the Cosmic Consciousness can also be used, during worship, to get one's message easily sent to God because these energies are **projected by the Cosmic Consciousness**. This was also a reason why the ancient people had introduced and used trees, etc. for worship.

Though statues are not living, it will have a '*light form*' of the Cosmic Consciousness when it is being used for worship because the Cosmic Consciousness serves the human souls. Thus, non-living stones can be used for worship in this way. When the stone is given a shape, based on a belief system, it has more significance. This increases the faith of the believers. 'Faith' helps one to use the higher auric fields. When the higher auric fields are used, the Cosmic Consciousness is aware of what we want etc. because it provides the environment in the higher auric fields. So one can easily send one's message etc. to God. The ancient people had established worship systems which made sure that:

1. The messages etc. are sent to God, so that the worshipers get God's assistance.
2. The '*light form*' of the *Cosmic Consciousness* does **not** attempt to fulfil the impure desires of the people, without turning to God.

When using objects for fulfilling one's desires etc., one should use the rituals, mantras etc. which are used for getting God's assistance. If one was not calling out to God for assistance, the QE Light form would be fulfilling the person's desires without God's assistance. 'Desires' based on the influence of the vices are *impure desires*. If one was not turning to God for assistance, the energies of the QE Light form will try to fulfil one's impure desire. Thus, the QE Light energies would be influenced by the energies of the vices. The QE Light energies transform into **impure** QE Light energies since they are working with the vices and not with God. The energies of the *QE Light form* do not connect to the Cosmic Consciousness because there is no need for communicating the message to God. Since the energies of the *QE Light form* transform into impure energies, they will not be able to connect to the Cosmic Consciousness because vortices close when the QE Light energies become impure. Therefore, the *QE Light form* transforms into an **impure spirit** in order to assist the vices of the person. It is better to use a priest to do the rituals, say the mantras, etc. because:

1. The priest has been trained to use the higher auric fields. So his consciousness will be in the Cosmic Consciousness or it will be connected to it. Therefore, the messages etc. will be easily sent to God via the Cosmic Consciousness.
2. The priest does not have the impure desire which the devotee is trying to send across to God. He is just sending the message across to God that the devotee has that desire. Thus, the QE Light energies will not transform into the impure state.

During the second half cycle, since God helps people through the Cosmic Consciousness, it is as if a person can become 'one' with God through becoming 'one' with the Cosmic Consciousness. Becoming 'one' with the Cosmic Consciousness means that:

1. the soul in within the SWL,

2. the energies of the Cosmic Consciousness is within one's aura. Thus, they are within the territory which is part of the person.

3. the energies of the Cosmic Consciousness are the environment of the soul's energies (within the SWL and within the aura of a person). Since they are so close to the energies of the soul, it is as if they are in a merged state with the energies of the soul. Thus, they fulfil the desires of the person.

Actually, during these experiences, the person is only becoming 'one' with the universe. However, when they are 'one' with the universe, God will surely see what is in their mind through the Cosmic Consciousness. What is in the *mind of the soul* is in the QE Light Mind. Then, the QE Light energies of the QE Light Mind sends the message to God through the Mid-Elements as the *transmitter of the message*. When a person is 'one' with the Cosmic Consciousness, it is easier for the person to send his thoughts etc. to God because the person will be playing a role as the Causal Self at that time. The QE Light serves the Causal Self. Therefore, it will send what is in their mind to God. God sees what is in their mind because He knows what is in the QE Light Mind. The QE Light Mind is like the mind of the Cosmic Consciousness. To become one with the Cosmic Consciousness, one has to become the Causal Self. If one remains as 'one' with the Cosmic Consciousness when one dies:

1. One can easily continue having God's assistance and guidance upon death.

2. One can continue using one of the lighted up environment/dimension which are provided by the pure QE Light energies.

Religious practices help one to remain as 'one' with the Cosmic Consciousness, when one dies. So the soul remains in a lighted up environment/dimension after death. Entering into the lighted up dimension, after death, is like entering into heaven upon death. There can be many different kinds of lighted up dimensions depending on:

1. which dimension is used,

2. the spiritual stage which one has, and

3. the beliefs of the people.

Thus, there can be many different kinds of heaven and/or there can be many different divisions in heaven. Entering into a dark dimension, after death, is like entering into hell upon death. There are many different kinds of dark dimensions, depending on:

- 1. which dimension is being used,**
- 2. the spiritual stage which one is in,**
- 3. whether vices are used, and**
- 4. the beliefs that are used.**

Therefore, there can be many different kinds of ‘hell’ and/or there can be many different divisions in ‘hell’. Normally, the subtle Ka form of a person does not remain long in these lighted up or dark dimensions, after death.

The memories of the Mid-Confluence Aged people will be used again, at the end of the cycle. Thus, importance was given to the ‘afterlife’. With time, more practices were developed to assist the ancient people to continue playing their roles at the end of the cycle (in their afterlife). Thus, importance was given to whether one went into a ‘heaven’ or a ‘hell’, upon death. More on this will be discussed in later books.

Chapter 18: Confluence Aged Subtle Regions and Subtle Bodies

According to BK knowledge, God always resides in the Soul World and God does everything as per the World Drama. Accordingly, as per the World Drama, in 1936 (earth time), God has the **thought** that He should go into the Corporeal World so as to recreate the Golden Aged world. Therefore, God leaves the Soul World to come into the Corporeal World. When God is on His way to the Corporeal World, God creates the *Confluence Aged subtle region and subtle bodies* which will be used for World Transformation.

The *Confluence Aged subtle region and subtle bodies* are beyond the Corporeal World. The Confluence Aged Subtle Region only exists during the Confluence Age, at the end of the cycle. It does not exist at any other time. The Confluence Aged subtle bodies can only be used by the deity souls, in the Confluence Age.

According to BK knowledge, during the Confluence Age, there are three worlds: Soul World, Angelic World and the Corporeal World. The **Angelic World or Confluence Aged Subtle Region** exists between the Corporeal World and the Soul World. Within the Confluence Aged Subtle Region, there are three different kinds of subtle regions: Brahmapuri, Vishnupuri and Shankerpuri. Brahmapuri is the Confluence Aged subtle region which is immediately beyond the Corporeal World. The consciousness of all Confluence Aged souls are in Brahmapuri. Beyond Brahmapuri is Vishnupuri. When the Confluence Aged souls have experiences of being the *divine self who lives in the Golden Age*, they are in Vishnupuri. Beyond Vishnupuri is Shankerpuri. The Confluence Aged souls are in Shankerpuri when they are in the **most powerful** Confluence Aged stage.

God created the Confluence Aged Subtle Region **in the space of the Mid-Region**. Three kinds of elements are in the environment within the Confluence Aged Subtle Region:

1. The **Mid-Elements** of the Mid-Region.
2. The **Brahm element** which accompanied God to the Corporeal World.

3. The **QE Light energies** which flow through the vortices that opened at the extreme edge of the Corporeal World, as God was coming into the Corporeal World.

There are 5 elements in the Corporeal World: earth, water, fire, air and ether. The elements *earth, water, fire and air* are used in the creation of the Real World. 'Ether' is the *QE Light and quantum energies* which:

1. is the environment in outer space (The outer space is also part of the Real World).
2. is in the *QE Light and quantum dimensions* within the Holographic Universe.
3. is the quantum, holographic and subtle environments in the Corporeal World.

The 6th element is the Brahm element which is only the environment in the Soul World. The 7th element is the Mid-Element which is the environment in the space between the Soul World and the Corporeal World.

The Mid-Element, Brahm element and QE Light energies, in the Confluence Aged Subtle Region, are in their **pure divine state** because they are close to God. The Brahm element and Mid-Element are always in their pure state. However, the Mid-Element, in the Confluence Aged Subtle Region, will be in a divine state as well because these energies are now close to God. When energies come close to God, they will transform into a divine state. When they are no longer close to God, they are no longer divine. However, it is a little different with the QE Light because the QE Light, in the first half cycle, are sustained by the pure perfect divine state of the deity souls. Thus, in the first half cycle, the QE Light are in their pure perfect divine state. However, in the second half cycle, the QE Light are no longer in their perfect divine state, though they remain in the pure state in all the dimensions **except in the Second Field**. The QE Light, in the Second Field, turn into the impure state when they are exposed to the impure energies (vices) of the human souls, etc.

When God was establishing the Confluence Aged Subtle Region, while on His way to the Corporeal World, vortices open at the extreme edge of the Corporeal World so that the **QE Light can serve God**. Thus, **some** of the QE Light flowed through the opened vortices to go beyond the Corporeal World. This happens as

per the World Drama because the Confluence Aged Subtle Region has to get connected to the Corporeal World, through the QE Light energies. The vortices open because God's energies:

1. have energised the vortices at the edge of the Corporeal World.
2. have energised the *QE Light energies at the border of the Corporeal World*. These energised *QE Light energies* also assist to get the vortices opened.

So some of the QE Light energies, of the Cosmic Consciousness, flow out of the Corporeal World through the opened vortices and become divine QE Light energies. It is God who created the Confluence Aged Subtle Region because:

1. The vortices at the edge of the Corporeal World opened as they were energised by God's energies.
2. The Cosmic Consciousness projects its QE Light energies, beyond the Corporeal World, **so as to serve God** as He was on His way to the Corporeal World. They serve God based on **God's thought** and as per the World Drama. The Cosmic Consciousness acts like a machine to serve God.
3. The QE Light, Mid-Element and Brahm element become the environment in the Confluence Aged Subtle Region because **God is using them** and the space beyond the Corporeal World, as per the World Drama.
4. Only God's energies can create a **divine or spiritually powerful** subtle region.

It is only God's energies which can transform the QE Light energies into a powerful, pure, perfect and divine state. No human soul will be able to transform the subtle environment, which he is using, into such a divine one because no human soul is as powerful as God. God is like an ocean whereas the human soul is only like a drop, in comparison.

During the cycle, the vortices at the edge of the Corporeal World only allow souls to enter the Corporeal World (when they have left the Soul World to come into the Corporeal World). Energies, from within the Corporeal World, cannot leave the Corporeal World because the vortices do not allow that. Thus, even the soul and the *energies of the soul* cannot go beyond the Corporeal World, and the souls cannot go back to the Soul World. However, when God's vibrations come close to these vortices, God's powerful vibrations energise these vortices. Thus, the vortices open. So God can enter and leave the Corporeal World, at any time. However, as per the World Drama, God only comes into the Corporeal World at the end of each cycle, so as to recreate the Golden Aged world. The vortices also open for God because they serve God, in this manner, as per the World Drama. Thus, at the end of the cycle, the *energies of the Confluence Aged souls* can leave the Corporeal World so that the *consciousness of the soul* can reside in the Mid-Region (**where the Confluence Aged Subtle Region exists**). It is only at the end of the cycle that:

1. God gives this ability to reside in the Mid-Region which is just beyond the Corporeal World (**in the area where the Confluence Aged Subtle Region exists**).
2. God helps all human souls to leave the Corporeal World as He takes all souls back to the Soul World.

The vortices, at the edge of the Corporeal World, will only open to allow us to leave **if God gives a helping hand** by taking us back with Him. Since God is with us, His vibrations energise the vortices, as we leave with God. The energies of human souls are not powerful enough to energise the vortices, so as to allow the soul to leave the Corporeal World. The souls also cannot go back to the Soul World on their own because:

1. God has to purify the soul before the soul can go back.
2. Human souls need the support of God's powerful energies to fly back to the Soul World.
3. As per the World Drama, souls can only go back at the end of the cycle (after the Golden Aged world begins to materialise).

As per the World Drama, at the end of the cycle, all human souls have to go back to the Soul World with God. So vortices open, as

per the World Drama, as souls leave with God.

In the Corporeal World, the QE Light provides the *subtle environment and subtle forms* for the energies of the soul. Where the subtle bodies are concerned, the QE Light creates:

1. The QE Light bodies as part of the Holographic Body (during the creation of the physical body and auric fields).
2. The temporary subtle bodies which are seen in visions within the auric fields.

Further, the QE Light, which are projected into the Confluence Aged Subtle Region through the opened vortices, provide the *subtle environment and subtle bodies* for the Confluence Aged souls. The Confluence Aged Subtle Region is filled with God's energies because of God's presence there. So the QE Light energies that come into, and which are in, the Confluence Aged Subtle Region are energised to remain in a powerful divine state. Thus, the Confluence Aged subtle bodies, which consists of the divine QE Light, are '**angelic**'. The angelic Confluence Aged subtle bodies were created, by the QE Light, based on the **thought which God had** as He was coming from the Soul World. So God created the Confluence Aged subtle bodies. God created them as per the World Drama. There are two kinds of Confluence Aged subtle bodies:

1. The Angelic Body (QE Light body) which is the Holographic Body.
2. The angelic bodies, which are created temporarily by the QE Light energies, during visions.

In the Corporeal World, the *Non-Confluence Aged QE Light bodies that are part of the Holographic Body* are created by the QE Light energies which flow through the chakras. These chakras are also part of the Holographic Body, in the physical body. This is **not** how the Confluence Aged Angelic Bodies are created. The chakras had opened, at the edge of the Corporeal World, when God came into the Corporeal World. The QE Light energies, which flowed through these chakras, filled the space where the Angelic Bodies were to exist in the Confluence Aged Subtle Region. Thus, the Angelic Bodies, which have to be used in the Confluence Age, were created at the beginning of the Confluence Age. When a deity soul comes into the Confluence Age, by receiving the BK knowledge, he begins to use his Angelic Body. When he begins to use his Angelic Body, the Angelic Body will look like his physical body. Despite this,

his Angelic Body was created at the beginning of the Confluence Age (when the chakras opened and the QE Light flowed into the space where the Angelic Body was to exist). It is a matter of exercising one's right to use the Angelic Body because these Angelic Bodies were meant to be used by the deity souls when they receive the BK knowledge. **When a deity soul receives the BK knowledge:**

1. The Confluence Aged Spiritual Effort-maker **Causal Self** (or Confluence Aged Spiritual Effort-maker) is created.
2. The Angelic Body becomes the Holographic Body of the person.

When a deity soul receives the BK knowledge, some of the causal energies of the soul gets anchored in the Confluence Aged Subtle Region because the soul has begun to use the Angelic Body. So the deity soul begins to use the Confluence Aged Subtle Region. At the same time, the soul acquires the ability to act as the Confluence Aged Spiritual Effort-maker Causal Self. The Confluence Aged Spiritual Effort-maker takes over from the Kaliyug Conscious Self, to use the physical body. The Confluence Aged Spiritual Effort-maker acts as the Confluence Aged soul. Though the Confluence Aged soul already has the Angelic Body, in the Confluence Aged Subtle Region, a BK (a person who uses the knowledge of the Brahma Kumaris) can only become the **Angelic Self** in the Confluence Aged Subtle Region, when the BK is the Confluence Aged Spiritual Effort-maker. The Confluence Aged Spiritual Effort-maker uses the physical body to make spiritual efforts, while his Angelic Self resides in the Confluence Aged Subtle Region.

The Confluence Aged Spiritual Effort-maker **begins the spiritual effort-making process** by contemplating on God or on the BK knowledge which God has given. Contemplating on the BK knowledge helps to keep one in the Confluence Aged Subtle Region, as a Confluence Aged Spiritual Effort-maker or as the Angelic Self. The Angelic Body is used when the BK is a Confluence Aged Spiritual Effort-maker. When the Confluence Aged Spiritual Effort-maker uses the Angelic Body, he uses it as the Angelic Self.

When a BK begins to contemplate on the BK knowledge or on God, he is the Confluence Aged Spiritual Effort-maker and not the Kaliyug Conscious Self. The *spiritual effort-making* will enable the BK to remain as the Confluence Aged Spiritual Effort-maker for some time. If the BK stops using the BK knowledge for a long duration, he is no longer the Confluence Aged Spiritual Effort-maker Causal Self. Then, when the BK contemplates on the BK knowledge again, he

becomes the Confluence Aged Spiritual Effort-maker again. One has to keep contemplating on the BK knowledge, regularly, so as to **continuously** remain as the Confluence Aged Spiritual Effort-maker. A short break, from spiritual effort-making, will not stop one from being the Confluence Aged Spiritual Effort-maker because the energies acquired, during the spiritual effort-making, will sustain the BK's ability to remain as the Confluence Aged Spiritual Effort-maker for some time. However, if the BK takes a long break from spiritual effort-making, he will stop being the Confluence Aged Spiritual Effort-maker. The Confluence Aged spiritual effort-making helps to purify and strengthen the soul. The greater the spiritual effort-making, the greater the spiritual power that is acquired. During the purification and strengthening process, one can be entertained by visions.

When God gives a vision to a BK, the divine QE Light serves by creating the relevant subtle angelic bodies **based on the Angelic Body**. So the subtle bodies, in visions, look just like us and our Angelic Body. The *subtle regions and subtle bodies*, in visions, do not exist permanently. The QE Light only supplies *temporary subtle environments and subtle bodies* in visions.

The Confluence Aged auric field vibrates out from the Angelic Body which is the Holographic Body. Visions are seen in one's Confluence Aged auric field, beyond the Corporeal World. Thus, the visions are seen in the Confluence Aged Subtle Region. Visions help the Confluence Aged souls to have greater 'faith' and so they help with the transformation process. A BK can have three kinds of experiences:

1. The powerful blissful stage which is experienced within the soul; no visions are seen.
2. The powerful blissful stage which is experienced within the soul and, at the same time, the BK also sees a vision which involves the area outside the soul.
3. The BK sees a vision outside the soul but the spiritual stage of the BK is not that good. God gives the vision for certain reasons, as per the World Drama.

In the Confluence Age, souls usually only experience the blissful

stage (when their divine intellect gets linked to God). During this blissful stage, the soul is being purified and strengthened. One need not have a vision to be purified to become spiritually powerful. So BKs do not give importance to visions. Importance is only given to the blissful stage, in the Brahma Kumaris.

The Brahm element does not provide subtle forms. The Brahm element also does not allow the soul to express itself like how the QE Light does (through the aura and subtle bodies). The Brahm element is only the environment in the Soul World.

At the beginning of the Confluence Age, when God left the Soul World to come into the Corporeal World, **some of the Brahm element** accompanied God to the Corporeal World because they provide the environment for God to remain in. After the Confluence Aged Subtle Region gets created, these Brahm element, which accompanied God to the Corporeal World, become part of the environment in Shankerpuri.

After God and some of the Brahm element had come into the Corporeal World, God entered the body of Lekhraj (the founder of the Brahma Kumaris). Part of the Brahm element had entered the body of Lekhraj, so as to provide an environment for the energies of God within the smaller space of the body. The remainder of the Brahm element remained outside the body of Lekhraj. The Brahm element had to provide the environment for God in the Corporeal World because:

1. God had **not** begun using the body of Lekhraj.
2. Lekhraj had **not** begun to use his Angelic Body.
3. The Confluence Aged auric field of Lekhraj had **not** been established, as yet. The Confluence Aged auric Field is only established after the person begins to use the Angelic Body.

When God entered the body of Lekhraj, Lekhraj surrendered himself to God. So Lekhraj began to use his Angelic Body. It was Lekhraj who had first begun to use his Angelic Body. It was as if

life was given to his Angelic Body. The moment he began to use his Angelic Body, the Confluence Aged auric field vibrated out from his QE Light Angelic Body. So his Confluence Aged auric field got established. It was Lekhraj who had first begun to use a Confluence Aged auric field. Lekhraj began to be called ‘Brahma Baba’, after he had surrendered himself to God.

After Lekhraj began to use his Angelic Body and his Confluence Aged auric field, God was entering Brahma Baba’s body from the Confluence Aged Subtle Region. God was entering Brahma Baba’s body through Brahma Baba’s *Angelic Body and Confluence Aged auric field* because Brahma Baba’s *Angelic Body and Confluence Aged auric field* **are connected to Brahma Baba’s physical body**. Thus, the Brahm element does not have to come into the Corporeal World. They can remain in the Confluence Aged Subtle Region. Having entered the body of Brahma Baba, God began using:

1. the physical body of Brahma Baba,
2. the Angelic Body of Brahma Baba, and
3. the Confluence Aged auric field of Brahma Baba.

Thus, God could enter Brahma Baba’s body straight from the Confluence Aged Subtle Region. As per the World Drama, after coming into the Corporeal World, God had to use the body of Brahma Baba to give the sakar murlis. The sakar murlis are God’s messages that were given through Brahma Baba when he was living.

The *Angelic Body and Confluence Aged auric field* are in the Confluence Aged Subtle Region, beyond the Corporeal World. Therefore, the soul and consciousness of Brahma Baba reside in the Confluence Aged Subtle Region, though the soul was still in the physical body when Brahma Baba was alive. When Brahma Baba was alive, he was using two worlds at the same time: Corporeal World and Angelic World (Confluence Aged Subtle Region).

The ‘consciousness’ is the ‘conscious’ aspect of the soul. The consciousness is not the soul. So the Cosmic Consciousness is not a ‘soul’. Where humans are concerned, one’s ‘consciousness’ can be referred to as the Conscious Self.

Brahma Baba's consciousness, when he was alive, was his Confluence Aged Spiritual Effort-maker Causal Self or his Angelic Self. When he was making spiritual efforts, he was doing it as the Confluence Aged Spiritual Effort-maker. When he was experiencing the angelic stage, he was experiencing it as the Angelic Self. When our stage is very high, we stop being the Confluence Aged Spiritual Effort-maker and remain only as the Angelic Self **for a split second**. After that, we have to use the Confluence Aged Spiritual Effort-maker Causal Self again, to make spiritual efforts, so that we can **continue to have a high stage for a long time**. If not, we will lose our high stage quickly. If we kept making spiritual efforts, when our stage is high, it will be as if we keep alternating between the Angelic Self and the Confluence Aged Spiritual Effort-maker Causal Self. It can be said that when we are the Confluence Aged Spiritual Effort-maker, we are also the Angelic Self. However, since our spiritual stage is not high, the Angelic Self will not be visible in our eyes, behaviour, spiritual stage, etc. It will be as if we have been split into 'two':

1. the Angelic Self who is in the Angelic Body.
2. the Confluence Aged Spiritual Effort-maker who is making spiritual efforts through using the physical body.

The energies of the BK which are anchored in the Confluence Aged Subtle Region, will be the Angelic Self in the Angelic World. Most of the energies of the soul will be used by the Confluence Aged Spiritual Effort-maker **unless** the BK is in a very high stage. As we keep making spiritual efforts, more energies from the soul will keep going into the Angelic Body **until** we stop being the Confluence Aged Spiritual Effort-maker (during the split second when we have a very good experience as the Angelic Self). After Brahma Baba left his physical body, his consciousness is only his Angelic Self. BKs refer to this Angelic Self as 'Angelic Brahma Baba'.

Though Brahma Baba has left his physical body, Brahma Baba has continued to use his *Angelic Body and Confluence Aged auric field* in the Confluence Aged Subtle Region. God is also still using Brahma Baba's Angelic Body and Confluence Aged auric field. Thus, God is still in the Corporeal World.

The **divine QE Light** which is in the Angelic Body and Confluence Aged auric field is '**one**' with the **QE Light in the Corporeal World**, though the *divine QE Light* is beyond the Corporeal World. Since it is 'one' with the *QE Light in the Corporeal World*, it is also '**one**' with **all the other quantum energies which materialise the Real World**. Thus, all the *QE Light and quantum energies* are

connected to the Angelic Body and Confluence Aged auric field **through the divine QE Light**. So Brahma Baba's *Angelic Body and Confluence Aged auric field* can be said to be in the Corporeal World.

Brahma Baba had to be in a physical body so as to begin using his Angelic Body and Confluence Aged auric field. When Brahma Baba was alive, his Angelic Body and Confluence Aged auric field were connected to his physical body through his Heart Chakra (4th chakra which is around the heart, in the physical body). Though Brahma Baba's Confluence Aged auric field is in the Angelic World, his first auric field (Ethereic Field) remained in the Corporeal World because his physical body is in the Corporeal World. The first auric field is connected to the Confluence Aged auric field through the Heart Chakra. In fact, the first auric field is not the aura. It only connects the physical body to the aura. However, it can be considered to be part of the aura since it is connected to the aura. The first auric field is the **double** of the physical body. I will be giving more explanations on the first auric field, in my next book. When Brahma Baba left his body, his body was buried (and not cremated) in Madhuban. Madhuban is the headquarters of the Brahma Kumaris at Mount Abu, India. Since Brahma Baba's body was buried, his first auric field (the double of his physical body) has remained in the Corporeal World, in Madhuban. The first auric field consists of QE Light energies which serve God and human souls. Thus, Brahma Baba's first auric field has remained in Madhuban until this day. This first auric field connects Brahma Baba's Confluence Aged auric field to the Corporeal World. Thus, Angelic Brahma Baba is still connected to the Corporeal World. **Angelic Brahma Baba is using the Angelic Body and the Confluence Aged auric field.** The soul of Angelic Brahma Baba is only in the Angelic Body and not in the physical body. However, since the Confluence Aged auric field vibrates out from the Angelic Body, Angelic Brahma Baba is also connected to his first auric field in the Corporeal World. Brahma Baba is no longer a Confluence Aged Spiritual Effort-maker because he no longer has a physical body to make spiritual efforts. He is only the Angelic Self. Since Brahma Baba was using his Angelic Body and Confluence Aged auric field while he was in a physical body, Brahma Baba could use them even after leaving his physical body. Thus, Brahma Baba and God stay connected to the Corporeal World, even though Brahma Baba is no longer using a physical body. Through Angelic Brahma Baba, world transformation continues to take place.

When God began using the body of Brahma Baba, God's energies had vibrated into Brahma Baba's *Angelic Body and Confluence Aged auric field*. God's energies, which were within Brahma Baba's *Angelic Body and Confluence Aged*

auric field, kept the vortices open (at the edge of the Corporeal World) for Brahma Baba. So the soul and consciousness of Brahma Baba could reside in the Angelic World. All those who receive and use the BK knowledge, could also use these opened vortices through Brahma Baba's *Angelic Body and Confluence Aged auric field*. This is still possible because Brahma Baba was in a physical body when God established the Confluence Age. When we say that world transformation was taking place through Brahma Baba, when he was alive, it meant that his Angelic Body and Confluence Aged auric field were also used for the world transformation. Brahma Baba's Angelic Body and Confluence Aged auric field continued to be used, for world transformation, after he became Angelic Brahma Baba. God is in Brahma Baba's Angelic Body while He is in the Angelic World. So God's energies are still vibrating into Brahma Baba's *Angelic Body and Confluence Aged auric field*. So the vortices, at the edge of the Corporeal World, are still open for all BKs. Thus, BKs can continue to reside in the Angelic World.

Since the vortices, at the edge of the Corporeal World, are open for Brahma Baba's aura **these vortices remain open for all those whose aura merges with Brahma Baba's aura** when they receive and use the BK knowledge. For example, if DS3 (Deity Soul 3) accepts the BK knowledge while receiving it for the first time, the aura of DS3 will merge with Brahma Baba's Confluence Aged auric field because DS3 has accepted the same knowledge which Brahma Baba has accepted. Since auras are merged and Brahma Baba's aura is filled with God's energies, God's energies (from Brahma Baba's aura) flow into the aura of DS3 and empower the aura of DS3. God's energies purify and strengthen all the energies which are within the aura of DS3. Thus, the aura of DS3 transforms into a Confluence Aged auric field. At the same time, the **intellect and energies of the soul** are divinised and so:

1. the divine intellect flies to the Confluence Aged Subtle Region so as to establish a link with God.
2. some of the causal energies of the soul fly and get anchored, within the Angelic Body, in the Angelic World.
3. the consciousness of DS3 becomes the Confluence Aged Spiritual Effort-Maker.

Thus, the consciousness of DS3 is in the Angelic World. When the aura of DS3 is transformed, it is no longer in the Kaliyug

Corporeal World. It is in the Angelic World; though the first auric field (Ethereic Field) remains in the Corporeal World because the physical body is in the Corporeal World.

The soul's energies, which act as the intellect, will have some energies projected into the aura because it is the intellect which sends and receives information. So some of the *energies of the intellect* are in the aura, so as to communicate information to the world and receive information from the world. When God's energies transform all the energies in the aura of DS3 into a divine state, the *energies of the intellect* are also divinised in the aura. Since these energies are **energies which have been projected by the *intellect of the soul***, the intellect of the soul (which is deep within the soul) is also transformed into a divine state. So the intellect becomes the 'divine intellect'.

As the *intellect in the depths of the soul* get divinised, the **deity soul awakens** in the depths of the soul and remembers that he is the deity soul who had lost his divine world at the end of the Silver Age. The Conscious Self may not be aware of all this which is going on deep inside the soul. The 'soul' remembers, though the person may not. Thus, the Causal Self in the depths of the soul begin to act as the Confluence Aged Spiritual Effort-maker Causal Self, so as to claim his rights to become divine again. Therefore, the Confluence Aged Spiritual Effort-maker becomes the Conscious Self; and the Kaliyug Conscious Self is not used as the Conscious Self.

When the deity soul is awakened in the depths of the soul, the divine intellect emerges from the depths **to the surface of the soul**. So the Confluence Aged Spiritual Effort-maker takes over, at the surface of the soul, as the Conscious Self. As this happens, all the energies of the soul, which are used at the surface of the soul for daily living, get energised to become divine. At the same time, the **divine intellect which had emerged from the depths** will fly to the Angelic World so as to establish a link with God. When the link is established:

1. the depths of the soul keeps receiving God's energies through the divine intellect, and
2. the surface of the soul is energised to remain in the divine state.

So the soul gets purified and strengthened. If DS3 does not continue to make spiritual efforts, the surface of the soul loses its divine state quickly. The energies accumulated within the depths of the soul (hereafter referred to as the 'Confluence Aged Prana') **remain** unless DS3 completely stops making spiritual

efforts. If DS3 completely stops making spiritual efforts, the Confluence Aged Prana will keep leaking out to the surface of the soul. So the surface of the soul can enjoy purity for some time, **until the Confluence Aged Prana completely drains out**. If DS3 has a lot of accumulated Confluence Aged Prana in the depths of the soul, DS3 can enjoy purity for a longer time unless DS3 was constantly indulging in the vices. When the vices are given free rein to, a lot of energies are consumed or burnt up. So the Confluence Aged Prana will be lost very quickly. Losing the Confluence Aged Prana is similar to how the soul was losing spiritual energy through the cycle. However, the Confluence Aged Prana will get drained out more quickly because the soul will be in the most impure Kaliyug world. Pure energies do not remain in a powerful state when one is in a Kaliyug environment.

In the BK centers and Brahma Kumaris headquarters, there is a BK Collective Consciousness which is filled with God's energies because the aura of BKs are merged with Brahma Baba's Confluence Aged auric field. From my own experiences, I know that the most powerful energies to support the BK Collective Consciousness comes from the Brahma Kumaris headquarters in Mount Abu. Anyone who uses the BK knowledge can easily have their aura merge into this BK Collective Consciousness. Thus, they receive God's assistance to go beyond the Corporeal World. The BK Collective Consciousness is hooked into the Confluence Aged subtle region, through Brahma Baba's Confluence Aged auric field. Thus, all those whose aura merges into this BK Collective Consciousness, get energised to get hooked into the Confluence Aged Subtle Region which is beyond the Corporeal World. So BKs can easily go beyond the Corporeal World when they use the BK knowledge.

Though Brahma Baba's first auric field is in Madhuban, his Confluence Aged auric field is in another dimension where there is no 'distance' and 'time'. So a person's aura, which is not in Madhuban, can also connect to Brahma Baba's Confluence Aged auric field.

As per the World Drama, the divine QE Light serves God and the deity souls by providing the environment and the subtle bodies for the *energies of the Confluence Aged souls*. Thus, when BKs keep remembering God or keep using the BK knowledge, the **divine QE Light of the Confluence Aged auric field** provides:

1. the environment for the energies of the soul, when they fly beyond the Corporeal World, and
2. the relevant subtle body for an experience, if a vision is involved.

Since the pure divine QE Light provides the BK with the environment, the *energies of the soul* can fly beyond the Corporeal World. The *energies of the soul* fly within the aura which expands to go beyond the Corporeal World.

After having come into the Corporeal World, God began using three worlds at the same time: Corporeal World, Angelic World and Soul World. So the intellect of the Confluence Aged soul can also fly to the Soul World so as to establish the link to God. The aura expands to allow the *energies of the soul* to fly to the Soul World. However, the **soul** cannot return to the Soul World because, as per the World Drama, all deity souls have to remain in the Angelic World for world transformation to take place **through self-transformation**, i.e. the deity souls have to keep making spiritual efforts until they become very powerful spiritually. Further, only God can take everyone back to the Soul World. God will not take anyone back until the Golden Aged world begins to materialise.

The Confluence Aged souls and the *consciousness of all the Confluence Aged souls* are in the Angelic World because their Angelic Bodies and *Confluence Aged auric fields* are in the Angelic World. However, the soul is still in the physical body. Thus, though the *Confluence Aged auric field* is in the Confluence Aged Subtle Region (beyond the Corporeal World); it is as if the Confluence Aged auric field stretches down to the body. The BKs' and Brahma Baba's *Confluence Aged auric fields* will look gigantic because the *Confluence Aged auric field* is connected:

1. to the body through the Heart Chakra.
2. to the first auric field which is next to the physical body, in the Corporeal World.

3. to the BK Collective Consciousness in the BK centers and Brahma Kumaris' headquarters.

The Confluence Aged souls will have the highest aura because their aura goes beyond the Corporeal World. Others can have auras which come into the Cosmic Consciousness, near the edge of the Corporeal World. However, they cannot have auric fields beyond the Corporeal World because the vortices will not open to allow that. No-one can have an aura as high as the Confluence Aged souls and the Mid-Confluence Aged gods. The aura of the Mid-Confluence Aged gods was also high because they were making spiritual efforts to remain in the SWL which was still beyond the Quantum World, even though the SWD and Real World was dropping into the Quantum World. The Mid-Confluence Aged gods were the more powerful human souls who were not yielding to the vices and who had begun meditations so as to maintain a high spiritual stage. So they were able to keep the SWL, which they were in, in a higher dimension for some time. However, the weaker Mid-Confluence Aged souls were bringing the SWD and the Real World into the Quantum World because they were not making spiritual efforts and they were influenced by the vices.

Though God resides within Brahma Baba's subtle body, in the Confluence Aged subtle region, one only perceives God's presence and not Brahma Baba's presence, during one's experiences, because one is only linking oneself to God. One is not linking oneself to Brahma Baba. There are two souls within Brahma Baba's Angelic Body: Brahma Baba's soul and God (the Supreme Soul). When we link ourselves to God, we are **not** linking ourselves to the soul of Brahma Baba. We are **only linking ourselves to the Supreme Soul**. Brahma Baba's bodies (physical and angelic) are the 'chariot of God'. Without this 'chariot', world transformation cannot take place.

When the intellect is in a powerful divine state, during spiritual effort-making, the divine intellect will **easily fly** into the Confluence Aged Subtle Region so as to establish the link between the soul and God. When the intellect is not in a

powerful divine state, it would not be able to establish the link to God. In a lot of visions, I had seen my intellect flying to the Angelic World or struggling to go into the Angelic World. In these visions, my intellect had looked like a short string. This must have been a reflection that energies act like a 'string'. In some experiences, it felt like as if I was that intellect which was like a short string. This was because **I am the soul** and the intellect consists of the energies of the soul. Sometimes, the short string will look like me.

In some of my experiences, I had seen my intellect up-side down because it was not in a powerful state. While up-side down, it looked lifeless. When I see such visions, I realise that my spiritual stage is not good and I try to link myself to God. Despite this, sometimes, my intellect will not be able to fly (in the vision). So I contemplate, further, on the BK knowledge or on God until I see my intellect getting filled with energies and life. Then, the intellect will turn to become up-right again. After gaining spiritual power, it will fly to establish the link to God. In these experiences, the *lifeless upside down intellect* is a reflection that the intellect of the Confluence Aged Spiritual Effort-maker is not being used. Often, our intellect is not in a divine state because:

1. we are indulging in the vices, or
2. we are battling with the vices and so we get exhausted and greatly fatigued.

The words 'battling with the vices' mean that we are trying to remain in a spiritually pure stage. In the pure stage, we would not be overcome by the vices and the vices would also not be in an emerged state. The intellect is used a lot when we are in a 'battle with the vices'. Thus, the intellect can get debilitated. If the intellect is tired, we feel tired because the intellect consists of the energies of the soul, and we are the souls. When we feel tired and enfeebled, we feel indolent and unmotivated to make spiritual efforts or we feel 'lifeless'. Thus, even our intellect will be lifeless. So we don't make spiritual efforts or we do not do a good job while making spiritual efforts.

In many experiences, I saw myself going through a hole, which was at the edge of the Corporeal World, so as to go into the

Angelic World. God would be beyond that hole as a powerful light, and the whole area, beyond that hole, would be lighted-up with God's powerful light. At that time, I did not know anything about vortices. So I did not know that the hole was a vortex. I only knew that I had to go through that hole, at the end of the Corporeal World, so as to go into the Angelic World. I knew that the hole was the entrance to the Confluence Aged Subtle Region.

If the intellect has only gained a little power, it will struggle to fly up that hole so as to establish the link with God. In many visions, I had seen the struggle which my intellect was having. There were times when I had seen my intellect act smart, by hooking itself onto the edge of that hole because it was not powerful enough to fly further into the Confluence Aged Subtle Region. The intellect would look like a short string with its tip bent, to hook itself. The bent tip will be on the side of the Angelic World, while the rest of the intellect (string) will be hanging in the Corporeal World, swinging around while trying to go into the Angelic World. God would be watching what I do, while He was in the Confluence Aged Subtle Region. He would be looking at me through the hole. If it looked like as if I was not going to make it on my own, He would give a Helping Hand to pull me into the Confluence Aged Subtle Region. Sometimes, I was able to make it on my own and I would see myself as my intellect: my hand would be holding onto the edge of the hole, while the rest of me would be hanging down in the Corporeal World. The bent tip of the string would be my fingers which are on the other side, in the Angelic World. Since it is on the other side, it gets energised. This reflected a weak link. Thus, as my fingers were energised, I could feel God's energies coming into me (the soul). I saw myself supported in this way (with my fingers above the hole, while grabbing the side of the hole) because God's energies were giving me the support to go beyond. However, only **some of my energies were within the Angelic World** because of my weak state. Since the fingers (representing some of the energies of my divine intellect) were getting energised, I was getting more support to fly beyond. So, in the vision, I would see myself putting my leg up through the hole, while still struggling and I would also be using my leg to hang from the edge of the hole. Since I was having more support, it was obvious that I was not going to drop down into my physical body. It was like this because my link was getting stronger. I would also feel more of God's energies coming into me (the soul). The greater support reflected that God's energies were giving me more support to go into the Angelic World. I was getting more support from God's energies

because I was exposed to more of His energies which were above the hole. Then, in the vision, since I have more support through using the hand and leg, I would lift myself up or swing myself up through the hole and go into the Angelic World which is beyond the Corporeal World. This reflected that my link had become good. I would also experience a good stage, at that time.

In some experiences, I dropped down into the body when my *hold onto the edge of the hole* was not good. This reflected that my spiritual effort-making was not good enough. Sometimes, God can help a deity soul, to establish a link to God, by giving the deity soul vibrations through the BKs who have a link to God.

All Confluence Aged souls reside in the Confluence Aged Subtle Region. However, the Confluence Aged soul will not be leaving the physical body to reside in the Angelic World. The soul will be using the Angelic World and the Corporeal World. The Corporeal World is only used because the physical body has to be used. The consciousness of the soul is not in the Corporeal World, it is in the Angelic World. The Confluence Aged soul will be looking through the eyes and using the body, while the Confluence Aged soul is in another world. The Confluence Aged soul will be like an alien in this Corporeal World, when using the body, because the Confluence Aged soul does not belong to the Corporeal World. The Confluence Aged soul belongs to the Angelic World. The Angelic World is a different world from ‘earth’ because:

1. it is beyond the Corporeal World.
2. non-Confluence Aged souls cannot go there, as they wish; like how they can go anywhere within the Corporeal World.
3. completely different kinds of energies are used to create the Angelic World. The QE Light is also of a different kind, with a different density.

The QE Light is of a different kind or/and of a different densities because it is influenced by the spiritual state and spiritual strength of the soul. The higher the spiritual state and strength, the lighter (or less dense) the subtle environment, etc. which are

supplied by the QE Light. The density of the QE Light is in the following order (from the least dense to the densest):

1. The QE Light in the Confluence Aged Subtle Region are the least dense. Thus, the subtle bodies, Angelic Bodies, auric fields, subtle regions and subtle environments, in the **Confluence Age**, consists of QE Light which are the least dense or lightest. These QE Light are less dense or lighter than those in the first half cycle because these energies are close to God.

2. The QE Light **in the first half cycle** are very light (less dense) because of their divine state. Divine QE Light are less dense than the QE Light which are in the ordinary state (non-divine). The subtle environment, auric fields and Holographic Bodies, in the first half cycle, consists of divine QE Light energies.

3. In the **second half cycle**, the QE Light are in the ordinary state. Thus, they will be less dense than the divine QE Light energies of the first half cycle. In the second half cycle, if a person is **living a spiritual or religious life**, the pure QE Light which are lighter (less dense) supply the subtle environment, auric fields, subtle bodies and Holographic Bodies. Since these ordinary QE Light are in their **pure** state, they will also look golden or lighted up.

4. **In the second half cycle**, if a person was **not living a spiritual or religious life**, the QE Light which supply the subtle environment, subtle bodies, auric fields and Holographic Bodies for the person are **dense** because the QE Light are in their ordinary state.

5. **In the second half cycle**, if **vices** are used by a person, the densest QE Light supply the subtle environments, auric fields, subtle bodies and Holographic Bodies because the QE Light are in an impure state, when they provide an environment for the vices.

The Brahm element, which has accompanied God from the Soul World, also provide an environment for God and the more

powerful deity souls, in the Angelic World. The Brahm element consists of red light. The environment in the Soul World is red, since the Soul World is filled with this red light. The Brahm element has no counterpart in the Corporeal World or anywhere else. It only fills the Soul World as light. The QE Light has quantum energies, in the quantum dimensions, as its counterpart.

What is so unique about the Confluence Aged Subtle Region is that three different kinds of elements (QE Light, Mid-Element and Brahm element), belonging to three different kinds of world, are part of the environment in the Confluence Aged Subtle Region. All three are part of the environment in the Confluence Aged Subtle Region because the Confluence Aged Subtle Region is an exit route to the Soul World. So the Confluence Aged Subtle Region is not like the Corporeal World. The Corporeal World is for the souls who are playing a role on earth. The Corporeal World is not an exit route back to the Soul World.

As the Confluence Aged souls keep making spiritual efforts, it is **as if** they are on their way back to the Soul World, though they are still in the Angelic World. It is as if they are on their way back to the Soul World because, as their spiritual strength keeps increasing, they go into a higher space in the Angelic World. So it is as if they are moving closer to the Soul World. As the spiritual strength keeps increasing in the deity souls, a gathering of Shanker will begin to exist in Shankerpuri (the highest Confluence Aged subtle region which is closest to the Soul World).

According to the BK knowledge, the 900,000 most powerful deity souls will have to be ready for world transformation to take place. This means: they must have done a lot of spiritual effort-making, through using the BK knowledge, and become spiritually powerful souls. Their spiritual strength should be able to sustain the divine world, in the first half cycle. These 900,000 most powerful deity souls will be like a gathering of Shanker, in Shankerpuri, by the end of the cycle. If they leave their bodies and are ‘ready’ for world transformation, they will not take another

birth. They will remain in the Angelic World until the world gets transformed into the Golden Aged world, on earth. Their spiritual strength will be contributing towards the creation of the Golden Aged world, on earth.

All human souls can only go back to the Soul World, after the world has begun to transform into the Golden Aged world on earth. Until then, if a soul is not in a human body, the soul has to wait in a relevant subtle dimension which has been provided, by the QE Light energies, *as per the World Drama*.

According to BK knowledge, in the Soul World, the most powerful souls are at the top. Thus, God is at the very top. Below God are the deity souls who take births in the first half cycle. The less powerful deity soul are below the more powerful deity souls. The deity souls who take their **first birth in the Golden Age** during each cycle (hereafter referred to as the ‘Golden Aged souls’) are more powerful than the deity souls who take their **first birth in the Silver Age** (hereafter referred to as the ‘Silver Aged souls’). Thus, in the Soul World, the Golden Aged souls are **above** the Silver Aged souls. In the Soul World, there are **various divisions** below the deity souls. The Hindu devotee souls, who are not followers of gurus and religious founders, will be **in the division** which is directly below all the deity souls. The other divisions, on the left and right of this division, are the **divisions of the various religions**. The founder of each religion will be at the top of his division. Below the founders are their followers. For example, Christians will be below Christ in a division (space/region) of their own. When God takes all human souls back to the Soul World, He takes them back in this order. Thus, the subtle dimension which the non-deity souls exist in, before going back to the Soul World, will be below the Confluence Aged Subtle Region. Each religious group will be in their own subtle dimension.

According to BK knowledge, the souls who experience punishment on Judgment Day will be in Dharamraj Puri. Wherever the souls are positioned in, within the subtle dimension of their group, the souls remain there. Yet, they are taken into another dimension, which uses the same space as their subtle dimension, while they experience punishment on Judgment Day. It will be as if they are in two dimensions:

1. the subtle dimension of their group, and

2. Dharamraj Puri.

However, they will only experience the punishment in Dharamraj Puri and **not** in the subtle dimension of their group. It will be as if they are temporarily taken into another dimension, before they experience the punishment. The souls are experiencing the punishment because they are being purified. Human souls are purified instantly on Judgment Day. Thus, it is painful. They have to be purified before they are taken back to the Soul World. The population that would be left on earth, after that, would be small. Only the deity souls, who walk into the Golden Aged world, would be left on earth. Those who walk into the Golden Aged world, will take care of everything in the Golden Aged world **until** the deity souls, who are born in the Golden Age, take over.

During the Confluence Age, the purification process only takes place **very slowly** while the Confluence Aged souls enjoy bliss. Thus, BKs do not experience the purification process as a ‘punishment’. They only enjoy bliss, in the Angelic World, because God’s energies help them to experience **only bliss** and not pain. During the purification process, God’s energies burn away the sins etc. If a Confluence Aged soul has not completely purified himself, during the Confluence Age, he would be experiencing pain on Judgment Day for all that which has not been burnt away during the Confluence Age.

During their spiritual effort-making, the Confluence Aged souls reside in one of the three Confluence Aged subtle regions: Vishnupuri, Brahmapuri or Shankerpuri. These three subtle regions have different densities. Thus, it is as if they are one on top of the other. The least dense is Shankerpuri. So it is the highest subtle region. The densest, among these three, is Brahmapuri, so it is the lowest among the three subtle regions. Though it seems as if these three subtle regions are one on top of the other, all three use the same space **beyond the Corporeal World**.

More than one Confluence Aged subtle region can be used at the same time. Thus, God and Angelic Brahma Baba reside in more than one subtle region. God and Angelic Brahma Baba are in Brahmapuri, where all Confluence Aged souls reside, because Brahma Baba’s Angelic Body is in Brahmapuri. However, God (as the Supreme Soul) and the *soul of Brahma Baba* are also in Shankerpuri because they consist of powerful energies. Since God is in Shankerpuri, the Brahm element is in Shankerpuri.

Using two Confluence Aged subtle regions at the same time is similar to how one can use the Real World and the Holographic

World at the same time. Thus, one's consciousness can be:

1. In the Real World (like how Angelic Brahma Baba is in Brahmapuri).
2. In the Holographic World (like how Angelic Brahma Baba is in Shankerpuri).
3. In both (Real World and Holographic World), like how Angelic Brahma Baba is in Brahmapuri and Shankerpuri (at the same time).

Even the BKs can use Shankerpuri or Vishnupuri while using Brahmapuri. In fact, the Confluence Aged souls, whose consciousness are in Shankerpuri or Vishnupuri, are connected to the Corporeal World through Brahmapuri because these souls are also involved with *playing the role of Brahma* for the transformation of the world into the Golden Aged world. Since all three Confluence Aged subtle regions are connected, all three subtle regions have God's vibrations within it.

Though the Supreme Soul and the *soul of Brahma Baba* are also in Shankerpuri, this is not significant because **God is using Angelic Brahma Baba** to assist all Confluence Aged souls who are **in Brahmapuri**. Brahmapuri includes:

1. Brahma Baba's *Angelic Body and Confluence Aged auric field*.
2. the BK Collective Consciousness.
3. all the Angelic Bodies and Confluence Aged auric fields of all Confluence Aged souls.

The BK Collective Consciousness is connected to the BKs in the Real World. Though it is **as if** it is in the environment of the Real World, in the BK centers and Brahma Kumaris' headquarters, it is not in the Real World. It is **as if** the BKs:

1. bring Brahmapuri into the *BK centers and Brahma Kumaris' headquarters*.
2. bring the environment, in the BK centers and Brahma Kumaris' headquarters, into the Confluence Aged Subtle Region which is beyond the Corporeal World.

The Confluence Aged auric field acts like a chakra to absorb God's energies, and the other energies, from the Confluence Aged Subtle Region. Thus, it is **as if** the Confluence Aged Subtle Region also exists within the Confluence Aged auric field. This Confluence Aged auric field is connected to the BK, in the Real World, through the first auric field. So it is **as if** the BK brings the Confluence Aged Subtle Region into the place where the physical body is. Since it is **as if** the Confluence Aged Subtle Region also exists within the Confluence Aged auric field, the *energies of the soul* in the BK's aura, are within the Confluence Aged Subtle Region.

The BK Collective Consciousness consists of the *Confluence Aged auric fields of BKs* which have merged into the *Confluence Aged auric field of Angelic Brahma Baba*. Since it is **as if** the Confluence Aged Subtle Region is in the Confluence Aged auric field, it is **as if** the BK Collective Consciousness has brought the Confluence Aged Subtle Region into the *BK centers and Brahma Kumaris' headquarters*.

The Angelic World can be felt when a BK has a blissful experience because the **energies of the soul**, which are within the Confluence Aged auric field, **are within** the *energies from the Confluence Aged Subtle Region*. The environment of the Angelic World is also felt because the aura expands into the Angelic World. Visions reflect the Confluence Aged subtle regions because:

1. the Confluence Aged auric field is filled with energies from the Confluence Aged Subtle Region.
2. the Confluence Aged auric field is in the Confluence Aged Subtle Region.

If God gives a vision in Vishnupuri to a BK, God's energies will also energise the Confluence Aged auric field. The energised QE Light energies, in the Confluence Aged auric field, will flow along with what God is doing by flowing towards Vishnupuri. As the aura expands, the soul's energies (which are within the aura) are also brought to Vishnupuri where the BK will see the vision. Thus, the BK will see the vision, within his Confluence Aged auric field, **in Vishnupuri**. The energies in Vishnupuri and in the Confluence Aged auric field will be in a merged state. So the vision is seen in both.

According to the BK knowledge, the men who live in the Golden Age are referred to as 'Krishna'. After marriage they become

‘Narayan’. The married women, who live in the Golden Age, are referred to as ‘Lakshmi’. Vishnu is the combined form of Lakshmi and Narayan, in the Golden Age. Therefore, the BKs who have experiences, in the Confluence Aged subtle region called Vishnupuri, are provided with subtle bodies of Krishna, Lakshmi, Narayan or Vishnu. These temporary subtle bodies are created, in the visions, if the Confluence Aged souls have to experience themselves as Narayan etc. Subtle bodies are used because Vishnupuri is filled with QE Light energies. Vishnupuri is a pure divine subtle region. Thus, it is golden in colour. The golden divine QE Light energies, in Vishnupuri, are used when God gives visions in Vishnupuri. Thus, the golden divine QE Light create the subtle bodies and provide the environment, in Vishnupuri, when one experiences oneself as Lakshmi, Narayan, etc. One’s Confluence Aged auric field expands into Vishnupuri, when one has these experiences in Vishnupuri, because one perceives visions etc. in one’s own aura.

The colour of the environment in Shankerpuri looks orange, in visions, because Shankerpuri has a mixture of:

1. pure golden QE Light energies, and
2. Brahm element, which is red light.

In the BK knowledge, the ‘seed stage’ is the stage where the BK:

1. is not using a subtle body,
2. is only experiencing oneself as the powerful soul in the blissful stage.

One can experience the *seed stage* in Shankerpuri because:

1. Shankerpuri has more of God’s vibrations than the other two Confluence Aged subtle regions. Thus, one is energised to go beyond all ‘forms’.

2. Shankerpuri has the Brahm element. The Brahm element gives an environment which is similar to that in the Soul World, where the souls have no 'forms'.

3. Shankerpuri has lesser amounts of QE Light energies than the other two subtle regions, since the Brahm Element fills the space of this subtle region. Since there are some QE Light energies, one can also use a subtle Shanker body while in Shankerpuri.

During the Confluence Age, the *energies of the soul* fly into one of the three subtle regions and reside there as a deity (Brahma, Vishnu or Shanker) because of its pure state. Though the BK does **not see a vision**, the BK can feel that:

1. The BK is in the relevant subtle region. This is felt through the *energies of the soul* which are within the Confluence Aged auric field, in the subtle region.

2. The BK is the deity in the subtle region. This is felt because the *energies of the soul* reside in the subtle region, as the deity of that subtle region.

If a vision is seen of this experience, the QE Light will provide an angelic body of the deity (Brahma, Vishnu or Shanker), in the vision, so as to reflect the spiritual state of the *energies of the soul*.

All Confluence Aged souls are in Brahmapuri because they are involved with the creation of the Golden Aged world. Since they are involved with creating the new Golden Aged world, they are 'Brahma' in Brahmapuri. Confluence Aged souls will only be in Brahmapuri, and not in the other two subtle regions, if they are in a weak stage or if they were *not making spiritual efforts for a short duration*. The deity soul remains in Brahmapuri even when the deity soul is not seriously making spiritual efforts because:

1. their Angelic Body is in Brahmapuri, and

2. their Confluence Aged auric field connects them to Brahmapuri, where their Angelic Body is.

Even if a Confluence Aged soul is influenced by the vices, he is still in Brahmapuri because he still has his Angelic Body in

Brahmapuri. The vices cannot go into Brahmapuri because the Confluence Aged Subtle Region is filled with God's energies. It is only the pure energies of the soul which can fly to the Confluence Aged Subtle Region. However, the vices from the soul can vibrate into:

- 1. the BK's aura, and**
- 2. the BK environment, in the BK center, unless the BK environment is also very pure and powerful because God's energies are constantly being emitted into the environment through powerful BKs in the BK center.**

Since the BK aura and BK environment can be seen as being part of Brahmapuri, it is as if Brahmapuri includes the BKs who are using the vices. Since these BKs are in Brahmapuri, they can easily make spiritual efforts to go into the pure state. Confluence Aged spiritual effort-making is initiated in Brahmapuri. A BK need not be in a good spiritual stage to begin this spiritual effort-making; though the BK needs to have a good spiritual stage so as to establish a powerful link to God.

In visions, the colour of Brahmapuri will look white because God's energies, the Mid-Element and the QE Light are all white lights. The QE Light and Mid-Elements look white and not golden, in Brahmapuri, because:

- 1. There are less of God's energies in Brahmapuri than in Vishnupuri and Shankerpuri.**
- 2. They are close to the weaker energies which are in the Corporeal World.**
- 3. Even weak Confluence Aged souls are in Brahmapuri.**

There are less of God's energies in Brahmapuri, than in Vishnupuri and Shankerpuri, because people, who are not

making spiritual efforts, cannot be exposed to too much of Gods energies. If they were exposed to too much, they might experience pain since their stage is not a powerful one. Despite this, one can constantly see God in Brahmapuri because:

1. God's energies are constantly there for giving assistance, during the transformation process, and
2. God is using Brahma Baba's Angelic Body which is in Brahmapuri.

Though our Angelic Body is in Brahmapuri, our consciousness can be in Vishnupuri or in Shankerpuri. Visions can be seen in all three Confluence Aged subtle regions. If we are **not** involved with visions:

1. When having an experience in Shankerpuri, we will feel like a **powerful soul**.
2. When having an experience in Vishnupuri, we will feel like a **divine soul**.

While in any of these three Confluence Aged subtle regions, the Confluence Aged soul can **absorb God's energies** through its direct link to God. When the Confluence Aged soul absorbs God's energies, God's energies will energise the Confluence Aged soul. Then, from the Confluence Aged soul, God's energies will vibrate into the BK's Confluence Aged auric field. Then, from the BK's Confluence Aged auric field, God's energies will vibrate into:

1. the Confluence Aged environment, in the Corporeal World.
2. the Cosmic Consciousness which is just below the Angelic World.
3. the Holographic Universe.
4. to anywhere else, where it is sent.

Since the BK has an Angelic Body and a Confluence Aged auric field, the Confluence Aged Subtle Region is closely connected to the environment of the BK in the physical world. This allows the environment, on earth, to transform into a Confluence Aged environment. People who come into the Confluence Aged

environment on earth, in the BK centers etc., can easily go into a pure state.

If, after having absorbed God's energies, the Confluence Aged soul sends God's energies to someone or to the world, the Confluence Aged auric field will bring God's energies to where it is sent. If God's energies are sent to another soul, God's energies will leave through the BK's Ajna Chakra, at the forehead, and they will go into the Ajna Chakra of the other so as to reach the other soul. If God's energies were sent to a person who is very far away, the Confluence Aged auric field will expand to bring God's energies to that person. If God's energies were sent into Nature, God's energies will leave the BK's Confluence Aged auric field and go into the *QE Light and quantum energies* of Nature. The BK's Confluence Aged auric field can take God's energies into the various dimension, within the Holographic Universe, so as to energise them. The divine QE Light, in the Confluence Aged auric field, transmits God's energies to the *QE Light and quantum energies* in the Holographic Universe. Since the Cosmic Consciousness is just beneath the Confluence Aged Subtle Region, the Cosmic Consciousness is also energised to become divine. When the Cosmic Consciousness get completely transformed, in the SWL, all the *QE Light and quantum energies* transform. Thus, even the Real World transforms into the Golden Aged world.

At the end of the cycle, when the Cosmic Consciousness gets powerful just beneath the Angelic World, the vortices begin to spin to a higher height. Therefore, the height of the Holographic Universe increases. So when the Golden Aged world begins to materialise as the Real World, the SWL of the first half cycle **takes over** the space of the Confluence Aged Subtle Region. As this happens:

1. The Mid-Elements, from the Angelic World, move into the space which is beyond the Angelic World (where all the other Mid-Elements exist).
2. The Brahm element goes back to the Soul World with God.

Thus, only the QE Light energies are left in the space of the Angelic World. When only the QE Light is left, the 'walking into the Golden Age' process is completed.

During the phase when the 'walking into the Golden Age' is taking place, the vortices would be slowly spinning to a greater height **until they reach the**

height which they should have at the beginning of the Golden Age. The Confluence Aged souls and the *people who walk into the Golden Aged world* will be living together, for some time, until the vortices reach the height which they should reach.

At the end of the Silver Age, when the energies of the deity souls transform into the ordinary state, the QE Light energies become less powerful. So the QE Light energies do not spin, as vortices, to a very great height. Since their height drops, the SWL, Cosmic Field, SWD and Real World sink into the Quantum World. Then, during the second half cycle, they keep sinking deeper into the Quantum World.

The height of the vortices had reduced tremendously, during the Mid-Confluence, because the QE Light lost their spiritual strength **very quickly** when the deity soul lost their divine state very quickly. After that, the height of the vortices was reducing **very slowly** until the end of the cycle because the QE Light energies were losing their spiritual strength **very slowly**, as the human souls were losing their spiritual strength very slowly in the Corporeal World. Then, during the Confluence Age, the QE Light becomes powerful **very quickly**, as the Confluence Aged souls regain their spiritual strength **very quickly**. So the height of the vortices increases very quickly, at the end of the cycle. As the Confluence Aged souls take a high jump into the divine state, their energies energise the Cosmic Consciousness which is at the edge of the Corporeal World. Since the QE Light energies become more powerful, they spin to a higher height (as vortices) and come into the Angelic World. Then, the Real World will materialise, above the Quantum World, in the space of the Angelic World.

As the vortices spin to a higher height, the Mid-Region will move further away from the Corporeal World because the SWL takes over the place in the Angelic World. At the same time, the Mid-Elements leave the Angelic World, while God and the Brahm Element go back to the Soul World, with the human soul. Then, the Mid-Elements, in the Mid-Region, will be in their perfect state because they will be occupying their original space between the Corporeal World and Soul World. In the second half cycle, when the SWL is within the Quantum World, the Mid-Elements got

spaced out as they spread into the area of the SWL. Thus, they lost their perfect state.

In the first half cycle, the SWL will be above the Quantum World. The people, of the first half cycle, will not be within the Quantum World because they are immortals. Both, the SWL and the Quantum World, are part of the Corporeal World. So the people, in the first half cycle, will still be in the Corporeal World when the SWL is above the Quantum World. The place where the creation process takes place will not be in the Border of the Quantum World, it will be in the Border of the SWL.

As per Nature's 2D WD, since the creation process should take place in the borders between the SWL and Quantum World, the vortices provide for *QE Light and quantum dimensions* within this area. Some of these *QE Light and quantum dimensions* will be materialising the Real World, as the Real World Quantum Dimension. Therefore, the Real World can be within the Border of the Quantum World, as it is in the second half cycle, or the Real World can be within the border of the SWL as it is in the first half cycle.

Very dense *QE Light and quantum energies* materialise the Real World in the second half cycle because the Real World is further down, **near the tip of the vortex**. *QE Light and quantum energies* which are **not dense** materialise the Real World in the first half cycle because the Real World is higher up, near the top of the vortex. God's energies, from beyond the present Corporeal World, create this heavenly Golden Aged world in a higher dimension, though the Golden Aged Real World will also occupy the same space as our Real World now. It will be as if a lighter world is brought down to exist in the space of our Real World. Since it will be a very 'light' (not dense) world, it will be a heavenly place. It will also be heavenly because everything in the Corporeal World are in their pure perfect divine state and souls can only experience happiness. No-one experiences unhappiness in the Golden Age. Unhappiness or sorrow can only be experienced in the second half cycle.

At the beginning of the Confluence Age, when QE Light energies are projected beyond the Corporeal World, they are also projected beyond the **Holographic Universe of the second half cycle** (hereafter referred to as the **Old Holographic Universe**). The Confluence Aged Subtle Region is not part of the Old Holographic Universe because the Old Holographic Universe is part of the

Corporeal World which exists in the second half cycle. However, the Confluence Aged Subtle Region is **like an extension** to the Old Holographic Universe because:

1. The Confluence Aged Subtle Region is for the transformation of the Kaliyug Corporeal World into the pure perfect divine Corporeal World.

2. The Confluence Aged souls are still using bodies in the Corporeal World, though **their consciousness is beyond the Corporeal World**. BKs have their consciousness in the Confluence Aged Subtle Region, though they continue using their bodies on earth for service, make spiritual efforts, etc. BKs use the corporeal bodies as **aliens to this Corporeal World** because their actual residence is in the Confluence Aged Subtle Region.

1. Some of the QE Light are in the Confluence Aged Subtle Region. However, this extended region of the Holographic Universe is beyond the Corporeal World. It is in the Mid-Region and not in the Corporeal World. So the Angelic World cannot be seen as being part of the Old Holographic Universe. The Angelic World is in the *world of the Mid-Region*.

2. A subtle dimension is part of a Holographic Universe. However, the Angelic world is not part of the Old Holographic Universe because the Angelic World is used to create the **new divine Holographic Universe of the first half cycle** (hereafter referred to as the '**Divine Holographic Universe**'). Thus, the Angelic World is not part of the Old Holographic Universe, though it is connected to the Old Holographic Universe because BKs still use the old Corporeal World during world service.

God created the Confluence Aged Subtle Region for the creation of the Divine Holographic Universe. The space, where the Angelic World exists in, will become part of the new Divine Holographic Universe. As the Golden Aged world materialises, the space of the

Angelic World becomes the space of the SWL in the Divine Holographic Universe. This new Divine Holographic Universe takes over from the Old Holographic Universe. There will not be any chaos in the Divine Holographic Universe. Everything happens in an orderly manner.

Since the Holographic Universe expands to become bigger, the *Corporeal World of the first half cycle* would include the space that is beyond the present Corporeal World. The energies in a higher up dimension are less dense. Thus, very fine and light energies would be emerging, from the vortices, to materialise the new Golden Aged Real World in the space of the Angelic World. Even the quantum energies which emerge into the Border of the SWL, to materialise the Real World, will be less dense because they would be emerging from near the top of the vortices. When the new Golden Aged Real World is materialised through these less dense *QE Light and quantum energies*, it will be as if the Real World has been lifted into the higher dimension through the Confluence Age. The bodies of those who walk into the Golden Age would consist of very fine, less dense, lighter energies. These people will be living in the places where the Confluence Aged souls are because the area, around the powerful BKs, will get transformed before the rest of the world gets transformed. So those who *walk into the Golden Age* and those who belong to the *gathering of Shanker* will be living together on earth (in the new Real World).

When the Golden Aged world is about to materialise, the Cosmic Consciousness moves into the Angelic World. So the SWL moves into the Angelic World. Then, as the Golden Aged world begins to materialise, the quantum energies will emerge into the area where Brahmapuri exists. Before this, during the Confluence Age, there were no quantum energies within the Angelic World. Quantum energies only come into the Angelic World, when the SWD of the first half cycle begins to exist in the Border of the SWL. Since the SWD gets lifted into Brahmapuri, it is as if those who played the role of Brahma have transformed the ‘world’, where they resided, into the new heavenly world.

Since there are BKs all over the world, Brahma Baba’s Confluence Aged auric field has expanded to surround the whole

world. The Confluence Aged auric field is part of the Angelic Body, since it vibrates out from the Angelic Body. Thus, since Brahma Baba's Confluence Aged auric field surrounds the whole world, it is as if Brahma Baba's Angelic Body also surrounds the whole world.

In the first half cycle, since the energies of the Cosmic Consciousness are more powerful, its 'shore' (Border of the SWL) is also larger. Within this larger area, there will be the Cosmic Field, 2D SWD and 3D SWD. The Quantum World, in the first half cycle, would be lighter because:

1. there are no impure energies within it.
2. a lot of the energies have been lifted out of it.
3. the energies within the Quantum World, would be influenced to remain 'lighter' since they are close to powerful energies which are in the SWL.

There is **no permanent** Confluence Aged Subtle Region, beyond the Corporeal World; the Confluence Aged Subtle Region will exist, where the energies of the soul are, when the consciousness of a BK is taken beyond the Corporeal World. It is only as the Golden Aged world materialises, in the dimension of the Angelic World, that a 'world' begins to exist **permanently** in this dimension. So a new 'world' is created, within this dimension, through the Confluence Age. When the *QE Light and quantum energies* begin to materialise the Real World in the space of the Angelic World, God takes all human souls back to the Soul World. Only those who take care of the Golden Aged world, will be left behind. As they leave their bodies, they will also go back to the Soul World. God will assist them to return back to the Soul World. Though this brings an end to the cycle, it is not 'The End' because the Divine Holographic Universe has come into existence.
